<b>National Mosquito Control Awareness Week</b>						
20 Father's Day	21 Summer Begins	22	23	24	25	26
27	28	29	30			

Black corrugated drain pipes are common breeding sites for the Asian tiger mosquito. Place pipes so they do not hold water, or treat with a larvicide.

Larvicides kill mosquitoes when they are in the larval stage of the life cycle. Look for products containing *Bti* (*Bacillus thuringiensis* var. *israelensis*) in your hardware store or garden center. *Bti* is a naturally occurring bacteria that will not harm your kids or pets.
