

Response to Questions on the FY 2010 Advertised Budget Plan

Request By: Supervisor McKay

Question: What will happen to the Groveton space if the County is no longer using it?

Response: Although the Groveton Senior Center has been proposed to close, the Teen Services Division of the Department of Community and Recreation Services (CRS) would continue to use most of the program space during the evening and weekend hours for delivery of their programs and services. As the space would be vacant during the day, CRS intends to work with other county agencies operating in the building to explore opportunities for the scheduling and delivery of additional services in this space. Together, these agencies will explore opportunities to develop service agreements with community-based organizations (at no cost to the County) to offer critical community services that may be impacted by proposed county budget reductions. The service provision could be in exchange for facility use.
