In order to provide information on the County's stormwater management program, common facility maintenance issues, and common remedies, Fairfax County has designed and is offering a free **Stormwater Facility Maintenance Awareness Training Program for stormwater facility maintenance contractors.**

As a public service and courtesy, a listing of all contractor attendees will be maintained on the County stormwater website, and will be sent to facility owners with future facility inspection reports as a reference. Further, this training qualifies participants for 8.0 contact hours for Virginia Stormwater Management Program certification purposes.

Registration must be completed by close of business on April 22, 2016. Seating is limited to two (2) representatives per company and will be allotted on a first come, first served basis.

Companies wishing to attend the County's training programs must have a current Virginia business license; those with a location in Fairfax County, must also be current on their County Business/Professional/Occupational Licenses (BPOL).
