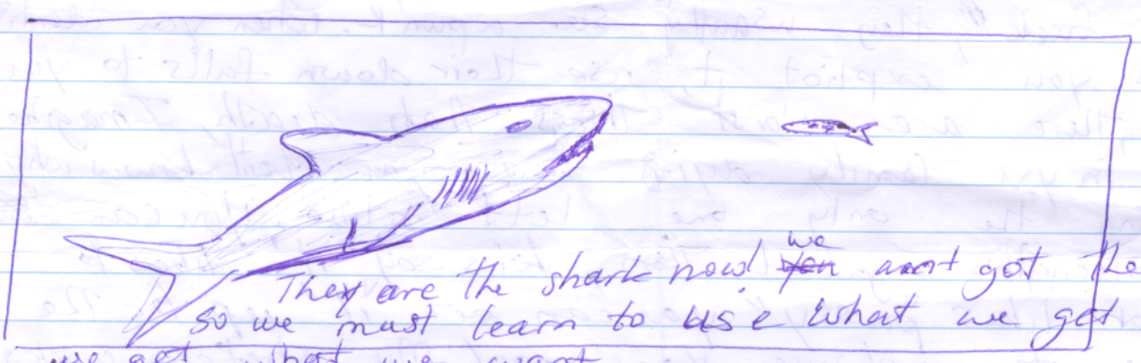
TACTIC #1 There are 12 For our situation.

PLF-DEF-EX. #235
DATE 12/15/03
JUDGE JMR
CASE # CR03-3089, 3090, 3091

Let me explain to you a tactic or stratagy. First you have to identify the source of the problem, then study this source until you understand completely its characteristics, when you understand somethings way of life and it's make up, you can calculate and predict its actions. After identifying these major characteristic you now have the tools to develop a plan to achieve your goal, you must have one main plan, but you must also prepare for unwanted problems, if you do not plan for say a person at their window, it will come back to "bite" you in your "ass". The main key to sucess is, "unity," proper tools, a workable strategy which consists of speed, and the element of "suprise". You must be able to sit at the table with your enemy and not let them know that you "hate there guts". The key to achieving this is the ability to mask your emotions and feelings, when I say mask I mean control what you say, do ~~and~~ to get them to think you are somebody you are not. I have practised to sit at the "table" and you wont "know a flying fuck", they usaully see a punk. When you identify a weakness you expliot it, use their down falls to your advantage, there are worst things than death, Imagine everyone in you family dying but you dont know why, you being the only one left alive. You can also use their strengths against them, lets say "it" likes to showoff, or likes "pussy" you can set "it" up for the right time to achieve your goal. My strategy works for me because my enemy does not know me, therefore I have "suprise" on my side, I study the objective, look for the downs and ups of the plan and when the oppurtunity, which was calactated/planned arrives it is used to it's fullest. This way can work for long range fishing trips or

one's where you stand on the riverside real close to the action. Hey can you get hold to them things "fishing poles" ten years from now, cause if we meet down the road I got a plan, I hope we meet face to face to explain in detail. I play the stupid fool "look at how I act and speak everbody underestimates me" They say he can't do shit, look at his ass, and I Love that, it gives me the edge I need to study, conquer and overcome. Control your anger, don't let "punk's" get to you, you fucked up "cussing" with that fucking trustee this morning, you ain't learning man, you can't show your hand, they listen to "EVER THING" "LEARN" PACMAN This is NOT THE STREET, THE WORD IS OUT they are afraid of you. "They have to believe you a punk, but if you Keep showing your cards you fuck up the poker game, all this shit goes to your classification down the road the lower the level the less, we will have to deal with to get out. Our hand is in the shark's mouth, take your time a put it out



They are the shark now! we aint got the tools so we must learn to use what we get until we get what we want.

"You have to know when to hold them,
Know when to fold them,
Know when to walk away
Know when to run.
Don't count your money when sitting at the table"
They will be time enough to count when the dealing's done.

TACTIC #2

This tactic hear is called the CASINO.

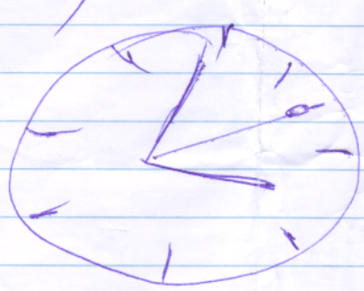
You let them win a few, feel comfortable, and in control, letting there guard down, thinking you are a ~~[illegible]~~ a punk, while you setting them up for a fall.

FOR OUR SITUATION

You remember when they wouldn't pass shit to me might, well now they think he is punk, which gets me what I want, and they feel like the "boss!"

If you fight them all the time they will always be looking at you, but if you never resist, when you do resist, they will be caught bye ~~a~~ suprise, never expected it, wouldn't even dream you were capble of such cruelty, hatred brains.

Calm, cool, but Collective.



Tic, Toc

Waiting Game

Patience

~~Study~~ Learn, Plan.
