Trails

Trails planned for this sector are delineated on Figure 16 and on the 1":4,000' Countywide Trails Plan Map which is referenced as Figure 2 in the Transportation element of the Policy Plan and is available at the Maps and Publications Sales Desk. Trails in this sector are an integral part of the overall County system. While some of the segments have already been constructed, the Countywide Trails Map portrays the ultimate system for the sector and the County at large. In addition, the map specifies a classification for each segment, which represents the desired ultimate function and surface type of the trail. Specific construction requirements are detailed in the Public Facilities Manual.

Trails

Trails planned for this sector are delineated on Figure 16 and on the 1":4,000' Countywide Trails Plan Map which is referenced as Figure 2 in the Transportation element of the Policy Plan and is available at the Maps and Publications Sales Desk. Trails in this sector are an integral part of the overall County system **as well as an important local transportation option**. While some of the segments have already been constructed, the Countywide Trails Plan Map portrays the ultimate system for the sector and the County at large. In addition, the map specifies a classification for each segment, which represents the desired ultimate function and surface type of the trail. **Permeable surface trails (e.g. natural surface or stonedust) are preferred including in new subdivisions in this sector (except for within 1 mile of an elementary school and in commercial areas).**

Attachment C

Justification

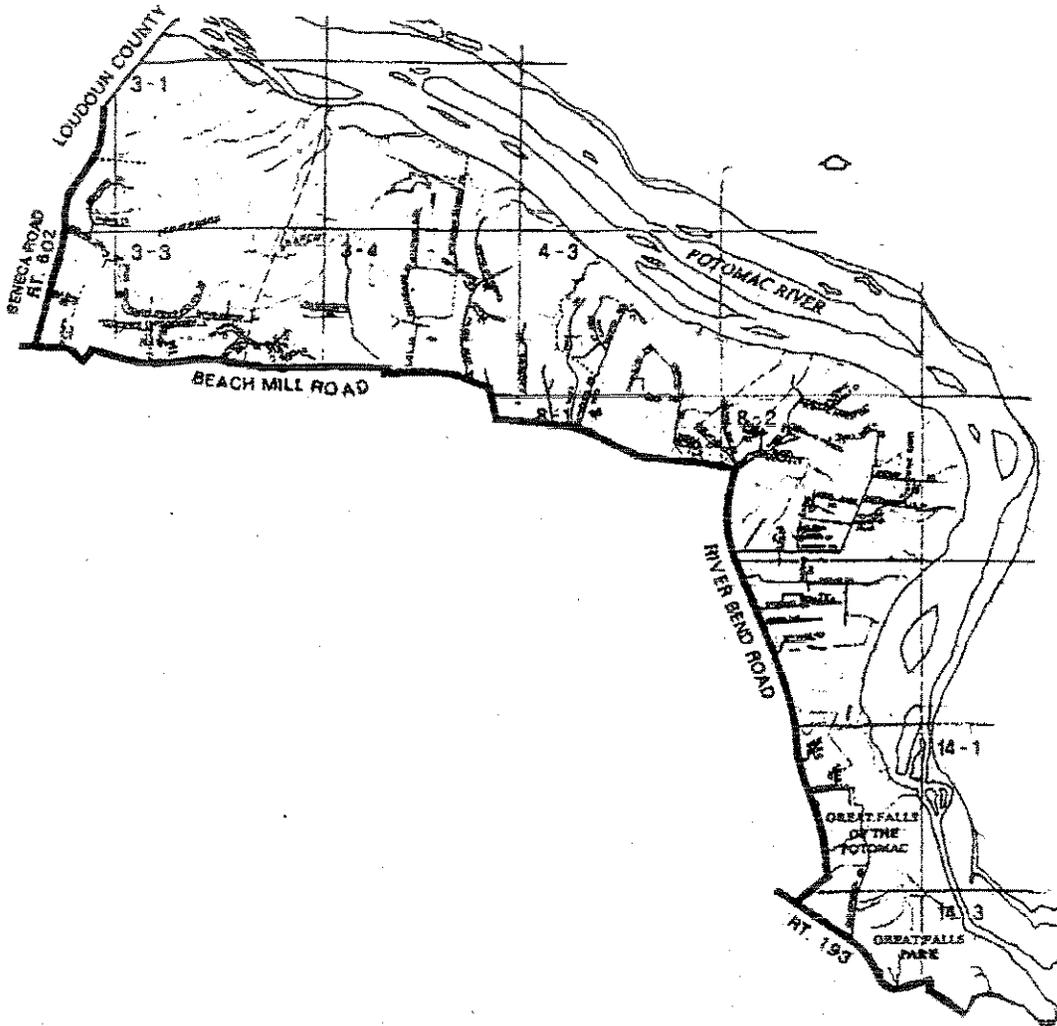

The proposed new text would underscore the fact that the system of trails planned for the Great Falls area are viewed by local residents not just as an integral part of the overall County system, but an important local alternative for walkers, bikers, equestrians etc. The Great Falls 2020 Vision Survey found that residents rank a trail system as an important feature in their ideal picture of what Great Falls should look like in 2020.

For many years the Great Falls community has sought to develop an integrated trail system based on the installation of permeable surface trails. Permeable surface trails help reduce run-off by allowing for absorption of rain and snow and thus help protect the quality of local streams as well as the Potomac River and the Chesapeake Bay.
