Rankings for
Fairfax County, Virginia
On Key Indicators, 2004**

**Jurisdictions with Populations of
250,000 Persons or More**

R0105: Age Dependency Ratio of the Total Population
Data Set: 2004 American Community Survey
Geographic Area: Counties within United States

Note: The age dependency ratio is derived by dividing the combined under-18 and 65-and-over populations by the 18-to-64 population and multiplying by 100. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters.

Rank	County	Ratio	Lower Bound	Upper Bound
1	Lake County, FL	86.3	80.3	92.3

NOTES:

Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a confidence interval. The interval shown here is a 90 percent confidence interval. The stated range can be interpreted roughly as providing a 90 percent probability that the interval defined by the lower and upper bounds contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Explanation of Symbols:

1. An '*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '**' entry in the lower and upper bound columns indicates that no sample observations were available to compute a star
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '***' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval o
7. An '*****' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test is not appro
8. An 'N' entry in the estimate, lower bound, and upper bound columns indicates that data for this geographic area cannot be
