

Analysis of Suggestions for Improvement as part of the FY 2010 County's Line of Business & Schools Program Review Processes Fall 2008

Request By: Public

Suggestion: Install more parking meters to increase revenue.

Response By: Department of Management and Budget

Background: The County does not currently have any parking meters. Previously, parking meters were located at the County Courthouse but were removed during courthouse construction. A parking fee is charged to park in the parking garage at the courthouse. Parking meters are primarily installed in areas where there is limited parking and turnover of vehicles is desired. No parking fees are charged at the County Government Centers as there is an abundance of parking.

Recommendation:

Installation of parking meters is not recommended. Revenue generated would be offset with the cost of purchasing and installing the meters. In addition, staff would need to be hired or contracted to collect the meter fees and to enforce the time limits on parking.
