Watching Over the Numbers: Internal Accounting Controls & Accountability

Friday, March 21
9:00 AM – 12:30 PM
Conference Center, Rooms 4/5
12000 Government Center Pkwy.
Fairfax, VA 22035

It's all about the mission and passion but you cannot afford to lose sight of Safe-Guarding your assets. We will first take an in depth look at internal accounting controls and why they are so very important to protecting your organization's assets. We will then explore internal controls from a real life perspective by looking at the "Top Ten Common Internal Control Problem Areas". The participants will be divided into 10 working groups and they will explore together how to identify areas of weakness and work to design controls to protect those areas. We will finish with exploring financial accountability from three perspectives; financial accountability to the general public, to board of directors and leadership and from staff and management. Three check lists will be provided to help assist you with improving your financial accountability and understanding your critical role in this oversight process.

Faculty: Michael Gellman, CPA- Rubino & McGeehin, Chartered CPA's and Consultants
