FOREWORD

The Demographic Reports is a compilation of population, housing development activity, nonresidential gross floor area, and land use information. Specifically, within the Demographic Reports are tables showing the following: a Demographic Profile of Fairfax County; population estimates, densities, and forecasts; the County's dwelling unit inventory by type of unit; ranges of estimated market values of houses in the County; housing unit forecasts; the number and type of units within the County's residential development process; nonresidential structures; and existing and planned land use data. Various geographic arrangements are used to present the data, such as supervisor districts, planning districts, sewersheds, and census/subcensus tracts. Also, within each section of the Demographic Reports is a narrative that highlights significant changes in the data, major trends/occurrences, and methodologies, where appropriate. All information, except the historical and forecast data, is as of January 1, 2001.

The Demographic Reports is the primary publication associated with the Urban Development Information System (UDIS). While the Demographic Reports summarizes and aggregates much of the information in UDIS, many additional computer generated reports exist that contain detailed information. There are reports that list each rental apartment complex with its average rents, office building listings with gross floor area information, reports on active residential development projects, and

listings of wholesale and warehouse storage facilities. A complete list of all available Economic and Demographic Publications is on page VII of this section.

Tabular data presented in the Demographic Reports is available electronically on the world wide web at <http://www.co.fairfax.va.us/aboutfairfax/default.htm>. The printed report and computer diskettes containing tabular data are both available from the Maps and Publications Sales office with Fairfax County. The address and telephone number for the Maps and Publications office is as follows:

The information contained in the Demographic Reports is presented in a variety of geographic arrangements -- supervisor district, planning district, sanitary sewershed, census tract and subcensus tract. The large-scale map (4,000 feet = 1 inch) included with the Demographic Reports displays supervisor districts, planning districts and census and subcensus tracts. A smaller scale map of sanitary sewersheds with sewershed codes is displayed on the following pages. Additional copies of the large-scale map are available through Maps and Publications Sales in the Fairfax County Government Center (see address on page VI).

CURRENT POPULATION

Total Population

As of January 2001, there were an estimated 984,366 persons residing in Fairfax County. The County's population increased by 14,617 persons, or 1.5 percent, over the 2000 population estimate of 969,749.

Population by Supervisor District

Among the nine supervisor districts, the Hunter Mill District was the largest in terms of total population (118,977 persons). The Lee and Mason Districts had the lowest total populations with 100,270 persons and 103,736 persons, respectively.

Population Density

Population density is based on the total acres in the County, excluding roads and water areas. The population density for Fairfax County was approximately 4.3 persons per acre, or 2,759 persons per square mile. The Springfield District had the lowest population density among supervisor districts with 2.6 persons per acre while the Mason District had the highest population density with 9.0 persons per acre.

Population Estimation Methodology

The current population estimates are summarized by supervisor district and township, planning district, sewershed, and census and subcensus tract. Population estimates are developed for these specific geographical areas by applying vacancy rates and household size factors by dwelling unit type for the applicable

planning district to the current housing inventory of the geographical area.

The household size factors used for the population estimates were determined from the results of the 2000 Census data. The vacancy rates for owned housing were determined using the Fairfax County Water Authority files, and other adjacent jurisdictions' water customer files which serve Fairfax residents. The 2001 Rental Housing Census was the focus for multifamily rental unit vacancies.

The household size factors and vacancy rates used for each planning district and dwelling unit type are presented in Table 3.1. Figure 3.1 depicts the relationship between average household sizes in Fairfax County, the U.S. and the Census Bureau's South U.S. region from 1967 to 2001.

Table 3.2 shows the special institutional population from 1985 to 2001. The population totals of special institutions, such as Fort Belvoir and the District of Columbia Correctional Complex at Lorton, were obtained directly from these institutions. As of January 2001, the total population of all special institutions in Fairfax County was estimated at 15,484.

Population density for the County is presented in Figure 3.2.

Note: All census tracts in Fairfax County begin with the number 4. To conserve space, the leading 4 is dropped from the census tract name in the information contained in this table. Subcensus tracts are Fairfax County designations and are not recognized by the U.S. Census Bureau. Subcensus tracts divide federally defined census tracts into smaller areas for analysis purposes. For example, Fairfax County subcensus tracts 160.01, 160.02, and 160.03 comprise U.S. Census Bureau census tract 4160.

POPULATION FORECASTS

The forecasts of population for Fairfax County contained in this document are produced by the Research, Analysis and Project Services Group of Fairfax County Department of Systems Management for Human Services, using the Urban Development Information System (UDIS). Periodically, Fairfax County's estimates and forecasts, in conjunction with estimates and forecasts from other local jurisdictions, are provided to the Metropolitan Washington Council of Governments (MWCOG) for purposes of transportation planning, air quality modeling and other programs of regional significance.

Methodology

Population forecasts are derived from forecast housing units and calculated similarly to the current population estimates for each geographic area considered. Forecast household population is calculated using the forecast number of housing units by type. Vacancy rates and average household sizes are applied based on estimates of vacancies and average persons per household by planning district. Finally, total population is calculated by adding the most recent estimate of group quarters population to the forecast household population.

Vacancy rates and household size factors were developed by the Fairfax County Department of Systems Management for Human Services. An overall vacancy rate of 1.4 percent (and thus, an occupancy rate of 98.6 percent) is assumed for all forecast years in Fairfax County. This is based on trends in the overall occupancy rate, which has remained in the 95 to 98 percent range for the last 20 years.

The increasingly diverse racial composition of Fairfax County and the differences in average household size by unit type are several significant factors that are likely to influence projected average household size.

Between 1990 and 2000, the population of Fairfax County increased by 151,165 persons. All of the population increase comprised nonwhites and persons of Hispanic origin. As a result, whites make up a smaller proportion of total population than in 1990. It is important to note that the average household size for each Asian, Black and Hispanic households are higher than the current countywide average household size (see Table 4.1). As these minority households increase as a proportion of total households in the future it will put upward pressure on Fairfax County's overall average household size. This trend, offset by the long-term trend toward smaller household size, will result in relatively stable average household sizes for Fairfax County through 2025. Forecasts of the number of housing units in Fairfax County by housing unit type combined with forecasted average household sizes for each unit type provides a clearer indication of trends in Fairfax County's population.

Forecasts of Total Population

The tables that follow show Fairfax County's population more than doubling between 1970 and 2001, from 455,021 to 984,366 persons in 2001. By the year 2010, Fairfax County's population is forecast to be 1,116,095 persons, an increase of 131,729 persons over the 2001 population estimate. And, by the year 2025, total population is forecast to be 1,189,419 persons, an increase of 205,053 persons over the 2001 estimate.

Population Forecasts by Supervisor District

The Hunter Mill District has the largest population in January 2001 (118,977 persons), and is expected to have second largest in the year 2025 (141,486 persons). The Mount Vernon District, which has the third largest population of the supervisor districts in January 2001 (114,256 persons), is expected to have the largest population through the year 2025 (156,041 persons). The population in the Braddock and Mason Districts are expected to increase more slowly than other districts, and are forecast to total 115,110 persons and 115,010 persons respectively, by the year 2025.

Population Forecasts by Planning District

The Upper Potomac Planning District, which has the largest population in January 2001 among of all planning districts (167,925 persons), is also forecast to have the largest population by the year 2025 (206,614 persons). The Pohick Planning District contains 137,208 persons in January 2001 and is forecast to have 155,200 persons by the year 2025. The Lincolnia Planning District has the fewest number of persons in 2001 (17,147 persons) among all planning districts, and is forecast to have the fewest number of persons by the year 2025 (20,837 persons).

Forecast average household size factors by planning district are presented in Table 4.2. The average number of persons per household in Fairfax County is expected to remain around 2.70 persons per household through year 2025.

Figure 4.1 shows forecast population densities by subcensus tract for the year 2025. Figure 4.2 illustrates population growth from 2001 to 2025 by subcensus tract.

Subcensus tracts are Fairfax County designations and are not recognized by the U.S. Census Bureau. Subcensus tracts divide federally defined census tracts into smaller areas for analysis purposes. For example, Fairfax County subcensus tracts 160.01, 160.02, and 160.03 comprise U.S. Census Bureau census tract 4160.

Median Market Value

Market value in this report refers to the estimated market value as of January 2001. Market value for each dwelling unit represents a 2000 sales price or is derived from the latest tax assessment value. As of January 2001, the estimated median market value of individually owned housing units was \$229,238. Thus, half of all owned housing units in the County had market values exceeding \$229,238 and half had values below this level. This represents a slight increase from the 2000 estimated median housing value of \$226,825.

Table 5.2 shows the median market value of housing units by supervisor district and the percent change between 2000 and 2001.

Market Value by Supervisor District

The Dranesville District had the highest median market value of housing units in the County as of January 2001 (\$344,747). Lee District had the lowest median market value (\$186,392).

Note: Figures exclude group quarters (i.e. Lorton Reformatory, Fort Belvoir, nursing homes, and religious quarters).

Note: All census tracts in Fairfax County begin with the number 4. To conserve space, the leading 4 is dropped from the census tract name in the information contained in this table. Subcensus tracts are Fairfax County designations and are not recognized by the U.S. Census Bureau. Subcensus tracts divide federally defined census tracts into smaller areas for analysis purposes. For example, Fairfax County subcensus tracts 160.01, 160.02, and 160.03 comprise U.S. Census Bureau census tract 4160.

HOUSING UNIT FORECASTS

The forecasts of housing units for Fairfax County contained in this document are produced by the Research, Analysis and Project Services Group of the Fairfax County Department of Systems Management for Human Services, using the Urban Development Information System (UDIS). Periodically, Fairfax County's estimates and forecasts, in conjunction with estimates and forecasts from other local jurisdictions, are provided to the Metropolitan Washington Council of Governments (MWCOC) for purposes of transportation planning, air quality modeling and other programs of regional significance.

Methodology

The forecasts of housing units in Fairfax County are based on planned residential land uses and densities, vacant and underutilized residential planned land, and residential units at various stages in the process of being developed (in the "development pipeline"). Both short-term and long-term forecasts are produced, each produced with different methods, with long-term forecasts building upon the short-term figures.

Short-Term Forecasts, 2001 through 2005

Active residential development is the primary influence on short-term forecasts. Fairfax County's short-term forecasting method assumes that housing units in the "development pipeline" are expected to be built before units which may be planned at some future time that are not presently in that process. Furthermore, housing units in the process of being

developed are expected to be completed according to their stage within the process as of January 1. The general stages considered are: 1) units under construction; 2) units with building permits issued but not started; 3) units shown on an approved site plan; 4) units shown on a site plan under review; 5) units shown on a development plan proffered as a condition to a rezoning approval; and 6) units shown on a proposed development plan submitted with a rezoning application under review.

Long-Term Forecasts 2005 through 2025

After units in the development process are forecast to be completed, areas either reach buildout (no additional capacity exists for residential development according to planned land uses and densities in the currently adopted Comprehensive Plan) or have additional capacity for residential development remaining on vacant or underutilized land. Additional capacity beyond buildout may be forecast over the long-term based on recent development activity that has occurred within that area.

Based on general planned land use designations from the Comprehensive Plan effective January 2001, buildout is expected to occur between 2005 and 2015 for land planned for medium to higher density residential development (townhouses and multifamily). Lower density residential development is expected to continue throughout the forecast period (through 2025). Realistically, residential development will not stop when buildout is reached for a variety of reasons. Comprehensive Plan updates, redevelopment, conversion of

land uses, and other factors will likely allow for housing development to continue beyond the general capacities designated on the present Comprehensive Plan. However, the areas that will be re-planned and/or redeveloped and the extent of these changes are presently unknown. Consequently, the forecasts through the year 2025 follow the assumption that re-planning and redevelopment will occur throughout Fairfax County in proportion to the area's planned residential development activity and potential.

Historical Growth

Between 1970 and 1980 Fairfax County's total housing inventory increased by 84,829 units, from 130,817 units in 1970 to 215,646 units in 1980, a 64.8 percent increase. Between 1980 and 1990, Fairfax County's housing inventory increased by 86,818 units to 302,464 in 1990, a 40.3 percent increase. Between 1990 and 2001 the number of housing units increased by 60,869 (20.1 percent) to a total of 363,333 units. The forecast for January 2005 is 387,425 units, an increase of 24,092 units over the 2001 estimate. By 2025, Fairfax County's housing inventory is forecast to increase by an additional 78,080 units (over the total units forecast for the year 2001) to a total of 441,413 units, representing a 21.5 percent increase during that 24 year period.

Forecast Growth by Supervisor District

Forecast housing unit changes between 2001 and 2025 by current Supervisor District are shown in Table 6.1. As shown in Table 6.1 on the previous page, between 2001 and 2025, the Mount Vernon Supervisor District is forecast to add 16,771 units to its inventory, the Lee District will add 12,966 units, the Sully District will add 8,965 units, and Hunter Mill District will add 8,806 units. Together, the Mount Vernon, Lee, Sully, and Hunter Mill Districts will account for over 60 percent of the housing unit growth expected in Fairfax County between 2001 and 2025.

Forecast Growth by Planning District

Forecast housing unit changes by planning district are shown in Table 6.2. Between 2001 and 2025, all of the planning districts in Fairfax County are forecast to experience increases in housing units. The Upper Potomac and Bull Run Planning Districts are expected to have the largest increases in their housing inventories. The Lincolnia, Annandale and Jefferson Planning Districts are expected to have the smallest gains in their inventories.

Note: All census tracts in Fairfax County begin with the number 4. To conserve space, the leading 4 is dropped from the census tract name in the information contained in this table. Subcensus tracts are Fairfax County designations and are not recognized by the U.S. Census Bureau. Subcensus tracts divide federally defined census tracts into smaller areas for analysis purposes. For example, Fairfax County subcensus tracts 160.01, 160.02, and 160.03 comprise U.S. Census Bureau census tract 4160.

RESIDENTIAL DEVELOPMENT ACTIVITY

The Residential Development Process

The residential development process encompasses the entire land development process, from the rezoning of land, through the site plan and subdivision phases, the issuance of building permits, and the construction and completion of housing units. The development process reflects active residential projects occurring in Fairfax County at one specific point in time (January 2001), and does not reflect cumulative activity occurring throughout the preceding year. Further, specific units are counted only within the stage of the development process in which they occur on January 1, 2001.

Total Units in the Residential Development Process

As of January 2001, there were 31,284 units in the residential development process. This total represented an increase of 376 units (or 1.2 percent), from the January 2000 total of 30,908. Figure 7.1 presents, in graphical form, the total number of units in the residential development process by type of unit from 1980 to 2001.

Total Units by Stage in the Residential Development Process

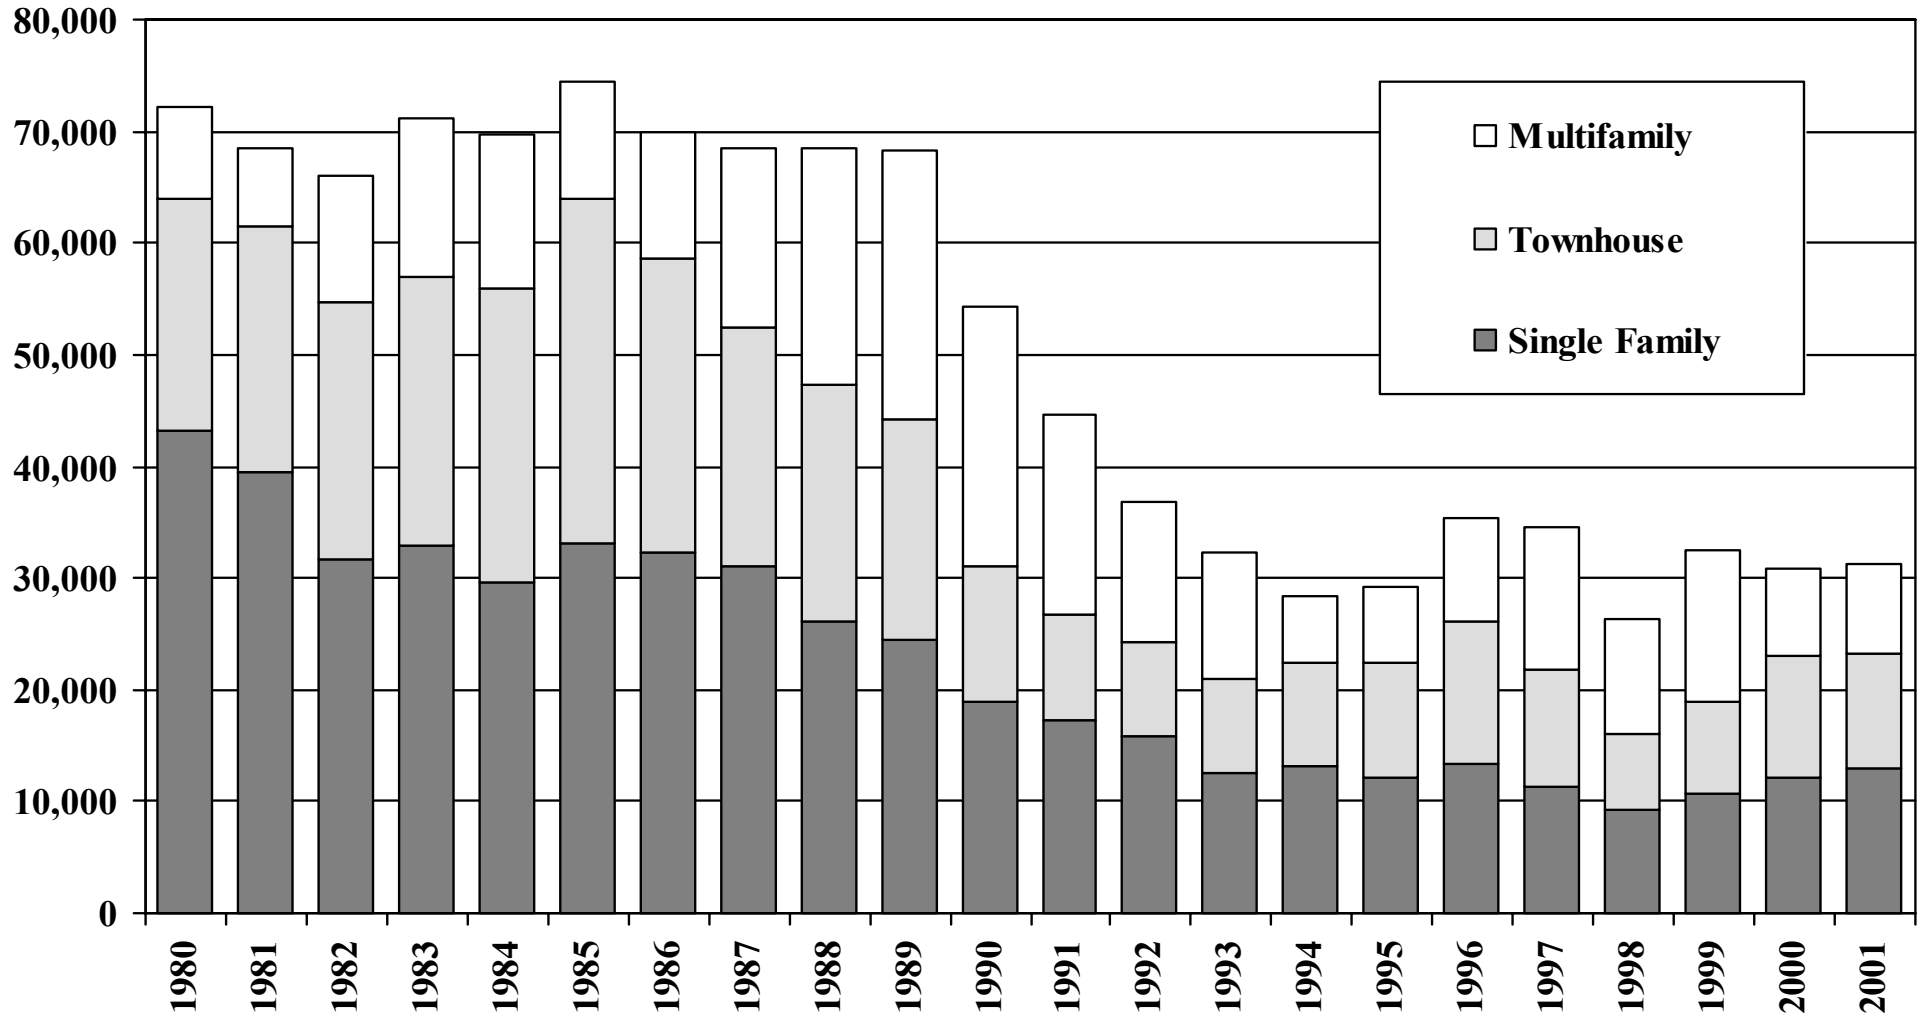

The number of residential units under construction increased by 146 units (or 11.2 percent), from 1,300 units in 2000 to 1,446 units in 2001. The number of units for which building permits were issued but not started decreased by 580 units (or -13.6 percent), from 4,256 units in January 2000 to 3,676 units in January 2001.

On approved site plans or subdivision plats there was a decrease of 124 units (or -1.3 percent), from the 2000 total of 9,310 units to 9,186 units in 2001. On site plans submitted there was a decrease of 359 units (or -4.1 percent), from 8,755 units in 2000 to 8,396 units in 2001.

For units associated with approved rezoning requests (identified as “Rezoning Granted” in the tables), there was an increase of 2,312 units, (or 42.5 percent), from the 2000 total of 5,440 units to the 2001 total of 7,752 units. Residential units counted in this stage typically are shown on development plans proffered with approved rezoning requests. For units associated with rezoning requests submitted (identified as “Rezoning Pending”), the number of units decreased by 1,019 (or -55.2 percent), from 1,847 units in January 2000 to 828 units in January 2001.

Table 7.2 shows the total number of units in the development process by unit type. The single-family category includes only single-family detached units, while the townhouse category includes townhouses, duplexes, and multiplex units. The multifamily category includes both condominium and rental units, either of which may be garden, medium-rise, or high-rise types.

Between 2000 and 2001, the number of single-family units increased by 844 units (or 6.9 percent), while the number of townhouse units in the development process decreased by 654 units (or -6.0 percent) and the number of multifamily units increased by 186 units (or 2.4 percent)

Figure 7.2 presents the number of residential housing units at all stages in the development process by subcensus tract.

Residential Development by Supervisor District

The Mount Vernon District had the largest number of units (6,998) in the development process on January 1, 2001, representing 22.4 percent of the total number of residential units in development in Fairfax County on that date. The Sully District ranked second with 5,449 units under development, accounting for 17.4 percent of the Fairfax County total. The Braddock District showed the lowest level of development activity with 365 units under development.

Residential Development by Planning District

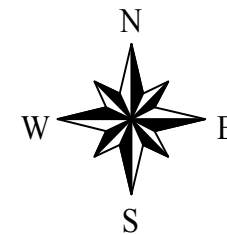

The westernmost planning districts in Fairfax County, the Bull Run and Upper Potomac Districts accounted for fully 37.8 percent of all residential units in the development process in January 2001. The Upper Potomac District accounted for the largest number of residential units in development, 6,691 (or 21.4 percent of the 31,284 total units in development countywide). The Bull Run District had the second largest amount of residential development activity with 5,128 units (or 16.4 percent of total). Thus, 62.2 percent of all residential units in the development process were located in all other planning districts in Fairfax County combined, with the Annandale, Baileys and Lincolnia Districts containing the fewest number of residential units in development.

Note: All numbers shown in the table refer to housing units.

Note: All census tracts in Fairfax County begin with the number 4. To conserve space, the leading 4 is dropped from the census tract name in the information contained in this table. Subcensus tracts are Fairfax County designations and are not recognized by the U.S. Census Bureau. Subcensus tracts divide federally defined census tracts into smaller areas for analysis purposes. For example, Fairfax County subcensus tracts 160.01, 160.02, and 160.03 comprise U.S. Census Bureau census tract 4160.

Nonresidential Gross Floor Area by Year Built

Totals of nonresidential gross floor area by year built and structure type are presented in Figure 8.1 and in Table 8.3, "Nonresidential Structure Gross Floor Area by General Activity, Inventory of Existing Structures by Year Built." The largest share of nonresidential gross floor area in Fairfax County prior to 1980 was allocated to institutional use, including government buildings as well as houses of worship. However, since 1980, Fairfax County has added over 69 million square feet of office space, more than 22 million square feet of industrial space, over 21 million square feet of retail space, and almost 8 million square feet of institutional space.

EXISTING LAND USE

Zoned Land

Fairfax County, including the Towns of Herndon, Clifton, and Vienna, comprises approximately 262,400 acres. In January 2001, about 34,030 acres were in roads, water, and small areas of land that cannot be developed, while 228,374 acres were classified into various zoning categories - 223,522 acres in County zoning categories and 4,852 acres in zoning categories associated with the Towns of Herndon, Clifton, and Vienna.

The lists of zoning codes that are used by Fairfax County and the towns within the County are included in this section. Zoning codes reflect the zoning districts established in the Fairfax County Zoning Ordinance. A complete description, as well as the development requirements associated with each zoning district, is available in the Fairfax County Zoning Ordinance. Zoning ordinances for the Towns of Herndon, Clifton, and Vienna contain descriptions of town zoning districts.

Total Zoned Land

Most of the land in Fairfax County is zoned for residential development as is shown in Table 9.3. Of the 228,374 acres of zoned land, 210,354 acres, or 92.1 percent, was zoned for residential or residential-related use. Industrial zoned land accounted for 9,516 acres, or 4.2 percent of Fairfax County's zoned acreage. Commercial and commercial-related zoned land accounted for 8,500 acres, or 3.7 percent of Fairfax County's zoned acreage.

Zoned Land by Planning District

The Pohick Planning District contained the largest amount of residential zoned land of any planning district, 45,286 acres, or

21.5 percent of Fairfax County's total residential zoned land. The Bull Run District contained the largest amounts of industrial zoned land of any planning district, 3,094 acres, or 32.5 percent of all industrial zoned land. The Upper Potomac District contained the largest amount of commercial zoned land of any planning district, 1,322 acres, or 15.6 percent of all commercial zoned land in Fairfax County.

Zoned Vacant Land

Figure 9.1 and Table 9.4 shows Fairfax County's vacant acreage in January 2001 by major zoning categories. Approximately 12.2 percent of all zoned land, or 27,874 acres, was vacant, a decline of 38.1 percent since 1990. Approximately 83.6 percent of the vacant land (or 23,298 acres) was zoned for residential development. Vacant land that was zoned for commercial use totaled 1,552 acres (5.6 percent), while vacant land that was zoned for industrial use totaled 3,024 acres (10.8 percent of all vacant land).

Vacant land in the Bull Run, Pohick, Lower Potomac and Upper Potomac Districts comprised 75.9 percent (or 21,165 acres) of all vacant land in Fairfax County, while the total for Annandale, Baileys, Jefferson, and Lincolnia Districts comprised only 3.2 percent (902 acres) of the County's vacant land.

As shown in Table 9.1, total vacant acreage dropped to 27,874 acres (12.2 percent of total) from 45,042 acres (19.5 percent of total) in 1990 and from 75,550 acres (32.2 percent of total) in 1980.

PLANNED LAND USE

The inclusion of planned land use data in the Demographic Reports reflects the demand within Fairfax County's residential and nonresidential development community for planned land use information. The planned land use data contained within this section is a result of extensive review by the Fairfax County Department of Planning and Zoning to maintain the currency of these data with plan land use changes to Fairfax County's Comprehensive Plan.

Planned land uses can generally be divided into three major categories: residential, commercial/industrial, and other nonresidential land use designations, which include parks, private recreation, and public and institutional uses. Most residential planned uses are expressed as dwelling unit densities. For example, the designation "1 - 2 Du/Ac" means that the planned density is between one and two dwelling units per acre.

Total Planned Land Use Acreage

The planned land use acreage totals in this report included most land within Fairfax County but generally excluded land such as public roads and water. As of January 2001, there were 143,643 acres planned for residential uses in Fairfax County (see Table 10.1). This represented 62.9 percent of Fairfax County's total planned land. Total land planned for commercial/industrial uses represented 5.9 percent of Fairfax County's total planned land, or 13,518 acres. Of this, approximately 8,313 acres were planned for industrial uses while commercial-office planned uses and commercial-retail planned uses totaled 2,281 acres and 2,924 acres, respectively.

A total of 43,771 acres, or 19.2 percent was planned for public parks, private recreation and floodplain areas. Land planned for public facilities and other nonresidential and non-commercial uses (mixed uses) totaled 27,286 acres, or 12.0 percent.

Total Vacant and Underutilized Land

Vacant and underutilized residential land and vacant commercial/industrial and other nonresidential land totaled 34,966 acres, as of January 2001; representing 15.3 percent of Fairfax County's planned land (see Table 10.2).

Vacant and Underutilized Land Methodology

This undeveloped or underdeveloped acreage is the amount of land on which new development may occur. While vacant land is fairly easy to identify, measuring underutilized residential land is much more difficult. To estimate underutilized land, a formula was developed that first determines existing utilization of parcel acreage, according to allowable development by the Comprehensive Plan. If current land usage is less than total parcel acreage and the difference between currently utilized acreage and total acreage is sufficiently large to provide for development of additional housing units, the difference between currently utilized acreage and total acreage is classified as underutilized residential acreage.

For example, a ten acre parcel that is planned for 1-2 dwelling units per acre but which currently has one dwelling unit on it would yield, via the underutilized land formula, 1 acre of existing utilization and 9 acres of underutilized land. Based on this formula, as of January 2001, 26,095 acres were vacant or underutilized and planned for residential use. Vacant land planned for commercial uses totaled 815 acres, vacant land planned for industrial uses totaled 2,662 acres, and vacant land planned for other nonresidential uses totaled 5,394 acres.

Buildout Methodology

This section also includes estimates of residential buildout. Buildout, in this document, refers to estimates of the total number of housing units that could result from implementation of the adopted Comprehensive Plan effective January 1, 2001. However, residential buildout totals are not static. Buildout totals will likely change as planned residential land uses and densities change as a result of possible future amendments to the Comprehensive Plan. Also, forecast totals of housing units may not coincide with buildout totals. The reason for this difference is explained in Section VI, Housing Unit Forecasts.

While the buildout methodology is detailed, its concepts and general procedures are straightforward. Long-range forecasts of dwelling units are generated by the analysis of land uses and densities shown in Fairfax County's Comprehensive Land Use Plan and expressed as dwelling units per acre. However, the Comprehensive Plan and existing residential land uses or densities are sometimes not in agreement. Also, since the Comprehensive Plan is a document of general development directions and land use policy, it cannot be expected to describe fully the range of development options. Therefore, buildout is calculated by adding the number of units that could be built on vacant and underutilized residential planned land to the existing number of dwelling units.

Buildout can be calculated using the low, midpoint, or high end of the planned density ranges. In the reports presented here, the midpoints of the planned density ranges are used for most areas of Fairfax County. However, in Fairfax Center (the Route 50/Interstate 66 area), the Comprehensive Plan prefers residential development to occur at the high end of the planned

density ranges. Consequently, buildout for the Fairfax Center area is assumed to be at the high end of the residential planned densities and buildout for the rest of Fairfax County is calculated at the midpoint of the applicable planned density ranges. The housing types are defined as SF = Single-family, TH = Townhouse, MF = Multifamily. Single-family units are expected to be built on land planned at densities less than the midpoint of the range of 4 - 5 du/ac. Townhouses are defined as units to be built on land planned between the midpoint of the density range of 4 - 5 du/ac and the midpoint of the density range of 8 - 12 du/ac. Multifamily units are expected to be built on land planned for densities greater than the midpoint of the 8 - 12 du/ac range.

Buildout Totals

Using the methodology described above, and based on the Comprehensive Plan effective January 1, 2001, Fairfax County is expected to have 401,306 housing units at planned buildout. Since there were 363,333 units in Fairfax County effective January 2001, 37,973 units could be added before buildout is reached. The additional units would represent a 10.5 percent increase in Fairfax County's total housing stock over the January 2001 total housing unit inventory. The majority (69.1 percent) of the additionally planned units are expected to be single-family homes, while townhouses and multifamily units are expected to comprise 15.6 percent and 15.3 percent, respectively, of the additionally planned units.

Buildout by Supervisor District

Among the supervisor districts, Mount Vernon had the largest number of additionally planned units before reaching buildout, with 8,693. Also, there were 6,055 additional units planned for the Dranesville District. The Braddock District had the smallest number of additionally planned units, with 1,068.

Buildout by Planning District

Among the planning districts, Upper Potomac was planned to accommodate the largest number of additional housing units with 5,678 additional units planned, and Bull Run was planned to accommodate 4,948 additional units. These two planning districts alone accounted for 28.0 percent of all additionally planned units in Fairfax County. Additional planned units in the Annandale, Baileys, and Lincolnia Planning Districts together accounted for only 6.1 percent of the total of additionally planned housing units throughout Fairfax County.

Note: All census tracts in Fairfax County begin with the number 4. To conserve space, the leading 4 is dropped from the census tract name in the information contained in this table. Subcensus tracts are Fairfax County designations and are not recognized by the U.S. Census Bureau. Subcensus tracts divide federally defined census tracts into smaller areas for analysis purposes. For example, Fairfax County subcensus tracts 160.01, 160.02, and 160.03 comprise U.S. Census Bureau census tract 4160.
