

How to remove a fall cankerworm sticky band

Step 1:

Begin to remove the sticky band by making small cuts near the seam of the tar paper and through the duct tape. The scissors or knife are very likely to be covered in Tanglefoot in the process.

Step 2:

Tear along the seam of the tar paper, cutting through the duct tape when necessary as you go.

Step 3:

Roll the band away from the cut seam with the Tanglefoot on the inside until it is completely removed.
