

Sull-E Newsletter

A message from Kathy Smith

The sun is out and it is BBQ season. The time is ripe to get together with extended family, reach out to old friends, and enjoy the summer. Fortunately, this week in Sully District we have a number of opportunities to do just that. In this week's newsletter, you will read about Sully's 44th Annual Antique Car Show, and opportunities to fish in our E.C. Lawrence Park with family.

Critical this week, is going out to vote in this Tuesday's primary elections. I encourage you to get engaged in our political process, and go to the polls on June 13 -- maybe even take a few friends. I will be enjoying some time with my family this weekend, and I hope you will too!

Sincerely,

Kathy

Keep Pets Cool

Fairfax County Animal Control Officers respond to dozens of reports of animals locked in hot cars in parking lots each summer and urge pet owners to keep pets at home on hot days. Pet owners are urged to remember the following tips:

- Never leave pets in a parked car. On a warm day, temperatures can rapidly rise to dangerous levels. If you see an animal in distress in a parked car, contact police. Even with the windows slightly open, the temperature in a car on a 93-degree day can soar to 125 degrees in just 20 minutes and approximately 140 degrees in 40 minutes.
 - Shade and water are vital to pets. Pet owners must provide adequate shelter protecting animals from injury, rain, sleet, snow, hail, direct sunlight, and adverse effects of heat or cold. A dog house in the backyard with no access to shade does not protect animals from sun.
 - Limit exercise on hot days. Take care to adjust intensity and duration of exercise. Watch for shortness of breath and remember that asphalt gets very hot and can burn paws; walk your dog on the grass if possible.
 - If your pet shows any of the following signs contact your veterinarian immediately:
 - heavy panting
 - glazed eyes
 - rapid heartbeat
 - vomiting
 - fever
 - dizziness
 - restlessness
 - excessive thirst
 - profuse salivation
 - Take steps to reduce the animal's body temperature; apply ice packs or cold towels to the head, neck and chest, provide water and ice cubes for hydration, and move the animal into the shade or air-conditioning.
-

Fishing in the Parks

Fishing can be intense and competitive or calming and contemplative.

You can capture fishing moments in Fairfax County, because fishing is legal in Park Authority waters unless posted signs say otherwise. A valid Virginia fishing license is required for people 16 years and older, and Virginia fishing regulations apply.

[Ellanor C. Lawrence Park](#): Walney Pond has sunfish, bass and catfish. Access is easy. The one-acre pond is probably a better place to take children rather than a destination for advanced anglers or those looking for a fresh dinner.

Are they safe to eat?

PCBs are a health concern in some county waters. There are restrictions on eating eel, catfish, carp, bass, bullhead, perch, and sunfish in the Potomac River basin. Conditions and health advisories can change. The Virginia Department of Health issues fish consumption advisories. [Visit that agency's](#)

[website](#) with advisories for Fairfax County waters.

Tips for Beginners:

Generally in winter and summer, fish are in deeper water. In spring and fall they might be in shallower parts of a lake. In lakes, deeper water is usually at the dam end and shallower water is uplake. On a big lake, pick one creek or cove and think of it as a small lake, deeper at one end. Pick a spot to start based on where fish should be at that time of year.

Next, look for something different. Imagine you're walking on a street that has only one building, and inside is a restaurant. Where would you find people? In that restaurant, because it has food and shelter.

Fishing is like that. In your cove, look around. What's different? Look for a stump, a fallen tree, a beaver dam, grass, a point of land, a dock piling, or an edge where grass gives way to rocks. What if there are lots of fallen trees? Well, which one is biggest? Which one is closest to the creek channels that fish use as highways? Think about what the fish see, and keep asking what stands out as different. That's where the fish are often found.

Water depth is critical to catching fish. If you catch one, throw your lure or bait back to that same depth. A bobber can help. Start with your bait a couple feet deep. If you get no bites, set your bait a foot or two deeper. Keep changing depth until you start catching fish, and then keep your bait at that depth.
