**Compiled From The Files Of
The Urban Development Information System**

**Prepared By:
The Office of Research and Statistics
County of Fairfax, Virginia**

FAIRFAX COUNTY, VIRGINIA

MEMORANDUM

TO: RECIPIENTS OF STANDARD REPORTS

DATE: OCTOBER 24, 1973

FROM: SAMUEL A. FINZ, DIRECTOR
OFFICE OF RESEARCH & STATISTICS

FILE NO:

SUBJECT: STANDARD REPORTS

REFERENCE:

The Office of Research and Statistics, in August, 1973, began publishing Standard Reports on housing, population, land use, and construction activity. Those reports have been distributed widely and apparently are used frequently by both County agencies and the general public.

The present volume contains reprints of all previously-published Standard Reports. This edition involves no changes to information included in the earlier reports. Minor revisions in format and footnotes, however, have been made to improve the clarity and utility of the reports. For these reasons, all Standard Reports received previous to this printing should be destroyed.

All future standard reports prepared by ORS will be distributed and should be added to this new loose-leaf portfolio. We do not foresee any additional changes in format or footnotes. Therefore, all future copies can be added directly to the portfolio without any further confusion. Instructions for future Standard Reports will be submitted with each distribution.

Additional copies of the Standard Reports, together with revisions and new reports as they are issued, are available at cost through the Administrative Services Division, 5th Floor, 4100 Chain Bridge Road, Fairfax, Virginia 22030.

SAF/WBR/lb

FOREWORD

This volume contains a variety of inventory reports regarding housing, population, and land uses in Fairfax County, Virginia. The reports are called Standard Reports because their contents are of continuing general interest and can serve as reference sources for most agencies and persons interested in Fairfax County. For this reason these Standard Reports will be updated from time to time as new information becomes available. In addition, a number of other Standard Reports will be produced in future months to supplement and to expand on the reports included in this initial set of compilations.

The reports are numbered so as to identify both a general subject area and also a specific report number. Thus, DU-5 identifies Dwelling Unit Report #5, P-2 refers to Population Report #2, and L-3 identifies Land Use Report #3.

This series of reports should be kept in a loose leaf binder with dividers to separate the various subject areas. As additional reports become available through the Office of Research and Statistics, they can simply be inserted into the loose leaf binder. As updated reports are received, the superseded report can be removed from the binder and replaced by the updated version.

Periodic memorandums from the Office of Research and Statistics will accompany new reports and will identify which reports are currently effective and which ones are superseded. In addition these memorandums will comment as necessary on the following subjects:

- Qualification and assumptions regarding the Standard Reports
- Analysis of individual reports
- How to obtain assistance in using Standard Reports
- How to obtain additional or more specific information through the Office of Research and Statistics.

Additional copies of the Standard Reports, together with revisions and newly-issued reports, are available at cost at the following location.

Fairfax County Administrative Services Office

SECTION I
SUMMARY SECTION

CURRENT HOUSING INVENTORY
Fairfax County, Virginia
Brief Summary

8/1/73

There are 159,592 dwelling units in Fairfax County, an increase of 28,775 units or 22% during the three years and four months since the 1970 Census. Thus, the average annual increase in the housing inventory has been 6.6% per year in the 1970's, although by far the greatest part of this increase has occurred in 1972 and 1973.

Of total dwelling units, 113,997 (71%) are ownership units * and 45,595 (29%) are rental units. The large majority of the ownership units, 99,260, are single family detached. A total of 41,599, or 91% of the rental units, are found in rental high-rise or garden apartment projects. Rental townhouse projects and mobile home pads account for the remainder.

Centreville, the largest Magisterial District, in terms of both dwelling units and population, has 25,385 units or 16% of the total county housing inventory. Centreville also has the greatest number of ownership units (19,823), while Mason has the greatest share of rental units (10,012).

The median price in Fairfax County's ownership housing inventory is about \$53,000. Thus, 50% of the homes cost less than \$53,000 and 50% cost more. Only 7.7% of all ownership units are under \$30,000. Three percent, or 3,374 units, on the other hand have a market value greater than \$100,000.

Reports DU-1 through DU-5 provide a profile of Fairfax County's housing inventory in far greater detail.

* Ownership units include condominiums and all other individually-owned units.

CONSTRUCTION ACTIVITY
Fairfax County, Virginia
Brief Summary

8/1/73

At least 103,303 proposed dwelling units were at various stages in the development process as identified in a compilation of construction plans and ongoing building activity completed on April 1, 1973. Completion of these units would increase the County housing inventory by 66%.

The proposed new dwelling units, as of the first quarter of 1973, fell into the following stages of completion:

| <u>Stage of Completion</u> | <u>Number of Units</u> | <u>Percent of Proposed Units</u> |
|---|------------------------|----------------------------------|
| Under Construction | 14,380 | 14% |
| Outstanding Building Permits, Not Started | 7,414 | 7% |
| Plans Approved | 10,567 | 10% |
| Plans Under Review | 14,105 | 14% |
| Rezoned Recently | 8,124 | 8% |
| Rezoning: Likely | 1,687 | 2% |
| Rezoning: Likelihood Unknown | 10,424 | 10% |
| Rezoning: Unlikely | 28,875 | 28% |
| Rezoning: Recently Denied or Withdrawn | 7,697 | 7% |
| | <u>103,303</u> | <u>100%</u> |

Of the total construction activity, 21,794 units (21%) represents Committed Growth since building permits and sewer taps, where applicable, already have been issued. This component of future county growth will be unaffected by the current sewer moratoria.

The compilation of proposed construction activity confirms the continuing trend toward more townhouse and multi-family housing in Fairfax County. While 62% of the existing housing inventory is single family detached, only 25% of the proposed housing is of this type.

Reports CA-1 through CA-10 summarize construction plans in fairly great detail. The indicated completion dates are based on market factors and on typical construction lead times. The dates, generally, do not take into account the effect of the sewer moratoria.

The construction activity reports generally are compiled according to three basic structural housing types: single-family, townhouse, and apartment. The first category refers to single-family detached housing. The townhouse category covers townhouses and various multiplex structures. The apartment category includes garden apartment, low-rise, mid-rise, and high-rise units. The three structural types are not meant to suggest whether the form of tenure will be rental, condominium, or owner-occupied.

POPULATION
Fairfax County, Virginia
Brief Summary

8/1/73

Fairfax County's population as of June 1, 1973, was estimated to be 547,650 as explained in Report P-3, page IV-3. The methodology for this estimate was to start with the 1970 Census population figure as reconciled by the Division of Planning for the Five-Year Plan and to add the estimated population increases due to newly-completed housing units.

In August, 1973, a second population estimate of 561,527 was derived using a different methodology. Rather than using the 1970 Census as a baseline, the estimate began with a total count of dwelling units in Fairfax County as recorded on the UDIS Parcel File. To this count of housing units, the County's standard household size contribution factors were applied according to type of dwelling unit. After the addition of group quarters population (which includes institutional population and persons living on military bases) the population came to 561,527 persons, a breakdown of which appears in Report P-1, page IV-1.

The difference of 13,877 persons in the two estimates is due to the following factors:

- Since the two estimates were made about two months apart, the latter estimate understandably is higher due to the continuing growth of the County.
- The use of average household sizes in converting dwelling unit count to population is an approximation. The fact that the population estimates derived solely through use of the contribution factors is higher than the estimate based on 1970 Census data suggests that the contribution factors presently in general use by Fairfax County are slightly high and need to be adjusted. (The Office of Research and Statistics has begun a review of these contribution factors.)
- In the latter (higher) population estimate, no adjustment has been made for vacant housing units or for built-and-unsold homes. For this reason it is more accurate to say that the latter figure describes "housing inventory holding capacity" at the average household size, rather than a literal count of population.

Centreville with 89,329 persons is by far the most populous Magisterial District.

By January 1, 1974, the estimated population will be 577,650, followed by an increase to 613,050 persons by January 1, 1975. (Report P-3, page IV-3)

At such time as all presently Committed and Anticipated growth has occurred, the County population will have climbed to over 691,500. It is highly likely that the 46,466 Committed and Anticipated new units could be absorbed during the next three to five years. However, the build-out time for many of the 24,672 planned units constituting Anticipated Growth could be significantly lengthened by the present sewer moratoria.

Reports P-1 through P-3 on pages IV-1 through IV-3 illustrate the population figures in more detail.

LAND USE
Fairfax County, Virginia
Brief Summary

8/1/73

Of Fairfax County's 257,000 acres (402 square miles), 241,000 acres are zoned predominantly in the categories shown in Report L-1 on page V-1. The remaining 16,000 acres are in roads, water, and other areas not zoned.

Fifty-four percent of the County's zoned land is RE-1 with the large predominance of this land (80%) located in Springfield and Centreville Magisterial Districts. Two-thirds of all land in Fairfax County is zoned RE-1, RE-1C, RE-2, RE-2C, or RA.

Population densities vary from 8.88 persons per acre in Mason District to 0.91 in Springfield. In Mason District 12% of the County population lives on 3% of the County land. The average density in Fairfax County is 2.33 persons per acre.

Ninety-three percent of the County's land is zoned predominantly residential. Less than 2% is Commercial and less than 2% Industrial. There are nearly 3,000 acres zoned "Public Lands," located mainly in Mount Vernon and Springfield Districts.

Report L-2, page V-2, illustrates that over 92,000 acres or 38% of all County land is vacant. Two-thirds of this vacant land is in Springfield and Centreville Magisterial Districts. In addition to vacant land, the County has a large amount of land which is substantially vacant but which is classified otherwise. Report L-2 does not include such "underdeveloped" lands.

Report L-3, page V-3, tabulates current land uses by Magisterial District. Presently, about 36% of all County land is devoted to single family housing. This nearly equals the 38% which is vacant. The Government Services category, which includes Fort Belvoir, is the next largest with nearly 13,500 acres comprising 5.6% of the County. Roughly the same amount (13,100 acres) is used as parkland.

| Source: | UDIS Parcel File, July, 1973 | | | | | | | | | | | | | |
| Notes: | 1 | Townhouse category includes townhouses, duplex, multiplex units, and all ownership housing types other than single-family detached and condominium apartment. | | | | | | | | | | | | |
| | 2 | Sales Price, in this report, refers to the estimated present market value. Market value for each dwelling units is derived from recent sales prices, if any, and from the most recent tax assessment. In order to estimate market value for all dwelling units as of July, 1973, the following "price increase factors" have been applied to the period between the time of sale or assessment and July, 1973. During calendar year: 1973 - 15% annual rate of price increase, 1972 - 12%, 1971 - 9%, and 1970 - 7%. | | | | | | | | | | | | |
| | 3 | Additional condominium garden and high-rise apartments presently in Fairfax County will appear in the "apartment" category in subsequent reports. | | | | | | | | | | | | |

Source: UDIS Residential Builder Plans File, April, 1973

- Notes:
- 1 See Appendix A for Method, Assumptions, and Limitations.
 - 2 Data as of March 15, 1973
 - 3 Anticipated Growth includes housing unit for which site plans or subdivision plats are under review (CL-6), or for which such plans have been approved (CL-7). Outstanding building permits are not included in Anticipated Growth.
 - 4 Data for Herndon area is incomplete.
 - 5 The indicated completion dates are estimates based on market factors and typical construction lead times. The dates in this report do not take into account the effect of sewer moratoria.
 - 6 Townhouse category includes townhouses, duplex, multiplex, and all ownership housing units other than single-family detached and condominium apartment.

- Notes:
- 1 See Appendix A for Method, Assumptions, and Limitations.
 - 2 Data as of March 15, 1973.
 - 3 Possible Growth derives from Rezoning Cases which are unlikely to pass (CL-2) and cases which have been recently denied or withdrawn.
 - 4 Data for Herndon area is incomplete.
 - 5 The indicated completion dates are estimates based on market factors and typical construction lead times. The dates do not take into account the effect of sever moratoria.
 - 6 Townhouse category includes townhouses, duplex, multiplex, and all ownership housing units other than single-family detached and condominium apartment.

Source: UDIS Residential Builder Plans File, April, 1973

- Notes: 1 See Appendix A for Method, Assumptions, and Limitations.
 2 Data as of January 1, 1973, except where noted as being more recent in Appendix A.
 3 All construction activity and builder plans (confidence levels 1 - 9)
 are included.
 4 Data for Herndon area is incomplete.
 5 The indicated completion dates are estimates based on market factors
 and typical construction lead times. The dates in this report do not
 take into account the effect of sewer moratoria.
 6 Townhouse category includes townhouses, duplex, multiplex, and all
 ownership housing units other than single-family detached and
 condominium apartment.

Source: UDIS Residential Builder Plans File, April, 1973

- Notes:
- 1 See Appendix A for Method, Assumptions, and Limitations.
 - 2 Data as of March 15, 1973.
 - 3 This report includes rezonings granted during 1972 and the first 2½ months of 1973.
 - 4 Data for Herndon area is incomplete.
 - 5 The indicated completion dates are estimates based on market factors and typical construction lead times. The dates in this report do not take into account the effect of sewer moratoria.
 - 6 Townhouse category includes townhouses, duplex, multiplex, and all ownership housing units other than single-family detached and condominium apartment.

Source: UDIS Residential Builder Plans File, April, 1973

Notes: 1 See Appendix A for Method, Assumptions, and Limitations.

2 Data as of January 1, 1973.

3 Committed Growth includes housing units under construction (CL-9) and housing units for which there are building permits outstanding, but no recorded starts (CL-8). Anticipated Growth includes housing units for which site plans or subdivision plots are under review (CL-6), or for which such plans have been approved (CL-7).

4 Data for Herndon area is incomplete.

Source: UDIS Parcel File, July, 1973

Notes: 1 Data on population in households derived from a housing unit count performed in July, 1973.
The following factors were used to convert housing units into estimated population:

| Type | Persons/DU |
|---------------------|------------|
| Single Family | 3.7 |
| Duplex | 3.7 |
| Townhouses | 3.5 |
| Mobile Homes | 2.9 |
| Garden Apartments | 3.0 |
| Elevator Apartments | 1.8 |

- 2 Includes the Town of Vienna.
 3 Includes the Town of Herndon.
 4 Includes the Town of Clifton.
 5 Excludes the cities of Fairfax and Falls Church.
 6 Based on 1970 Census figures except for Fort Belvoir and Lorton which are current figures.
 7 Includes the part of Fort Belvoir in Lee District.
 8 Includes Lorton and the part of Fort Belvoir in Springfield District.

REPORT P-3
POPULATION - FUTURE ESTIMATES
Fairfax County, Virginia

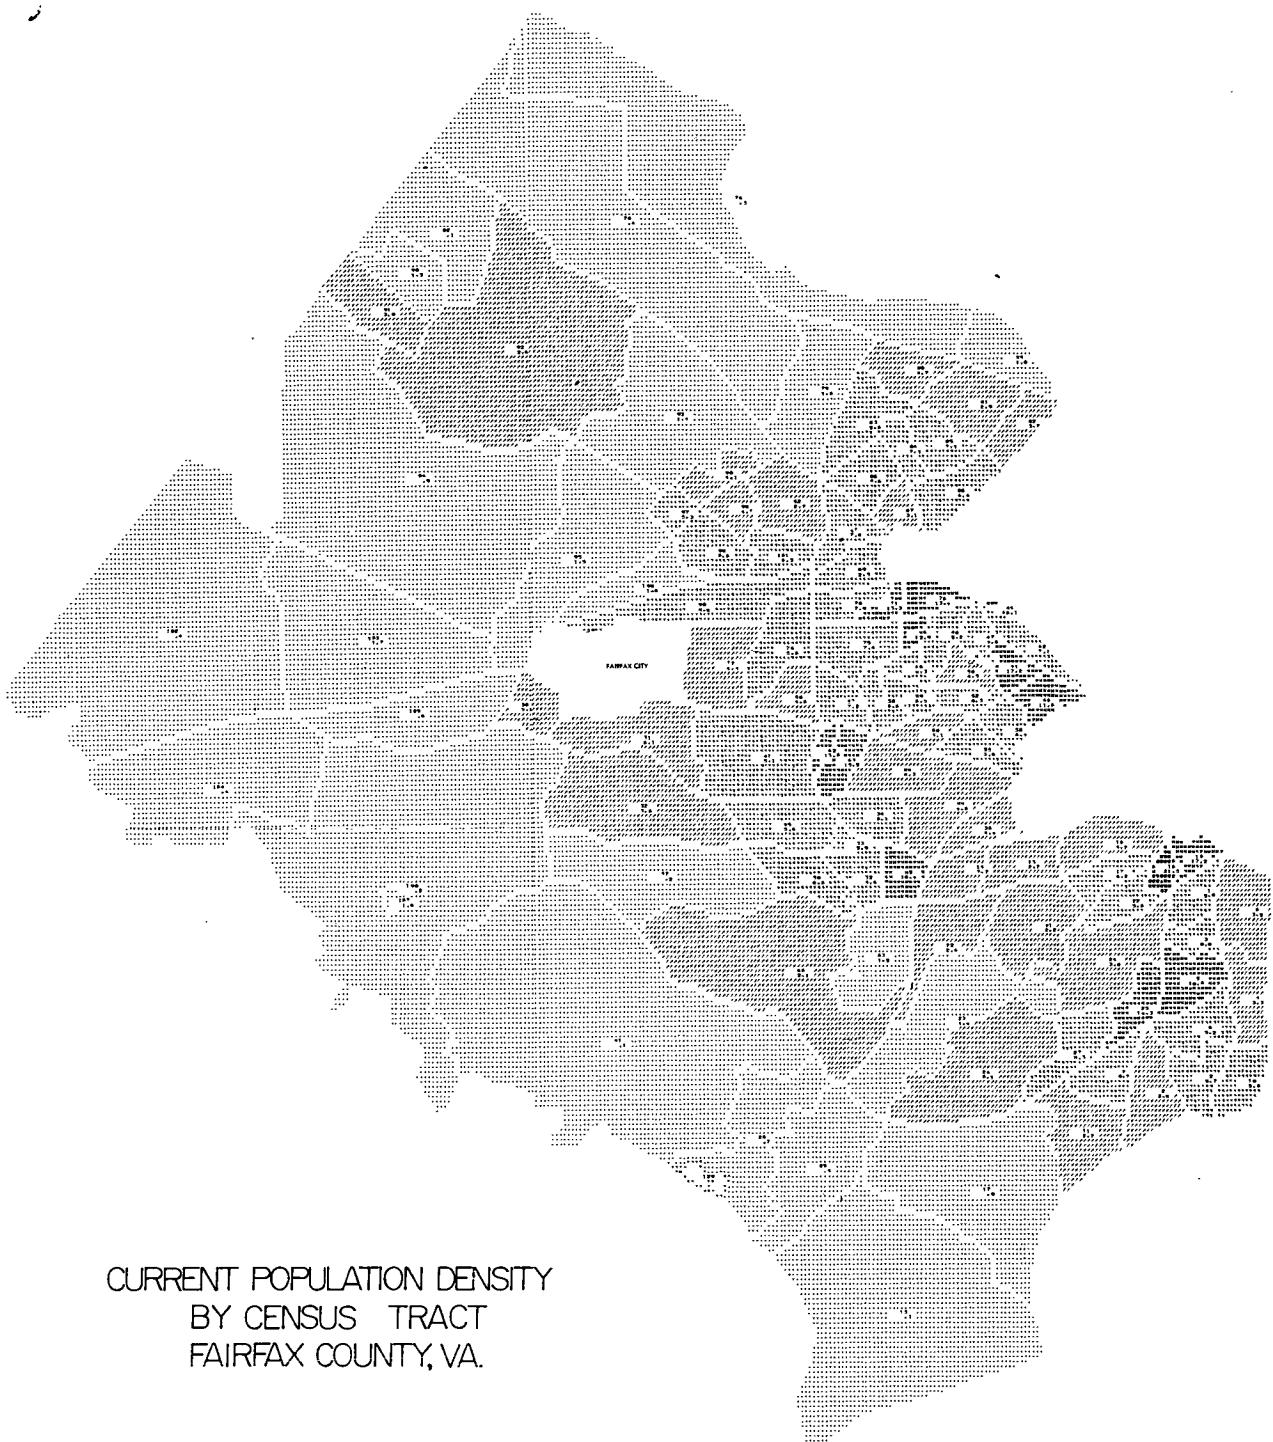

8/1/73

1. Population and housing estimates for Fairfax County appear in the following table:

| | <u>Jan. 1, 1973^a</u> | <u>June 1, 1973^b</u> | <u>Jan. 1, 1974</u> | <u>July 1, 1974</u> | <u>Jan. 1, 1975</u> |
|----------------|---------------------------------|---------------------------------|----------------------|----------------------|----------------------|
| Dwelling Units | 155,460 | 160,000 | 170,000 ^c | 177,000 ^e | 181,800 ^f |
| Population | 533,900 | 547,650 | 577,650 ^d | 598,650 ^d | 613,050 ^d |

2. These estimates are based primarily on the number of outstanding building permits. The figures reflect a fairly rapid build out of the more than 17,000 outstanding permits in a period of slightly more than one year. Thereafter, the monthly rate of completions will drop sharply.

- a Housing unit and population figures as reported by the Five Year Plan.
- b Figures reported in memo "Population and Housing Estimates by Magisterial District," dated June 1, 1973. The discrepancies between the June 1, 1973 figures reported in this table and the July, 1973 figures appearing in Reports DU- and P-1 are discussed on page I-3 of the Standard Reports.
- c Reflects estimated completion rate of 1,430 units per month during the period of June 1, 1973 through January 1, 1974.
- d Assumes an average household size of 3.0 for all new units.
- e Reflects estimated completion rate of 1,160 units per month during the period of January 1, 1974 through July 1, 1974.
- f Reflects estimated completion rate of 800 units per month during the latter half of calendar year of 1974.

APPENDICES

APPENDIX A

SUBJECT: UDIS RESIDENTIAL MONITOR SYSTEM: METHOD, ASSUMPTIONS, AND LIMITATIONS

General: The design of the "Bottom Up" Residential Monitor System is based on the assumption that existing county records, if correctly assembled and inter-related, can identify the extent, nature and location of residential construction activity over a five-year period with reasonable accuracy.

Method: The land development process in Fairfax County has been divided into nine identifiable check points. Each check point is associated with a specific county record. In addition the check points indicate progressively higher likelihoods that a given development plan will ultimately result in completed housing units. For this reason the nine check points constitute nine "confidence levels" and can be related to county growth policy alternatives in the following manner:

| <u>Check Point</u> | <u>Confidence Level</u> | <u>Growth Policy</u> |
|---|-------------------------|----------------------|
| • Under Construction | 9 | Committed Growth |
| • Building Permit issued but not under construction | 8 | Committed Growth |
| • Site Plan and/or Subdivision Plat Approved | 7 | Anticipated Growth* |
| • Site Plan and/or Subdivision Plat Submitted | 6 | Anticipated Growth |
| • Rezoning Granted | 5 | Probable Growth |
| • Rezoning Pending: Likely | 4 | Probable Growth |
| • Rezoning Pending: Uncertain | 3 | Probable Growth |
| • Rezoning Pending: Unlikely | 2 | Possible Growth |
| • Rezoning Denied or Withdrawn (Since June, 1972) | 1 | Possible Growth |

*Approved Subdivision Plats should be considered "Committed Growth" in large lot areas which can use septic tanks.

Files: Pertinent county records regarding the nine check points are compiled into the following files:

- Building Permit File (computer)
- Footings Inspection File (computer)
- Residential Use Permits File (computer)
- Rezoning Case File (computer)
- Builder Plans Monitor Cards (manual)

Printouts from the various computer files are posted manually to the Builder Plans Monitor Cards which subsequently are keypunched and used to create the Master Residential Builder Plans File (computer).

Reports: The Residential Builder Plans File can be used to produce reports in dozens of formats involving different combinations of geographic areas, confidence levels, and methods of tabulation. Initially the following reports were produced:

- Subdivision Summary of Construction Activity
- Sewershed Summary of Construction Activity
- Map Reference Number Summary of Construction Activity
- Subcensus Tract Summary of Construction Activity
- Elementary School Summary of Construction Activity
- Planning District Summary of Construction Activity
- Magisterial District Summary of Construction Activity
- Confidence Level Summary of Construction Activity
- Committed Growth/Anticipated Growth Summary of Construction Activity

Assumptions and Limitations: The monitoring process, for the sake of consistency, requires a careful statement of the assumptions made and the limitations connected with the data. The following items pertain to the monitoring compilation completed in March, 1973.

1. Time Period: The compilation or "Forecast" is effective as of January 1, 1973, although more current data in some cases was tabulated as shown below:

- Building Permits Information through February, 1973
- Inspection Data through December 31, 1972
- Site Plan and subdivision plat data through March 1, 1973
- Rezoning case data through March 1, 1973

2. Older Subdivisions: In cases of older subdivisions, with some remaining vacant lots, the compilations include only those older subdivisions for which some form of building or inspection activity was recorded since January 1, 1972.

3. Completion Dates, Start Dates, Permit Issue Dates:

- Completion dates are held to be synonymous with the issue date of Residential Use Permits (RUP). Where the recordation of RUP's lags, a similar delay will appear in the record of completions. Thus many housing units which were substantially completed in 1972 may not be recorded as completions until 1973. Prior to the advent of the RUP midway through 1972, the electrical inspection date was used as a completion date.
- Footing Inspection Dates are used as Start Dates. It is not necessary that the footings be approved in order to register a construction report.

- Building Permits are considered to be outstanding when the Permit Application is approved, rather than when the permit is actually transmitted to the builder.

4. Rate of Construction:

- The rate of construction in terms of housing units estimated to be completed in specified future years is based on the particular builder's record in previous projects or on an actual builder survey. In either case, the estimate considers also the check point or "confidence level" at which the project stands.
- If the analyst has no information upon which to make a judgement regarding the expected rate of construction, the balance of housing units yet to be built will appear in the "Future Years" column.

5. Confidence Level 7: CL-7's typically show the rate at which the particular builder would be likely to proceed in view of the market situation and his past performance if he is free from constraints such as a sewer hook-up moratorium. It should be noted that non-septic tank construction plans having a confidence level of 7 can be delayed by a sewer moratorium, but not by a rezoning moratorium.

6. Effect of Moratorium on Confidence Levels 8 and 9: In the event that the sewer moratorium continues and/or a rezoning moratorium is imposed, individual building schedules in the CL-8 and CL-9 levels could be effected in the following opposite manners:

- a) CL-8 and CL-9 construction would be accelerated by builders who wish to bring their operations in Fairfax County to a close in order to move to other areas, or to minimize the losses which they would suffer in continuing to operate at less than full speed.
- b) On the other hand, CL-8 and CL-9 construction would be slowed down by builders who decide to wait out the moratoriums. They would reduce their construction rate and work force, and concentrate on trying to hold together a viable nucleus organization to await what they consider to be better times.

7. Assignment of Confidence Levels to Rezoning Cases: Pending rezonings cases are rated according to their likelihood of passage in the judgement of several county staff members working together. When a rezoning case stands up well to sound planning criteria and the staff members' interpretation of current Board policy, the case is assigned a confidence level of 4 which means "Rezoning Likely". On the other hand, when a case is obviously not in accord with current Board policy or sound planning principles, the case is assigned a confidence level of 2, meaning "Rezoning Unlikely". When the staff

members feel unable to estimate the likelihood of rezoning, they assign a confidence level of 3, meaning "Rezoning Uncertain". Rezoning cases which have been withdrawn or denied within the past nine months carry a confidence level of 1. The theory is that these areas are still actively under consideration for development. A rezoning case assumes a confidence level of 5 when it is granted.

(October, 1973)

APPENDIX B
SUMMARY OF ADDITIONS AND REVISIONS

This printing incorporates all reports and all additions and revisions published through October, 1973.

SUPPLEMENT
April, 1974

STANDARD REPORTS

Compiled From The Files Of
The Urban Development Information System
Supplement, April, 1974

Prepared by:
The Office of Research and Statistics
County of Fairfax, Virginia

FAIRFAX COUNTY, VIRGINIA

MEMORANDUM

TO: RECIPIENTS OF STANDARD REPORTS DATE APRIL 9, 1974
FROM: SAMUEL A. FINZ, DIRECTOR *Samuel A. Finz*
OFFICE OF RESEARCH AND STATISTICS
FILE NO.
SUBJECT: STANDARD REPORTS, APRIL, 1974 SUPPLEMENT

REFERENCE:

The Office of Research and Statistics, in August, 1973, began publishing Standard Reports on housing, population, land use, and construction activity. Those reports have been distributed widely and apparently are used frequently by both County agencies and the general public.

The attached reports comprise the April, 1974 Supplement to the UDIS Standard Reports. This Supplement should be kept separately in the looseleaf binder which contains all earlier Standard Reports. Updates to many of the earlier Standard Reports are scheduled for publication next month. The updates will include new data and, in some cases, new reports on construction activity.

Additional copies of the Standard Reports, together with revisions and new reports as they are issued, are available at cost through the Administrative Services Division, 5th Floor, 4100 Chain Bridge Road, Fairfax, Virginia 22030.

VACANCY ANALYSIS OF MAJOR RENTAL APARTMENTS
AND TOWNHOUSE PROJECTS

Survey Conducted in January, 1974

There are 41,371 units in major apartment and townhouse rental projects in Fairfax County. This figure includes 3,947 units that are less than one year old, which are not included in the vacancy analysis because they have a higher vacancy rate (17.2%) than the older, established projects. Based on a 99% sample of the remaining units, there are 1,321 vacant units among the 36,942 surveyed. This results in a County vacancy rate of 3.6%, nearly twice that of last year. One reason for this increase is the addition of 3,947 new units to the rental market. Another is the growing number of condominium units that are being rented by investor-owners. Although this vacancy rate is double that of last year, it is far below the 5 or 6% which would not be considered excessive in the high-turnover Washington area housing market.

This 3.6% vacancy figure includes one project which has an unusually high vacancy rate of 30.8%. If this development of over 400 units were excluded from the sample, the total rate for the County would be reduced to 3.2%. The same development had a vacancy rate of 17% last year.

Currently, there are 2,273 rental units under construction in the County. Most of these units represent the remainder of the 6,300 that were under construction last year. Since there were comparatively few new rental units started since the last survey, we can expect the vacancy rate to decline next year, as the demand surpasses the building rate of the past year.

Included in the 36,942 units surveyed are 262 townhouse units available for rent within sale projects. This is 9% of the rental townhouses surveyed. Although these units are presently for rent, when the builder considers it feasible, they will be sold as condominiums.

The attached table summarizes the rental housing inventory and vacancy rates for various sizes of units. It is interesting to note that units in elevator buildings, generally speaking, are experiencing the highest vacancy rates.

REPORT DU-7 (Continued)

Summary of Rental Housing Inventory and Vacancy Rates: January, 1974
Fairfax County, Virginia*

| <u>Size</u> | <u>Type</u> | Total No. Units | Units Vacant | Jan. 74 % Vacant | July 73 % Vacant | Dec. 71 % Vacant |
|------------------------------|-------------|--------------------|-----------------|---------------------|---------------------|---------------------|
| Efficiency | Garden | 234 | 11 | 4.7% | 4.0% | 3.4% |
| | Elevator | 774 | 31 | 4.0% | 4.0% | 1.9% |
| | Total | 1,008 | 42 | 4.2% | 4.0% | 2.3% |
| 1 Bedroom & 1 Bedroom/Den | Garden | 10,375 | 225 | 2.2% | 1.0% | 1.5% |
| | Elevator | 3,051 | 228 | 7.5% | 3.4% | 1.4% |
| | Total | 13,426 | 453 | 3.4% | 1.5% | 1.5% |
| 2 Bedroom & 2 Bedroom/Den | Garden | 15,066 | 480 | 3.2% | 1.7% | 1.6% |
| | Elevator | 1,626 | 108 | 6.6% | 4.9% | 1.7% |
| | Total | 16,692 | 588 | 3.5% | 1.9% | 1.6% |
| 3 Bedroom & 3 Bedroom/Den | Garden | 2,411 | 117 | 4.9% | 2.5% | 1.7% |
| | Elevator | 363 | 27 | 7.4% | 2.5% | 2.3% |
| | Total | 2,774 | 144 | 5.2% | 2.5% | 1.8% |
| 4 Bedroom | Garden | 140 | 4 | 2.9% | 0% | - |
| | Elevator | 0 | 0 | 0% | 0% | - |
| | Total | 140 | 4 | 2.9% | 0% | - |
| Townhouse | Townhouse | 2,902 | 90 | 3.1% | .5% | 1.8% |
| County Total: | Garden | 28,226 | 837 | 3.0% | 1.5% | 1.6% |
| | Elevator | 5,814 | 394 | 6.8% | 3.9% | 1.6% |
| | Townhouse | 2,902 | 90 | 3.1% | .5% | 1.8% |
| | Total | 36,942 | 1,321 | 3.6% | 1.8% | 1.6% |

* One development in the County included in this table has an unusually high vacancy rate of 30.8%. If this development were excluded from the overall sample pattern, the total vacancy rate for the County would be reduced to 3.2%.

Note: The figures refer to the total number of new housing units authorized by Building Permits.
In a multi-family structure, each separate dwelling unit counts as a housing unit.

SF = Single family and includes townhouses.
MF = Multi-family and includes garden, mid-rise and high-rise apartments.

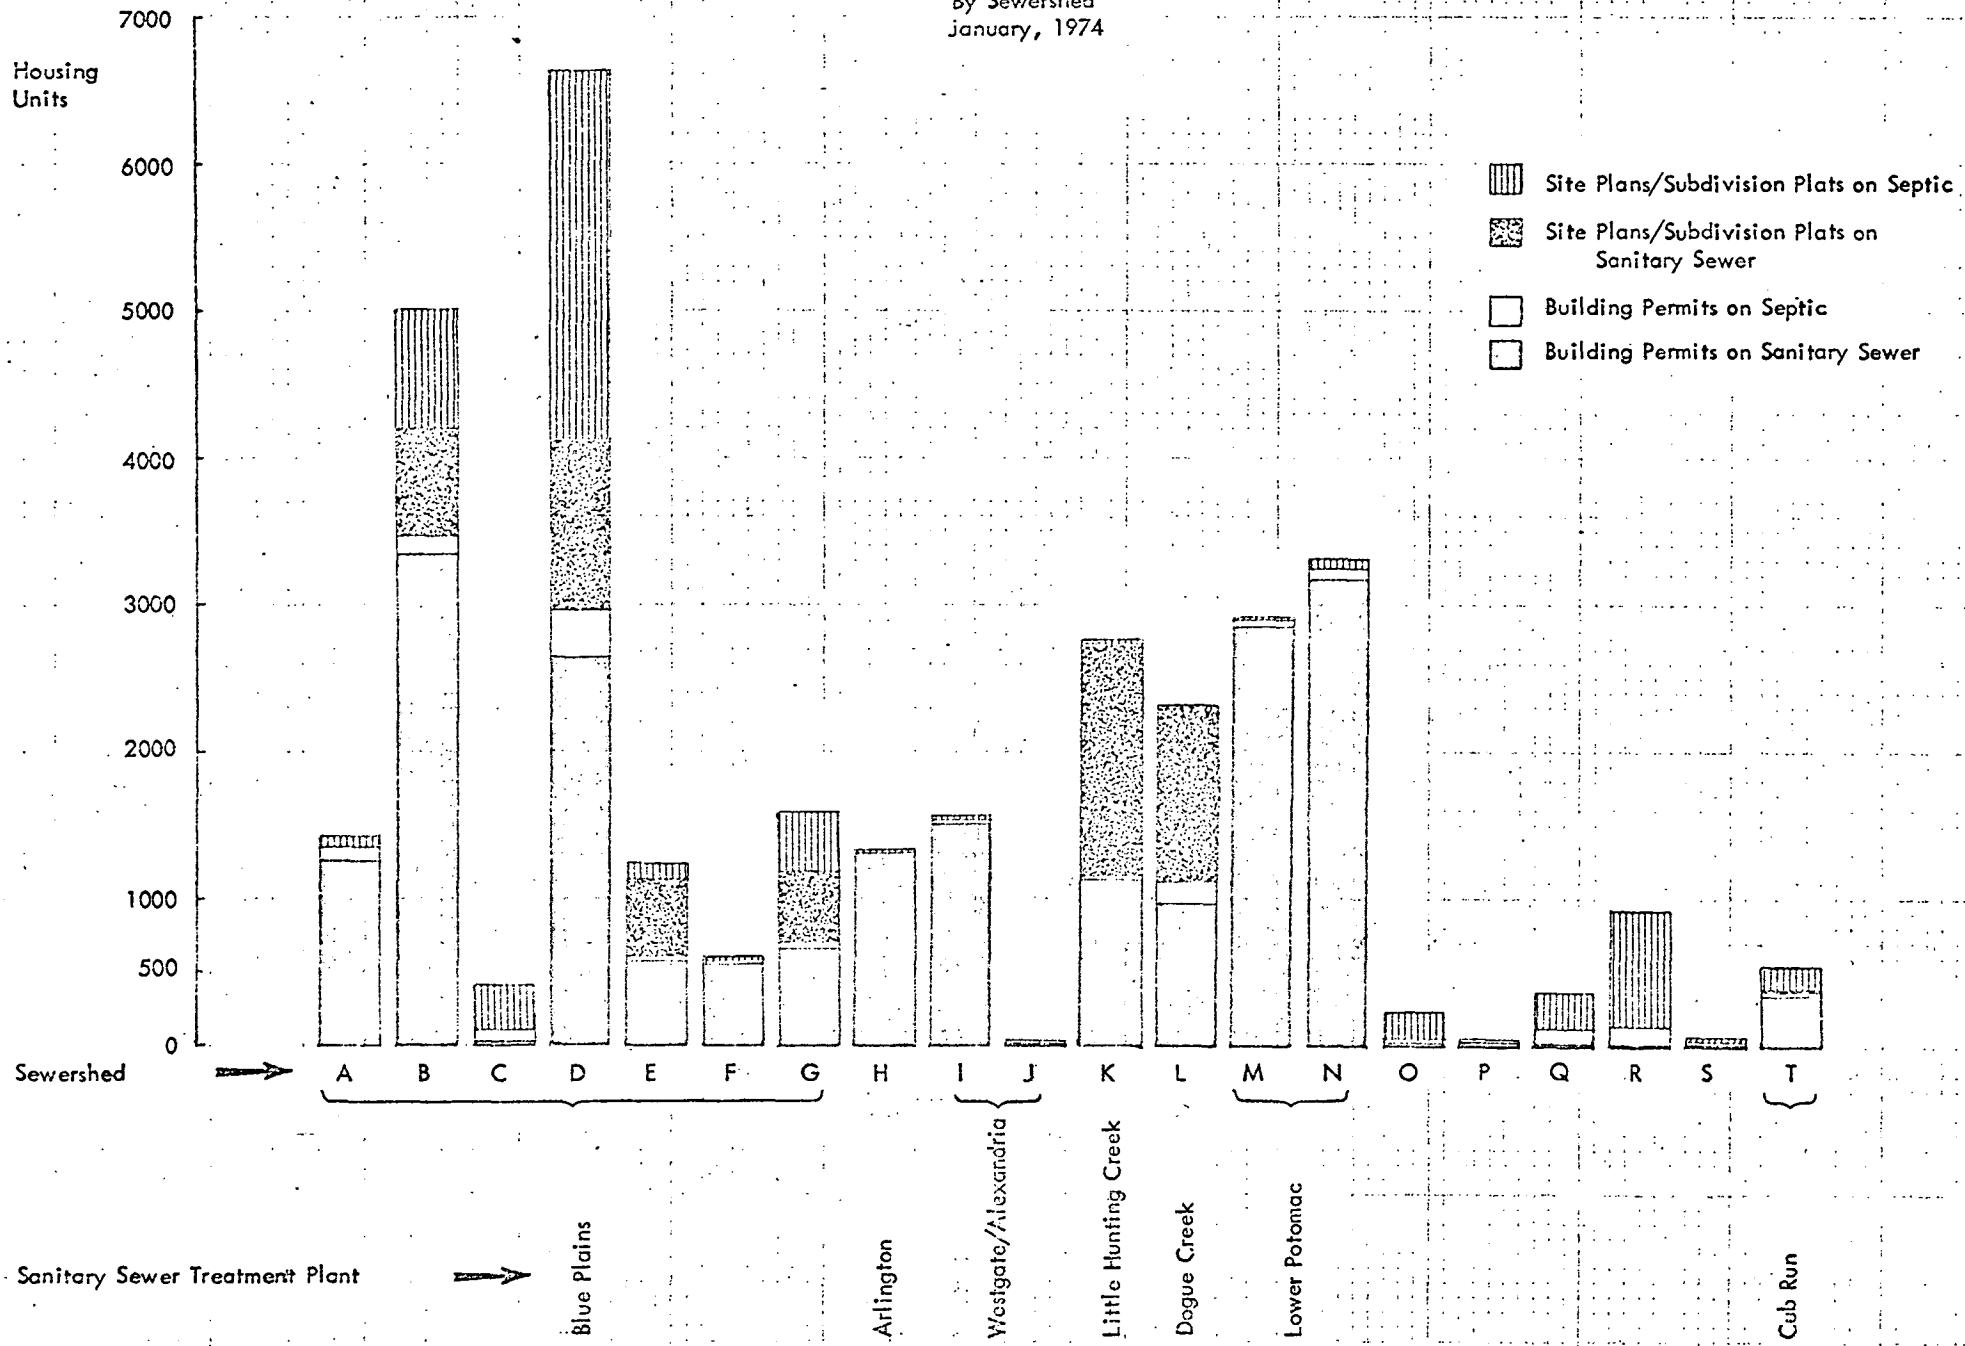

REPORT CA-12

This chart shows residential building permits issued and residential building completions from January 1968 through December 1975, based on historical data and projections. In Fairfax County in the recent past completions generally have lagged 18 months behind issuance of permits. This chart shows the surge in permits which began early in 1971, as sewer constraints were beginning to be felt and indicates that as 1973 ended the number of permits issued fell below the number of completions for the first time in this period.

DEVELOPMENT OF NEW HOUSING ON
SEPTIC TANK SYSTEMS

March, 1974

I. Purpose

This report is the second in a series of investigations into the development of new housing on septic systems as opposed to public sanitary sewer. It is intended to provide insight into the potential growth capabilities and possible problems connected with septic development.

II. Major changes since January, 1974 Report

- A. Applications for perc tests have begun to drop off due to the Interim Development Control Ordinance (See Tables 1 and 2).
- B. As septic perc test applications drop off, it may be expected that some of the corresponding lag times involved in the approval process may decrease due to the decreasing work load.
- C. The number of building permits approved for new housing on septic systems has dropped during the normal seasonal slump. (See Table 2) An increase in building permit approvals may be expected as soon as plans for septic development are approved.

III. Summary of Trends

A. Trends in Septic Perc Test Applications.

1. In June of 1972, the first major activity in septic development was spawned when applications for perc tests began to increase from an average of 60 lots per month to the present level (FY74) of nearly 250 lots per month (a 317% increase). (See Table 2)
2. Lag times from initial application for perc tests to final construction approval on septic subdivisions may extend as long as three years.
3. Based upon current lag times between applications for perc tests and construction of septic developments, the earliest year in which the large influx of septic subdivisions will impact the real estate market is FY-1976.

4. Septic subdivisions of 10 lots or more have made up 60% of all applications for residential septic system perc tests during the past twelve months.
5. The major septic subdivision development may be expected to occur on the fringe of the urbanized areas of the County from Nichols Run to the Occoquan Watershed, where soil suitability and the availability of land at relatively reasonable costs are encouraging applications for septic subdivisions. (See Table 1)

B. Trends in septic permit issuance.

1. Approximately 80% of the housing proposed in septic subdivisions will receive building permit approval. The remaining 20% will not pass County percolation standards.
2. Septic permits issued (building permit approvals) for new housing can be expected to increase from the present level of 45 per month (See Table 2) to an average of 200 per month by FY-1976 (a 344% increase). This increase reflects the normal lag times experienced during the past twelve months between perc test applications and building permit approvals. For this reason, an increase here is not inconsistent with a simultaneous decrease in applications for septic perc tests.

C. Trends in Septic System Construction approvals.

1. Construction approvals for new residential septic systems may be expected to increase from the present rate of 40 per month (See Table 2) to nearly 125 per month by FY-1976, with an additional increase to 200 per month by FY-1977 (a 400% increase between FY-74 and FY-77). A significant increase in approvals over the same period last year may be noted in Table 2, illustrating this trend.
2. Current trends for septic construction approval indicate that 62% of all approvals are made for septic system to be used by new residences. The remaining 38% represents septic systems for non-residential uses or systems for existing homes.

REPORT CA-15
(Page 3 of 6)

3. Construction approvals indicate the concentration of current septic development to be in the Difficult Run, Occoquan, and Colvin Run Watersheds.

IV. Conclusions from the Data.

- A. The Interim Development Control Ordinance, as adopted by the Board of Supervisors in February, 1974, will significantly decrease the number of new applications for septic permits over the next 18 months by curtailing the submission of additional subdivision preliminary plats. The beginning of this trend may be noted in the 53% decrease during February (Table 2).
- B. The extent of septic development activities will not taper off immediately due to the extensive lag times between initial application and construction approval. Based upon current time lags involved in the approval process, the increasing activity in construction approvals should continue throughout the eighteen month period covered by the Ordinance. This trend would give rise to an increase in housing on septic systems to 125 units per month during the first part of FY-1976.

| Jan. 1, 1976 | 183,360 | 617,725 |
| Jan. 1, 1977 | 188,000 | 631,750 |

Source: ORS, 1/13/74

This table shows population and dwelling unit projections for the period January 1, 1973 to January 1, 1977. These projections are based on an analysis of all known restraints, including sewer moratoria, economic conditions, and the Interim Development Control Ordinance. Estimates for 1974 and 1975 are somewhat lower than earlier projections issued by the County because of current housing market conditions. It is estimated that the Interim Development Control Ordinance will have a relatively minor effect on population and the number of available housing units during this period because of the number of units in the pipeline which will not be affected by it. Projections after 1977 depend on a number of factors including economic constraints, sewer constraints, and comprehensive plans and policies to be adopted by the Board of Supervisors in 1974 and early 1975.
