## Excessive Heat Watch Friday, Saturday, and Sunday

The National Weather Service has issued three separate Excessive Heat Watches for Friday, Saturday, and Sunday. All three begin in the morning each day and expire in the evening.

An Excessive Heat Watch means that a prolonged period of dangerously high temperatures is possible. You should prepare for extreme temperatures and high humidity.

Heat index values could potentially rise to 110 to 115 degrees each day with temperatures in the middle 90s to around 100 degrees and dewpoints in the lower to middle 70s.

### Heat Safety Tips:

- Never leave a child or pet alone in a car.
- Find places with air conditioning to take a break from the heat.
- If you are outside, find shade. Wear a hat wide enough to protect your face.
- Wear loose, lightweight, light-colored clothing.
- Drink plenty of fluids to stay hydrated.

- Do not use electric fans when the temperature outside is more than 95 degrees. Fans create air flow, but do not reduce body temperature.
- Avoid high-energy activities.
- Check yourself, family members, and neighbors for signs of heat-related illness.

### **Fairfax County Cooling Centers:**

- [Libraries](#)
- [Community Centers](#)
- Fairfax County Government Center (12000 Government Center Parkway, Fairfax, VA 22035)

Please check the operating hours to ensure the facility is open before arriving. Remember - **resting for just two hours in air conditioning can significantly reduce heat-related illnesses.**
