<b>Unreserved Ending Balance</b>	<b>\$36,625,456</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>
Disposal Rate/Ton <sup>10</sup>	\$11.50	\$11.50	\$11.50	\$11.50

<sup>1</sup> In order to account for revenues and expenditures in the proper fiscal year, an audit adjustment of \$1,226,685 has been reflected as an increase to FY 2004 expenditures to reflect the amount due for work on the landfill. The project affected by this adjustment is Project 186435. A commensurate reduction in the project balance carried forward has been made to the *FY 2005 Revised Budget Plan*. The audit adjustment has been included in the FY 2004 Comprehensive Annual Financial Report. Details of the FY 2004 audit adjustments will be included in the FY 2005 Third Quarter Package.

<sup>2</sup> Capital projects are budgeted based on the total project costs. Most projects span multiple years, from design to construction completion. Therefore, funding for capital projects is carried forward each fiscal year, and ending balances fluctuate, reflecting the carryover of these funds.

<sup>3</sup> Reserve necessary for the closure of active disposal cells of the Ash Landfill, required by the state to be established in order for landfilling activities to progress.

<sup>4</sup> Reserve necessary to perform closure activities on the completed cells of the Ash Landfill. Closure activities are required by the facilities permit, Environmental Protection Agency, and state regulations. It has been drawn down to pay for capital projects associated with landfill closure.

<sup>5</sup> The Environmental Reserve has been established primarily for future Environmental Projects.

<sup>6</sup> Reserve required for the construction of the next phase of the ashfill liner system. It has been drawn down to pay for capital projects associated with landfill closure.

<sup>7</sup> The Construction Reserve is established to provide funds to meet the requirements of current and future construction projects necessary for the operation of the I-95 Landfill, such as drainage and roads. It has been drawn down to mitigate revenue decreases in Interest on Investments.

<sup>8</sup> Post Closure is required for a 30-year period after the landfill closes and is mandated by federal and state regulations. FY 2004 funding of \$22,000,000 represents 58 percent of the estimated requirements of \$37,860,000 and is not sufficient to cover all identified costs. Additional funds will be set aside in future years.

<sup>9</sup> The PC Replacement Reserve was established in FY 1995 in order to meet requirements for the timely replacement of obsolete computer equipment.

<sup>10</sup> Effective July 1, 2000, the jurisdictional rate was reduced from \$14/ton to \$11.50/ton. The FY 2006 rate remains at \$11.50/ton.

## FY 2006 Summary of Capital Projects

### Fund: 114 I-95 Refuse Disposal

Project #	Description	Total Project Estimate	FY 2004 Actual Expenditures	FY 2005 Revised Budget	FY 2006 Advertised Budget Plan
186420	Repair/Maint/Wash Facility	\$1,026,644	\$0.00	\$60,250.18	\$0
186435	Area 3 Lined Landfill Construction		1,325,781.39	7,444,874.69	0
186440	I-95 Landfill Leachate Facility		161,900.00	2,449,972.00	0

Location	Tax Map Reference	Location Code	District
9850 Furnace Road	107-3	H003	Mount Vernon

Project 186420: This project funded the conversion of the former I-95 Landfill administrative office facilities into a permanent shop/maintenance facility, and the construction of an equipment wash facility at the same location. The site was opened in September 1993. This project is complete. The remaining balance is used to support current and future maintenance requirements associated with this project, such as repair to the building's heating system.

Project 186435: This project funds the installation of a flexible membrane liner, which will convert landfill space into disposal areas for ash generated by the Energy/Resource Recovery Facility (E/RRF). Funding is provided from the Liner/Leachate Collection Reserve in Fund 114 to convert sections of the landfill for ash disposal as additional sectors are identified. Phase I and Phase IIA of the project are complete, and Phase IIB construction is anticipated to be completed in FY 2007.

Project 186440: This project funds the installation and expansion of leachate treatment facilities required to process fluids which have flowed through the landfill. In principle, these facilities will operate as small wastewater treatment facilities. As requirements are identified, funding will be provided from the Liner/Leachate Collection Reserve in Fund 114.

Project 186600: This project provides for the ongoing installation of Methane Gas Recovery wells that will extract methane gas from the landfill's interior boundaries before it escapes into the atmosphere, and the construction of a methane extraction facility which will provide the conversion/transportation infrastructure to allow the energy product to be utilized and sold commercially. As areas of the landfill are closed, funding from the Capital Project Reserve will be provided for the installation of new wells and the extension of the methane gas extraction system.

Project 186650: This project was created to meet all State and Federal regulations regarding the closure of the I-95 Landfill. This project is in accordance with closure plans as presented to and approved by the Virginia Department of Environmental Quality. As closure requirements are identified, funding will be provided from the Landfill Closure Reserve. Phase I of closure capping activities was completed in 1994 while Phase II was completed in 2000. Phase III is ongoing. Construction for Phase III began in April 2003 and will extend through FY 2005. Phase IV will begin immediately after the completion of Phase III and is expected to be completed in FY 2008. This project will be built in multiple phases and will extend through the active life of the landfill.
