Youth Behavioral Health Services

INTERIM STATUS REPORT AND RECOMMENDATIONS

CHARGE TO INTERAGENCY BEHAVIORAL HEALTH YOUTH SERVICES WORKGROUP

- Increase the communication and effectiveness of interaction between youth and family serving agencies and services providers;
- Identify gaps in services in behavioral health system (substance abuse and mental health) for youth;
- Recommend possible solutions to address existing gaps in services;
- Prioritize service needs; and
- Improve the mental health delivery system for youth and families identified but not in intensive case management services already provided via the CSA – Systems of Care.

Short-term - Immediate Work

1. Identify existing needs
2. Outline resources and service capacity available to respond to needs, including those available through county agencies, the school system and providers in the community
3. Identify gaps and strategies to address gaps
4. Prioritize services and associated required resource allocation recommendations to address gaps
5. Develop recommendations for implementation of an Interagency Youth Services Management and Coordinating Team to manage resource requirements and outcomes

Long-term Work

1. Recommend options for a service delivery model using available resources to meet the needs of youth and families
2. Develop service protocols to ensure successful implementation of system-wide goals, outcomes and accountability measures for the following components:

On April 23, 2013, the Fairfax County Board of Supervisors provided guidance directing this study:

“Staff is directed to identify requirements to address youth behavioral human services requirements in schools and the broader community.

Work with the Fairfax County Public Schools (FCPS) and the nonprofit community (including the Partnership for Youth) to identify the array of youth services that are necessary to address the most pressing needs within the community.

The discussion will focus on work already underway as part of the collaboration between the County and FCPS to identify the appropriate prevention, early intervention and treatment services that are necessary to deal with behavioral health issues and to best leverage the current services provided within the schools as well as more broadly in the community.

A comprehensive recommendation will be provided to the Human Services Committee of the Board of Supervisors (to which the School Board will be invited) in fall 2013.

Funding of \$200,000 will be held in reserve until the Board approves the recommendations for its use.”

- a. Intake, assessment, triage, referral, transition across levels of care (handoff to CSA), lead case management assignment
- b. Review, develop, and implement a uniform set of requirements in cross system treatment planning tool.
- c. Review, develop, and determine how to track system performance measures and outcomes

Establish formal agreements that clearly identify roles, responsibilities and service flow between participating county agencies, the school system and partnering entities.

This report provides information and recommendations on work identified as “short term” for purposes of initial implementation on actions to coordinate joint human services and public schools activities that may be addressed within existing resources and can be implemented during FY 14 or requested for resources in FY 15 budget process.

SERVICES AVAILABLE – INVENTORY

County and Schools staff from youth and child serving programs met from May 9th through July 25, 2013 to review existing services and behavioral health needs of youth and families in their respective programs. The following organizations participated in gathering information regarding internal services provided directly or contracted in support of behavioral health services to youth:

- Fairfax County Public Schools
- Fairfax Juvenile and Domestic Relations District Court
- Department of Family Services
- Fairfax County Health Department
- Department of Neighborhood and Community Services
- Office for Women & Domestic and Sexual Violence Services
- Fairfax-Falls Church Community Services Board

Interagency/disciplinary services

- Comprehensive Services for At Risk Youth (CSA)

Community Based Coalition

- Fairfax Partnership for Youth

Each organization assessed their programs and provided information regarding:

Services Inventory – Youth and Families

- ◆ **Description of the population, eligibility and priorities**
- ◆ **Programs and services offered**
- ◆ **Experience of someone coming into the service system**
- ◆ **Description of services and levels of intensity within the service continuum**
- ◆ **Partners for each service area**
- ◆ **Exit/discharge from services and transitions**
- ◆ **Gaps in the present system/who is least likely to get service (now and in future based on current climate and direction)**
- ◆ **What works well / what are key outcomes?**
- ◆ **Recommendations for changes**
- ◆ **Current trends in the field locally and nationally**

RESOURCES AVAILABLE – YOUTH SERVICES INVENTORY SUMMARY

This chart provides a brief summary of program descriptions provided by county and schools staff in presentations provided to the Work Group in April-July 2013. Copies of detailed submissions are available at <http://fairfaxnet.fairfaxcounty.gov/Dept/DAHS/Pages/default.aspx>.

Program Description of County funded/supported services

Behavioral Health Services Inventory - Behavioral Health Capacity in Fairfax County Public Schools and Fairfax County Government Across the Continuum of Supports - Mental Health and Substance Abuse Services						
Services	Population Served	Description of Service (describe catchment/population)	Tools/Evidence-Based Practice & Method of Treatment	Information (referrals, web sites, etc.)	Resources - Staffing/Budget	Assessment of service (need more, need to evaluate/redesign/ measures of effectiveness available)
<i>Fairfax Falls Church Community Services Board</i>						
Prevention (and intervention) Services		Youth with early signs behavioral health concerns. Goal to prevent many of the long-term effects on a person's physical and mental health, social relationships, educational progress, financial stability, and employment.	Screening, brief counseling or education, skill building programs, and/or programming for people experiencing early signs of problems.		FY2014 Adopted: \$1,964,724 16.0 SYE (10 vacant as of Sept. 2013)	Cost-benefit ratios for early treatment and prevention for addictions and mental illness programs range from 1:2 to 1:10. \$1 in investment yields \$2 to \$10 savings in health costs, criminal and juvenile justice costs, educational costs, lost productivity, and other costs.

Behavioral Health Services Inventory - Behavioral Health Capacity in Fairfax County Public Schools and Fairfax County Government Across the Continuum of Supports - <i>Mental Health and Substance Abuse Services</i>						
Services	Population Served	Description of Service (describe catchment/population)	Tools/Evidence-Based Practice & Method of Treatment	Information (referrals, web sites, etc.)	Resources - Staffing/Budget	Assessment of service (need more, need to evaluate/redesign/ measures of effectiveness available)
Assessment and evaluation services	Juvenile Forensics Youth ages 12-17 Incarcerated/in detention or in community and referred by JDRC for treatment planning. Emergency Evals:13 Full psychological assessments: 25. Special Requests by Judges: 25 Interagency Screening (state mandated) 77 ADS full evaluation: 19 Court written consultations: 21 Diversion Screening:80 Trauma Evaluations:8	Assessment/evaluation -Mental Health assessments and screenings -Competency evaluations; -Sanity at the time of offense -Full psychological evaluations. Treatment Co-occurring treatment services to youth sentenced to the JDC BETA program Crisis intervention services to youth sentenced to Juvenile Detention general population	Licensed and standardized psychological testing instruments for depression, anxiety, thought disorders. TF CBT; Motivational interviewing; Stages of Change; CAMS suicide intervention; Psychiatric evaluation and treatment		13 SYE (6 vacancies as of Sept. 2013)	Treatment services greatly reduced in BETA and JDC. Cost shifting to the JDRC for psychological evaluations.

		CHCN provides limited behavioral health services and an on-site mental health therapist is available.				

Existing Resources and Service Capacity for Youth Behavioral Health Services

Public Schools

- Wellness/prevention services
- Suicide and Risk Assessment
- Mental health services and treatment
 - Group and individual counseling –general population and target populations (alternative schools)
 - Crisis intervention and stabilization in school settings
 - Parent clinic and consultation
 - Referrals for community/public behavioral health treatment
 - Case management services for CSA enrolled youth
 - Psychological Evaluations

Community Services Board

- Wellness/prevention services
- Medicaid managed care eligibility determination (VICAP)
- Mental health and substance services and treatment
- Psychiatric evaluations
- Court ordered psychological evaluations
- Individual, group and family treatment (residential, outpatient , day treatment)
- Intensive Services Coordination
- Targeted Case Management focused and at risk youth
- Psych. Hospital Discharge Planning
- Emergency Services

Community Providers

- Private (insurance and families)
County funded –contract providers
- Contract oversight in CSA Program office (75 businesses; 80 private therapists)
 - Contract oversight for youth crisis care in CSB (1 provider)
 - Community provided (CCFP funded)

THE GAP ANALYSIS

Behavioral Needs for Youth in Fairfax County Identified by child serving agencies and partners in the Community - July 2013	
Topic/Category	Concerns/Issues
Access barriers to youth behavioral health care services	Perceived shortfall in overall number of qualified community-based mental health service providers to address chronic mental health needs of children and parents.
	Insufficient number of qualified mental health providers accepting insurance payment, especially for psychiatric or evidence-based treatment (example: Cognitive Behavior Therapy)
	Insufficient access to qualified Medicaid community-based service providers.
	Demand exceeds available public funding. Waitlists for mental health evaluation and treatment for youth in child serving system agencies, as well as families not assigned case managers.
	Barriers force system to “escalate” or allow crisis to occur to gain access to mental health and/or substance abuse treatment services. Case management and intervention services are often not accessible to families until the youth’s behavior is presenting significant difficulties in multiple settings, presenting a risk of out of home care. <i>(Example: youth does not have diagnosed mental health condition and does not meet service criteria for mandated services in child protective, foster care, juvenile justice or school programs)</i>
	Lack of system definition of “crisis” that opens access to mandated funding/programming Youth’s parent must often navigate alone through the complex social service and behavioral health programming in Fairfax; the absence of a coordinated and streamlined cross FCPS and HS information and referral service, (including technology to allow for self-referral) results in delays in timely access to available resources and services.
Approaches to working with families are often based on operational needs of programs serving them (as noted in DDPET report) <i>Example: cost and resources devoted to evening and weekend services in community or homes.</i>	

	Inconsistent and incomplete information sharing with parents, particularly on insurance coverage, available providers, Medicaid providers, public providers, referral practices and eligibility information creates disparities in access to services. FCPS and HS training is offered on a program basis. The lack of a coordinated, cross system training curriculum that is resourced, consistently updated and routinely offered, results in lack of timely information developed, shared and utilized across both systems.
	Youth and families with few financial resources lack transportation, health insurance and other resources which are barriers to obtaining mental health/substance abuse treatment.
Improved Information and Referral strategies	FCPS Parent Resource Center – increased awareness needed to reach families in need of resources and information; need for coordination across HS and awareness of information; need more materials and training on mental health and substance abuse resources and information
Access barriers to youth behavioral health care for specific populations	Young adult/teen patients with postpartum depression -identification and access concerns as fees for services are perceived as a barrier. No systematic screening by private healthcare providers for referrals to Healthy Families Fairfax. Young mother and family support groups are primarily offered only in English; Spanish services are most often needed but unavailable.
	Limited availability of specific mental health and substance abuse treatments for youth with developmental disabilities, including autism Limited availability of specific behavioral health treatment for children under age 5.
Care Coordination Gaps	Youth discharged from clinical settings are not provided with adequate supports or coordination for transition to participation in community based programs. Service gaps continue at high end of continuum for CSA and privately funded placements. Care coordination for families and youth with behavioral health needs is severely insufficient. Youth whose parents lack the skill/ability/support to successfully advocate for their children in youth service delivery systems (example: accessing CSA non mandated funding)

Care coordination standards and intensity levels	Need for cross systems standards and definitions for management of care coordination for youth and families. Staff indicate need for protocols to determine the “right” level of intervention and for how long, including standards for different levels of intensity/service settings, including outpatient, day programming, residential, hospitalized settings
Data	Identification of needs of all county youth in public schools and private/home schooled
Early intervention strategies	Need for coordinated FCPS/HS approach to the continuum of supportive services. Staff indicate that evidence-based models have not been consistently tested to allow for policy decision making on most appropriate county funding investment for most efficient/least cost/most effective services
Funding	Private pay, insurance, Medicaid – pressure to find full coverage for services is burdening system staff
Identification of youth needing services	Identification/screening/predisposition and risk indicators for mental health/substance abuse disorders
Parents	Voluntary parental engagement and compliance with service plans for their child(ren) Lack of family supports in treatment/service planning
Public policy issues – legislative requirements/needs	Advocacy for Medicaid expansion Advocacy for essential health benefits through insurance coverage Expansion of waiver services for adults with disabilities, including developmental and chronic/life-long behavioral health conditions. Children with disabilities age out of child serving systems, and limited or no services are available to provide assistance to them as adults.
Process Change	Use of social media to engage youth in need of services
Utilization Management Tools and Credentialing requirements	Need for consistent and system-wide standards for treatment and therapeutic services by type of behavior/condition for specific youth populations for public direct/contracted services; current standards are program specific and funding source driven
Service Gaps	
Prevention Services Gaps	Prevention services at all age levels Wait list/no services for families in need of Family Preservation program services

Treatment Service Gaps	Treatment services and supports in home and community settings for youth with developmental disabilities, including autism.
	Specialized therapeutic recreation programs focused on youth with severe behavioral and mental health needs and only serve ages 3-12.
	Transportation
	Clinical services with language and culture competencies; Services in languages other than English and Spanish; Language and cultural competency for clinical services, counseling, outreach services; Services for youth and families with limited English proficiency
	<p>Trauma counseling for victims of domestic violence:</p> <ul style="list-style-type: none"> • Counseling to incest survivors (in circumstances where care-giver is perpetrator) • Services for teen offenders of dating violence and/or family violence • Services for children affected by domestic violence whose non-offending parent is not accessing services • Services for children whose offending parent is in ADAPT program • Victims and perpetrators of sibling bullying (minor children)
	Trauma informed services for children who have experienced abuse or neglect.
	Trauma informed treatment for youth exhibiting sexually reactive behaviors
	Increased capacity to serve students needing intensive school based services.
	Shortage of crisis shelter beds
Ongoing Services and Supports	Teen support groups
	Consumer-based parent-teen group program
	Family therapy (parents & children together)
	Group based parenting programs for parents of adolescents
	Parenting education programs for parents of children with conduct disorder and other special needs.
Staff Training	Need for improved cross system FCPS and HS communications regarding procedure changes resulting from budgetary requirements or policy directives.
	Need for comprehensive training curriculum identifying roles, responsibilities and therapeutic

	standards of care for child and youth behavioral health services for all FCPS and HS child serving staff.
	Referrals, coordination and training re: inclusion in teen and community centers
	System-wide process and procedures training for Temporary Detention Orders for youth in need of emergency involuntary inpatient hospitalization
	System-wide understanding and training on protocols for emergency mental health response from Mobile Crisis, written procedures , dissemination and training
Provider Outreach	Communications and training - to market programs to the community and service providers
Policy Clarifications on Service Prioritization	Clear , written policies and training on prioritization to access emergency mental health services for school involved youth in crisis
	Protocols for wait lists for the following populations: <ul style="list-style-type: none"> -Eligible CSA funding due to insufficient “non-mandated” funding -Youth waiting to access mental health and substance abuse treatment -Behavioral health services to teens living in shelter – and no follow-up services
	Service continuation gap/continuation and hand off for ongoing behavioral health treatment/support services for families when eligibility for CSA is completed (mandated populations) <ul style="list-style-type: none"> -outpatient services -residential/group living supports for children with SED, aging out of foster care and in need of adult supportive housing. Estimated 400-500 youth in need of additional “mid-level” services.
Transition/safe after care	Resources in “high need/intensive” programs are time limited and do not follow client upon program completion – youth age out or return to community with limited support at “mid-tier” service level.
	Youth transitioning into adulthood without community supports

RECOMMENDATIONS

1. Implement system changes to improve information sharing, best practices, collaboration, and accountability of the system
2. Continue implementation of a “Systems of Care” approach – connect the continuum - Across County, School, and Community supports and services
3. Develop and implement CSB Youth Services Division Resource Plan
4. Review needs of youth served in multi-agency and co-located sites, including educational and treatment settings, with goal to best leverage supportive services, treatment and educational services to meet youth needs
5. Expand the scope of the mental health promotion/wellness priorities within the Prevention Fund
6. Improve access to behavioral health care for families with insurance and Medicaid
7. Review policies on use of CSA non-mandated funding

System changes/improvements

Recommendation 1: Implement system changes to improve information sharing, best practices, collaboration, and accountability of the system

- **Develop shared training on key behavioral health needs for mental health and substance abuse services and identification:**
 - Expand trauma informed training to all staff to ensure appropriate service/treatment practices
 - Develop a cross HS and FCPS training curriculum and implementation plan that is annually updated, with goal of bringing existing training programs to scale for school and county social workers, counselors, treatment and referring staff.
- **Revise system-wide management and oversight practices to improve accountability and performance**
 - Develop agency specific performance dashboards and incorporate in the Human Services systems accountability framework currently under development.
 - Create joint action plans that integrate funding, workforce, strategies and outcome measurement for prevention and early intervention initiatives and services.

Discussion

Core training is needed across the youth and child serving agencies. Train all HS and FCPS staff performing “system navigation” tasks and provide common orientation for core knowledge areas:

Level I Core Knowledge Areas—

- Bullying prevention, protocols for referrals for perpetrators and victims
- Depression awareness/suicide prevention (level II intervention gap)

Level II Core Knowledge Areas -

- Threat assessment

- Suicidality assessment
- Crisis response (school, community, cluster response) – prepare crisis certification program
- Trauma response – expand capacity for strength based Post traumatic stress response (see FCPS model program/evaluate/implement county wide) (REF: William Steele/TLC/Achenbach tool)

Recommendation 2: Continue Implementation of a “Systems of Care” approach -Across County, FCPS, and Community supports and services

- Interagency Youth Behavioral Health Work Group to complete phase II tasks in Work Group charter by spring 2014.
- Inventory existing resources within the FCPS and HS service delivery structure to better serve the needs of youth and families needing more intensive services approach beyond a single agency response, and less intensive services/supports than those offered to high risk/need youth. Expand inter-agency work group to include additional community provider representation.
- Create a working model that clearly defines the County’s “system of care” and that pulls together services and resources within mental health, education, child welfare, juvenile justice, and other agencies to maximize access to services for children and their families.
- Review options for service delivery models using available resources to meet needs of youth and families.
- Develop protocols to ensure effective cross system coordination of services
 - Intake, assessment, triage, referral, transition across levels of care (handoff to CSA), lead case management assignment
 - Review, develop, and implement a uniform set of requirements in cross system treatment planning tool
 - Review, develop, and determine how to track system performance measures and outcomes
 - Establish formal agreements that clearly identify roles, responsibilities and service flow between participating county agencies, the school system and partnering entities
- Utilize \$200,000 set aside in FY 2014 for direct services to begin in spring 2014
 - Monitor CSB’s personnel vacancies and expenses monthly and fill positions using CSB appropriated funds before accessing \$200K set aside

- Establish a Systems of Care fund to implement model
 - Consider establishing a locally administered fund to enhance access to services for “mid-tier” youth – initial \$1.0 million recommended
 - Bring model to system-wide implementation
 - Create Systems implementation oversight (through combination of redirected resources and savings)
 - Policy and operations procedures on providing care coordination and mental health/substance abuse services through combination of community providers, FCPS and HS program resources
- Present final Interagency Behavioral Health Work Group recommendations to SCYPT, School Board and Board of Supervisors by May 2014

Discussion

Significant services gap exists for youth with needs that can be categorized as between level II and level III services:

- Needs multi agency response
- Childs need not being met
- All other resources are exhausted
- Continue to exhibit symptoms
- Sex abuse history or trauma in past
- Multiple environmental and family concerns
- Access to health care limited due to family income or lack of available providers

A “Systems Care coordination” protocol is needed to address this gap. Youth in need of coordination include those involved with multiple agencies, however often the youth and family is not appropriate for CSA referring agencies to initiate a case management and care coordination function. In its work, the work group would work to:

- Determine estimated level of need (numbers of youth and families)
- Establish description of service
- Identify specialists within the human services and public school systems to develop assessment and service delivery protocols.
- Identify community partners funded through County funds, including CSA, which could develop purchased services program model for delivery of care.
- Utilize a team based planning approach
- Utilize CANS assessment for determining needs
- Utilize care coordination when one or more agencies are involved with the family

- Establish criteria for recruitment and therapeutic service capacity needed and incorporate support services for families in languages other than English.

Determining level of need

In analyzing the three most FCPS ED intensive programs, approximately 250 youth are enrolled in Fall 2013. Approximately an additional 250 youth are enrolled in private day or residential programs. Many of these individuals are receiving services funded through the CSA program funds at the highest need level.

Many children have the ability to recover and function at higher levels with proper support. For this reason, when we try to describe how many kids are in need of specific services, the service providers struggle, as most kids move between levels, spending short times (if they get appropriate services) at a higher level, stabilizing and return to better functioning, needing less support. The system needs to examine groups of youth served to determine the type of behaviors, frequencies, triggers requiring interventions and at what level and duration. A shared data system would allow identification and improved supportive services planning and delivery when a child becomes in need of funding and resources from multiple sources.

Recommendation 3: Develop and implement CSB Youth Services Division Resource Plan

- Work with the CSB Board and staff to address consistent criteria to ensure youth and families with the greatest need receive priority for timely and appropriate services. Outline expected service delivery staffing configuration.
- Identify expected population and service delivery design, incorporating expected outcomes and deliverables for Intensive clinical support in Public Day School and Day Treatment settings, Targeted Case Management, Outpatient services, Psychiatric evaluations, day treatment, emergency services, care coordination, treatment planning and support services
- Complete division redesign by June 2014
- Assume resources provided through County General Fund at current authorized position level as of September 2013
- Present subcommittee work with final recommendations to CSB Board and full interagency YBH work group by January 2014 with report to SCYPT in February 2014 (Subcommittee team Lead: CSB Deputy Director)

Programming Improvements

Recommendation 4: Review needs of youth served in multi-agency and co-located sites, including educational and treatment settings, with goal to best leverage supportive services, treatment and educational services to meet youth needs

- Focus review on targeted populations: juvenile diversion population, youth returning to community from corrections, youth in alternative education programs
- Present Subcommittee work with final recommendations to interagency work group and SCYPT by February 2014 (Subcommittee team Lead: JDRDC Director)

Focus on health promotion and wellness

Recommendation 5: Expand the scope of the mental health promotion/wellness priorities throughout the continuum of supports provided to youth and families

- Maintain a resource commitment to primary prevention activities that provide the best opportunities to prevent suicide and the risk factors that accompany it.
- Direct the re-established countywide prevention coordination unit to incorporate specific behavioral health promotion strategies within their broader prevention plan, and to review population-level data, identify service gaps and other needs, and coordinate approaches among various stakeholders on a regular and ongoing basis.

Recommendation 6: Improve access to behavioral health care for families with insurance and Medicaid

- Review and leverage existing capacity at the FCPS Family Resource Center to enhance information and education for families on mental health supports and services.
- Review capacity within health navigation and coordination services throughout the system on ways to develop “help line” and/or automated tools to provide current information and assistance.
- Determine appropriate mechanisms for sharing information to front line FCPS and HS workforce, with goal of assuring information provided is updated, current, and reflects information on specialty services.
- Goal is to improve quality and consistency of information and referral to community mental health and substance abuse services and educate consumers on available treatments funded by insurance.

Discussion

There is a need for a cross agency developed, centrally supported, administered and implemented coordinated systems approach to provision of information and referral resources for families and youth on available behavioral health and support services. Goal is to improve quality and consistency of information and referral to community mental health and substance abuse services and educate consumers on available treatments funded by insurance. Resources include: CSA provider directory, human services resource guide, NVRC guide, CrisisLink, DNCS Coordinated Services Planning (222-0880 line), FCPS Family Resource Center, FCPS alternative school guide, private provider directories in community/trade associations, insurance company panels, Medicaid/Medallion and federal marketplace providers. The group will incorporate family support networks and services.

Leverage Funding

Recommendation 7: Review policies on use of CSA non-mandated funding

- Director the CSA Management Team to investigate options for revenue maximization of CSA funding to address mid-tier youth and family populations identified in this report and efficiently access state/federal revenues.
- Report to full work group December 2013
- Present recommendations from Interagency Youth Behavioral Health Work Group to CPMT by January 2014

NEXT STEPS

- Incorporate initial feedback from SCYPT
- Present preliminary recommendations to Human Services Board of Supervisors Committee - October 1, 2013
- Request approval to proceed with use of \$200,000
- Establish detailed work plan on proposed recommendations with key deliverables and timeframes

Mental Health Screenings

CRAFFT - http://www.ceasar-boston.org/CRAFFT/pdf/CRAFFT_SA_English.pdf This is a link for a Self-Administered CRAFFT (adolescents complete themselves) and includes multiple languages. Follow-up supports are needed so that adults involved with a young person know the post-screen next steps - accessing resources and following through.

Patient Health Questionnaire - [http://www.integration.samhsa.gov/images/res/8.3.4%20Patient%20Health%20Questionnaire%20\(PHQ-9\)%20Adolescents.pdf](http://www.integration.samhsa.gov/images/res/8.3.4%20Patient%20Health%20Questionnaire%20(PHQ-9)%20Adolescents.pdf), Adolescent depression screening tool (that can be self-administered).

Substance Abuse Screenings [Alcohol Use Disorders Identification Test –](#)

http://www.integration.samhsa.gov/AUDIT_screener_for_alcohol.pdf)- A 10-item questionnaire that screens for hazardous or harmful alcohol consumption. Developed by the World Health Organization (WHO), the test correctly classifies 95% of people into either alcoholics or non-alcoholics. The AUDIT is particularly suitable for use in primary care settings and has been used with a variety of populations and cultural groups. It should be administered by a health professional or paraprofessional.

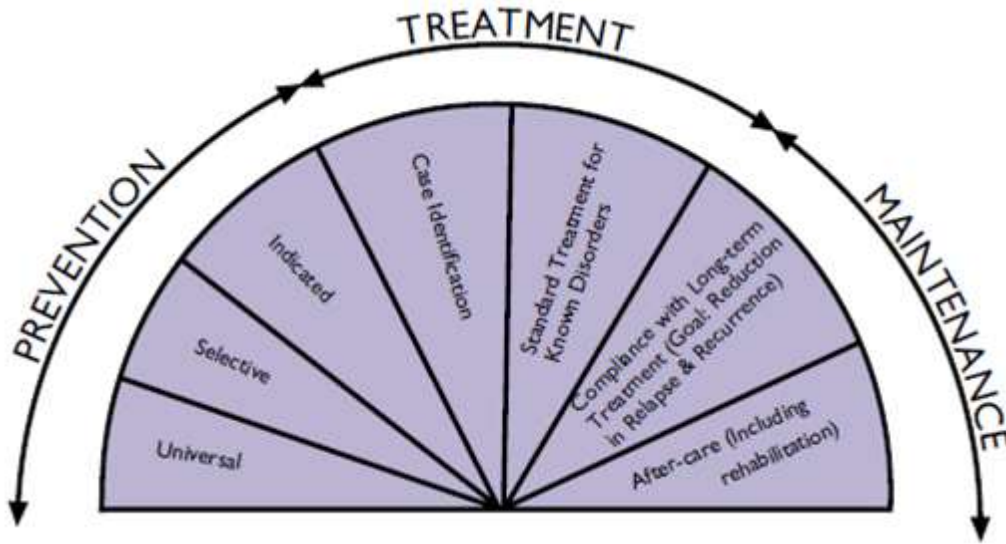

CAGE - <http://www.integration.samhsa.gov/images/res/CAGEAID.pdf>. The CAGE is a commonly used, 5- question tool used to screen for drug and alcohol use. The CAGE Assessment is a quick questionnaire to help determine if an alcohol assessment is needed. If a person answers yes to two or more questions, a complete assessment is advised

Behavioral health screening tools appropriate to primary care settings

SBIRT - <http://www.suicidology.org/stats-and-tools/suicide-warning-signs>),

<http://www.cars-rp.org/publications/Prevention%20Tactics/PT8.13.06.pdf>

In 1994, the Institute of Medicine commissioned an investigation on Mental Health Interventions that resulted in the development of the IOM Model summarized in the IOM “protractor.” Levels of prevention are: universal (all populations), selective (e.g. populations with high risk factors), and indicated (**individuals with an indication of a problem such as early substance use**). Early intervention is appropriate for “indicated.”

Continuum of Supports using **Positive Behavioral Interventions and Supports (PBIS)**
