How to Report and Request Road Maintenance

Information from VDOT and Fairfax County

The Virginia Department of Transportation (VDOT) is responsible for the maintenance of most roads in Fairfax County. Some are maintained by Fairfax County, and even fewer are privately owned and maintained.

If you see a pothole, damaged or down traffic sign, or other issue of concern, you may report the problem to VDOT [online](#) or by calling 1-800-FOR-ROAD (1-800-367-7623). VDOT will investigate each report and will schedule repairs as soon as possible.

Public street name signs are maintained by the Fairfax County Department of Public Works and Environmental Services. More information is available from the County Sign Shop at 703-877-2800, TTY 711. To report a problem (e.g., missing sign, bent pole, etc.), call the Sign Shop or submit the information using the on-line Street Name Sign Maintenance Form at <https://www.fairfaxcounty.gov/dpwes/utilities/streetsignform.htm>.

For more information or for help determining who maintains your road, contact Jenny Kaplan in the office of Supervisor Foust at Jennifer.Kaplan@fairfaxcounty.gov or 703-356-0551.

Call 811 Before You Dig

A Message from Columbia Gas

Whether you are planting a tree, installing a deck, or digging a garden, Virginia law requires you to call 811 at least three working days before you start to dig. A

representative from each utility operator will mark the approximate location of the buried utilities at your dig site. It is a free service and will provide you with an understanding of which utility may be in conflict with your digging plans. Striking a utility can cause personal injury, repair costs, fines, and loss of important utility service.

When you dial 811, you are connected to Virginia811, which notifies all the utility companies with facilities in the excavation area of the caller's intent to dig. Qualified professional utility locators are sent to the requested digging site to mark the approximate locations of underground lines with flags and color-coded spray paint. Each type of utility has designated marking colors to clearly identify the type of underground facilities. Yellow is the designated color for gas and oil pipelines.

The depth of utility lines can vary for a number of reasons, such as erosion, previous digging projects and uneven surfaces. Installing a mailbox, building a deck and planting a tree or garden are all examples of digging projects that should only begin a few days after making a call to 811.

More information about Columbia Gas of Virginia is available at www.ColumbiaGasVa.com.
