

Fund 69000 Sewer Revenue

Focus

All Availability Charges and Sewer Service Charges associated with the Wastewater Management Program are credited to this fund as system revenues. The total receipts from all revenue sources are used to finance the following: Operation and Maintenance (Fund 69010); Construction Improvement Projects (Fund 69300); Debt Service (Fund 69020); Subordinate Debt Service (Fund 69040); and Sewer Bond Construction (Fund 69310). Any remaining balance in Fund 69000, Sewer Revenue, is used for future year requirements and required reserves.

The Program's Availability Charge and Sewer Service Charge are based on staff analysis and consultant recommendations included in the January 2016 Wastewater Revenue Sufficiency and Rate Analysis.

Availability Charges

The Availability Charge is a one-time charge to new customers for initial connection to the system. The revenue from the Availability Charge is used to offset the costs of expanding treatment facilities. In FY 2017, the Availability Charge will remain at \$7,750 for single-family homes based on current projections of capital requirements. Rates are based on requirements associated with treatment plant upgrades and interjurisdictional payments that result from population growth, more stringent treatment requirements and inflation. The FY 2017 rate is consistent with the recommendations of the Department of Public Works and Environmental Services (DPWES) and the analysis included in the January 2016 Wastewater Revenue Sufficiency and Rate Analysis. Rates are expected to remain at this level through FY 2020. The following table displays the rates by category:

Category	FY 2016 Availability Fee	FY 2017 Availability Fee
Single Family	\$7,750	\$7,750
Townhouses and Apartments	\$6,200	\$6,200
Hotels/Motels	\$1,938	\$1,938
Nonresidential	\$401/fixture unit	\$401/fixture unit

Fund 69000 Sewer Revenue

Sewer Service and Base Charges

Sewer Service and Base Charges are revenues received from existing customers and are used to fully recover program operation and maintenance costs, debt service payments and capital project requirements attributable to improving wastewater treatment effluent quality as mandated by state and federal agencies. The five-year sewer rate plan approved by the Board of Supervisors as part of the FY 2016 Adopted Budget Plan proposed to increase sewer revenues by 3.6 percent in FY 2017. After careful review, the Wastewater Management staff recommended no change from the 5-year plan, which will result in an annual increase of \$20.28 to the typical household. The Sewer Service Charge will increase from \$6.65 to \$6.68 per 1,000 gallons of water consumed, based on Fairfax County's winter quarter average consumption of 18,000 gallons.

The Base Charge will increase from \$20.15 per quarter to \$24.68 per quarter. The Base Charge provides for a more equitable rate structure by recovering a portion of the program's fixed costs. The industry practice for a cost recovery rate is 25 percent. In order to strive towards this level of recovery, a phased-in approach has been proposed with a cost recovery rate in FY 2017 of 16.2 percent. The current system, including sewer lines, facilities, purchased capacity and equipment, is valued at approximately \$2.0 billion. Based on the age and required maintenance of the system, it is imperative that reinvestment continues to be addressed. The implementation of the increases to the Base Charge will help ensure that all users of the system share in the fixed costs associated with reinvestment and operations.

Increases to both the Sewer Service Charge and Base Charge will change the annual average customer bill from \$559.40 in FY 2016 to \$579.68 in FY 2017, a cost increase of \$20.28 or 3.6 percent. The FY 2017 average bill in Fairfax County is one of the lowest compared to the average bill in other regional jurisdictions even with the proposed increases. The increases in the Sewer Service Charge and Base Charge will partially offset the increased costs associated with capital project construction, system operation and maintenance, debt service and upgrades to meet new, more stringent nitrogen discharge limitations from wastewater treatment plants. The following table represents the proposed five-year rate plan and is consistent with the January 2016 Wastewater Revenue Sufficiency and Rate Analysis report.

Year	Sewer Service Charge Per 1,000 gallons of water consumed	New Base Charge Per Quarterly Bill	Revenue Percentage Increase	Percent Cost Recovered
2016	\$6.65	\$20.15	3.6%	13.6%
2017	\$6.68	\$24.68	3.6%	16.2%
2018	\$6.75	\$27.62	3.1%	18.0%
2019	\$6.85	\$30.38	3.0%	19.3%
2020	\$7.05	\$33.42	4.0%	20.5%

Fund 69000 Sewer Revenue

This level of revenue in FY 2017 will allow the system to meet permit conditions, meet and maintain all of the required financial targets through FY 2020, maintain competitive rates with neighboring utilities, continue to preserve a AAA bond rating, and require less debt to support capital projects.

The table below reflects the Wastewater Management Program's projected fiscal health in FY 2017 and FY 2018. The financial planning process incorporates the following indicators that are interrelated and structured to identify the adequacy of rates from a cash flow, business, and compliance standpoint. These indicators are used by the rating agencies to determine the program's credit rating.

Calculated Financial Indicators

Financial Indicator	Target	Achieved	FY 2017	FY 2018
Net Revenue Margin	37.0% to 50.0%	Yes	49.7%	49.8%
Days Working Capital ¹	150 to 200 days	Yes	163	157
Debt Coverage Senior	Min. 3.00x	Yes	3.88x	3.99x
Debt Coverage All-in	1.80x to 2.20x	Yes	1.85x	1.91x
Affordability (% of median income spent on sewer bill)	Less than 1.2%	Yes	0.5%	0.5%
Debt to Net Plant in Service	Below 40.0% Never above 50.0%	Yes	35.8%	36.0%
Outstanding Debt per Connection	Max \$3,000	Yes	\$1,837	\$1,705
Anticipated Sewer Bond Sales Through FY 2018				\$110.0 M

(1) The Days Working Capital financial indicator is exclusive of Availability Charges in Fund 69000, Sewer Revenue, and Fund 69300, Sewer Construction Improvement. It is calculated based on Operating Expenses and 360 days.

It is anticipated that the rates in FY 2017 will support the County's ability to maintain high bond ratings (AAA by Fitch Investor Service and Standard and Poor's Corporation and Aaa by Moody's Investors Service, Inc.) from rating agencies. These high credit ratings have enabled the County to sell bonds on behalf of the Program at interest rates lower than those obtained by most sewer authorities, thereby achieving savings throughout the life of the bonds.

Changes to FY 2016 Adopted Budget Plan

The following funding adjustments reflect all approved changes in the FY 2016 Revised Budget Plan since passage of the FY 2016 Adopted Budget Plan. Included are all adjustments made as part of the FY 2015 Carryover Review, FY 2016 Third Quarter Review, and all other approved changes through April 30, 2016.

◆ **Carryover Adjustments** **\$0**

As part of the *FY 2015 Carryover Review*, the Board of Supervisors approved an increase of \$6,978,362 to the Transfers Out. This adjustment included an increase of \$9,928,362 to the Transfer Out to Fund 69310, Sewer Bond Construction, to support the Noman Cole Pollution Control Plant filters project. This project was originally one of the projects included in the Virginia Water Quality Improvement Fund Point Source grant approved by the Board of Supervisors on February 23, 2009. However, due to adjustments to the scope of the original project and final actual construction costs, the filters project is no longer supported by the grant. The filters project will support the rehabilitation of the internal working parts, including valves, pipes, gates, and electrical parts, of the plant's filters in order to extend their useful life. In addition, the adjustment included a decrease of \$2,950,000 to the Transfer Out to Fund 69010, Sewer Operation and Maintenance, based on actual expenditure requirements in FY 2016.

Fund 69000 Sewer Revenue

- ◆ **Third Quarter Adjustments** **\$0**

As part of the *FY 2016 Third Quarter Review*, the Board of Supervisors approved an increase of \$2,000,000 to Transfers Out, including an increase of \$500,000 to Fund 69020, Sewer Bond Parity Debt Service, in order to adjust for the impact of an FY 2015 audit adjustment, and an increase of \$1,500,000 to Fund 69310, Sewer Bond Construction, in order to support the completion of the backup power reliability improvement work at the Noman Cole Treatment Plant.

Unreserved Balance	\$0	\$0	\$0	\$0	\$0

Fund 69000 Sewer Revenue

¹ In order to account for revenues in the proper fiscal year, an audit adjustment in the amount of \$123,350.96 has been reflected as an increase to Interest on Investments in FY 2015. The audit adjustment was included in the FY 2015 Comprehensive Annual Financial Report (CAFR). Details of the audit adjustment were included in the FY 2016 Third Quarter package.

² The Wastewater Management Program maintains fund balances at adequate levels relative to projected debt service requirements, operation and maintenance expenses and capital improvements.

³ The Operating and Maintenance Reserve provides for unforeseen expenses associated with sewer system emergencies. This reserve is targeted to be maintained at a level between \$25 and \$45 million. This level of reserve is based on industry practice to maintain existing customer reserves at a level which can support 30 and 180 days of working capital and approximately 50 percent of one year's requirements for rehabilitation and replacement of the current system's assets.

⁴ The New Customer Reserve provides for debt service and administrative expenses associated with new customer debt, until such time as adjustments to availability charges can be accommodated. This reserve is based on payment expenses associated with one year of debt service and administrative expenses associated with new customer debt.

⁵ The Virginia Resource Authority Reserve was established in anticipation of debt service reserve requirements for Virginia Resource Authority loans related to future treatment plant issues.

⁶ The Capital Reinvestment Reserve is intended to address both anticipated and unanticipated increases within the Capital Improvement Program. This reserve will provide for significant rehabilitation and replacement of emergency infrastructure repairs. A reserve of 3.0 percent of the five year capital plan is consistent with other utilities and is recommended by rating agencies. Based on the total five year capital plan, an amount of \$30 million would be required to reach 3.0 percent.
