

Hazardous Waste

Electronics

Rechargeable Batteries

Fluorecents

If you own a business you probably generate some toxic materials. State and federal environmental regulations require that you identify hazardous waste generated by your business and dispose of it properly.

- Recycle electronic equipment like computers, televisions, and printers through an accredited recycler.
- Fluorescent bulbs and tubes contain a small amount of mercury and must be handled with care. To learn more about how to recycle visit the EPA's CFL page: <http://www2.epa.gov/cfl>
- Visit: www.Call2Recycle.org to learn how to recycle rechargeable batteries.
- Visit: www.knowtoxics.com to learn how to handle hazardous waste.

Very Small Quantity Generators (VSQG)

Businesses that generate small quantities of hazardous waste may qualify as a Very Small Quantity Generator (VSQG). The VSQG program provides a legal and affordable solution to hazardous waste disposal.

Please visit www.fairfaxcounty.gov/publicworks/recycling-trash/conditionally-exempt-small-quantity-generators or call 703.324.5230 for more information on this program.
