Why Recycle?

Recycling and sustainability measures helps promote your building as environmentally friendly.

You can:

- Boost your corporate image
- Attract quality tenants to your properties
- Positively engage employees

Conserve Resources

Reuse and recycling conserves natural resources including trees, metals, and water.

Reduce Greenhouse Gas Emissions

Waste prevention and recycling offer significant potential for reducing greenhouse gas emissions.

Save Money

Increasing recycling may cut your disposal costs and improve your bottom line.

It's the Law!

Fairfax County requires businesses, regardless of size or type, to recycle.

Why is Recycling Required?

Fairfax County moves more than one million tons of material through our solid waste system every year. Recycling and waste reduction efforts are major components of managing our municipal waste stream. In addition, recycling helps reduce air and water pollution for Fairfax County's 1.2 million residents.
