CAPACITY PROJECTION FOR SCHOOL YEAR (SY) 2016 - 2017

Projected student population for SY 2016-2017 vs. current capacities

School Capacities are based on the proposed 2017-2021 Capital Improvement Program. Projected enrollments are updated annually completed on a six year timeframe

There is a potential for capacity relief for Hybla Valley Elementary School through capital projects in the region. The opening of a second Fort Belvoir Elementary School in school year 2016-2017 will result in surplus capacity at Woodlawn Elementary School. Lastly, at West Potomac High School capacity relief will be required through a permanent addition or relocation of a modular addition.
