

# CARE AFTER YOU WEAR

## COVID-19 PPE DISPOSAL

To stay healthy, we still need to wear a mask and gloves. But it is important to dispose of them properly.

Find a nearby trash can and remove your gloves first by pulling them up from the opening and turning them inside out.

Throw the used gloves into the trash and then remove your mask. Try not to touch your face.

Wash your hands for 20 seconds with soap and water. Or, use hand sanitizer containing at least 60% alcohol.

We wear a mask because we care - keep up the good work!

What starts as litter on our streets and in our parking lots could eventually end up in our waterways - and our drinking water.

***Only rain down the drain!***

Let's work together to stay safe and keep our community clean.
