* The Head Start/Early Head Start Program collects and analyzes data at three intervals each year – Fall, Winter and Spring checkpoints – to determine children’s progress across all areas of development throughout the program year. The survey of parents on service quality is completed in the Spring. The onset of the COVID-19 pandemic in mid-March 2020 interrupted that schedule of data collection. The program is subsequently unable to report child outcomes, gains, and service quality data for the program year 2019-2020.
