

FAIRFAX COUNTY, VIRGINIA
Environmental Improvement Program (EIP)
Appendix 3: Summary of Retired Actions
Fiscal Year 2010

Prepared October, 2008

NOTE: EACH EIP ACTION IN THIS SUMMARY IS ASSIGNED A UNIQUE IDENTIFICATION NUMBER, BEGINNING WITH A TWO-LETTER ABBREVIATION FOR THE THEME AREA UNDER WHICH THE ACTION IS LISTED (E.G., “GL” FOR “GROWTH AND LAND USE”). THE THEME DESIGNATION “GL” IS FOLLOWED BY A UNIQUE FISCAL YEAR IDENTIFICATION NUMBER BEGINNING WITH “07” TO INDICATE THE YEAR IN WHICH THE ACTION WAS FIRST INTRODUCED. THE FISCAL YEAR IDENTIFICATION NUMBER IS THEN FOLLOWED BY A UNIQUE ACTION NUMBER TO IDENTIFY THE ACTION IN THAT FISCAL YEAR.

I. GROWTH AND LAND USE (GL)

Title of Action	Action Taken	Date Completed	Comments
GL07-01: Cluster Subdivision Amendments	Cluster allowed by-right in R-2, R-3 and R-4 where area >3.5 ac. subject to certain requirements. Allowed by SE in R-C, R-E and R-1 and in smaller areas (as small as 2 acres) for R-2, R-3 and R-4.	June 2004	An 18-month progress report was completed in December 2005. No further follow-up is anticipated.
GL08-04: Define “Transit Oriented Development” and Incorporate a Definition and Principles for its Application in the Comprehensive Plan	An amendment to the Comprehensive Plan was adopted to address this action. The amendment: added a glossary definition of TOD; added an objective specific to TOD; and added an appendix containing principles that should be considered in future planning efforts in rail transit areas designated for mixed use development in the Area Plan volumes of the Comprehensive Plan.	March 12, 2007	None.
GL08-07: Expanded Construction Site Monitoring for Tree Conservation	The Board of Supervisors approved funding to support two additional urban forester positions in the FY 2007 budget. Two additional urban forester positions were deployed to ensure enforcement of tree-related proffers.	September 2006	
GL08-08: Establish a Tree Fund	Staff from Land Development Services, DPWES created a fund entitled the “Tree Preservation and Planting Fund” along with criteria to disburse money from this fund to support community tree planting efforts.	December 2005	
GL08-09: Review and Improve Suggested Tree-Related Proffer Language	A set of draft model proffers was crafted and made available to developers for use in zoning cases in CY 2006. The improved model proffers will help developers communicate specific intentions regarding tree preservation, conservation and removal efforts and the county’s ability to ensure compliance with these commitments during construction activities.	December, 2006	

II. AIR QUALITY AND TRANSPORTATION (AQ)

Title of Action	Action taken	Date completed	Comments
AQ07-01: Air Quality Program Manager Position	Air Quality Program Manager position in Health Department to oversee the county's air quality initiatives, planning and programs. Established and filled.	February 2005	
AQ07-02: South County Bus Plan (Enhancement of bus service throughout southern Fairfax County)	This new service was implemented on September 26, 2004 and further service was implemented on October 24, 2004 to address overcrowding on some routes. Additional service implementation was completed in FY 2007. Since implementation, bus ridership on Richmond Highway has increased 37 percent.	Fiscal Year 2007	
AQ07-03: School Bus Exhaust Retrofit	Retrofitted 1,012 school buses. 436 received ECM reprogram and DOC. Another 576 received DOC only.	February 2005	
AQ07-12: Telework Initiative	Reached and exceeded goal of having 1,000 in the county workforce teleworking by the end of 2005. First jurisdiction in metro area to reach this goal.	January 2006	
AQ07-17: Reduced Vehicle Idling	Fairfax Connector completed implementation of engine idle shutdown.	2007	All Solid Waste trucks and Fairfax Connector buses now have automatic idle shutdown.
AQ07-19: Fairfax Connector Emissions Reduction Program	The Diesel Particulate Filter (DPF) installation and engine derating are complete. Also purchased 68 new buses with DPFs.	December 2007	
AQ07-21: Heavy Diesel Truck Exhaust Retrofit	Completed installation of diesel oxidation catalyst on 113 class 8 diesel trucks.	February 2006	

Title of Action	Action taken	Date completed	Comments
AQ08-02: Station Access Management Plans: Wiehle Avenue and Reston Parkway Rail Stations: The Dulles Metrorail Extension	An RFP was written including a scope-of-work that would result in a transportation management plan to address pedestrian, bicycle, and vehicular access and egress to the Wiehle Avenue and Reston Parkway stations. Work by Vanasse Hangen Brustlin, Inc began under the contract in November, 2006. The study was completed in December 2007.	December 2007	

III. WATER QUALITY (WQ)

Title of Action	Action Taken	Date Completed	Comments
WQ-A. Retired Actions			
WQ07-01: Strengthened SWM Submission Requirements (Zoning Ord. amendment re SWM info. for RZ, SE, and SPs)	A Priority 1 item on the 2006 Zoning Ordinance Amendment Work Program that has been endorsed by the Board of Supervisors is to consider allowing for reductions of the minimum lot width requirements in residential districts with special exception approval. Although the density of the zoning district in which located could not be exceeded, this proposed amendment could potentially increase lot yield by allowing additional lots to be created that do not meet the minimum lot width requirements of the zoning district in which located. This item is tentatively scheduled for public hearings in the fall of 2006.	Fall, 2006	None
WQ07-02: Stream Physical Assessment (Baseline stream condition info. supports watershed protection and restoration.)	Baseline assessment was completed on schedule and within budget.	August, 2005	Completed, with on-going support and program monitoring.
WQ07-03: Perennial Stream Mapping and Resource Protection Area Expansion (Mapping tool for perennial streams)	Mapping is complete and buffers have been delineated. Working with LDS to revise the PFM to clarify the criteria for reclassifying streams from perennial to intermittent. Revised language has been approved by the Engineering Standards Review Committee.	July, 2006	Working with GIS staff to incorporate the new stream physical assessment layer into the "My Neighborhood" application.

Title of Action	Action Taken	Date Completed	Comments
WQ07-04: Stormwater Needs Assessment (Evaluation of current stormwater management services and funding needs.)	The Needs Assessment was prepared by AMEC Earth and Environmental, Inc. with the assistance of an advisory committee appointed by the Board of Supervisors. The findings of the study were presented to the Board in March, 2005. The study identified stormwater levels of service provided by Fairfax County and compared those levels against a benchmark of similar communities within the United States. Funding strategies were presented for stormwater management programs to reflect changing service levels, increased infrastructure inventories, unfunded mandates, and emergency events.	March, 2005	In April, 2005, as part of the budget deliberation process, the Board of Supervisors adopted a one-cent dedication of real estate tax revenues to fund the stormwater program.
WQ07-05: Occoquan Watershed Planning and Zoning	The Occoquan Watershed and Reservoir models have been calibrated to 1995 land uses and are undergoing a verification step to the 2000 land uses. This verification step should be completed by winter of 2006. Northern Virginia Regional Commission will incorporate 2005 land use upon availability of aerial photography.	Winter, 2006	Because of continued high population growth, the Occoquan Program will begin to turn its attention to broader watershed management and planning issues in addition to its current emphasis on best management practices and modeling.
WQ08-01: Incorporate Stream Assessment Tool Software into GIS Stream Layer	The initial action is complete, with ongoing support to user agencies.	Spring 2006	None
WQ07-07: Erosion and Sediment Control Inspections— Compliance with New Mandates	The initial action is complete, with ongoing implementation of compliance measures.	Spring 2008	None. The cost of the program will be recovered through the site development permit fee.

IV. SOLID WASTE (SW)

Title of Action	Action Taken	Date Completed	Comments
SW-A. Completed Actions			
SW07-01 Provide Convenient Access to Recycling Bins.	Provide recycling drop-off centers in the County. Providing convenient access to recycling bins is understood to require two separate sub-tasks as follows: 1) placing additional recycling containers in county buildings; and 2) Reviewing the placement of recycling containers around the county for use by residents.	2005	The base action has been completed. Plans to add to the program are ongoing.
SW07-02 Reduce Idling Time for Trucks Waiting to Dispose of Waste at the I-66 transfer Station.	Added an additional incoming scale at the I-66 Transfer Station to reduce the idling times for trucks waiting to dispose of waste.	2005	Action completed. The capacity for processing incoming vehicles was doubled by adding an additional above ground scale adjacent to the exiting scale.
SW07-03 Pollution Prevention (P2) Program E/RRF Emission Controls	Pollution Prevention control at E/RRF is genuinely state of the art. Emphasis is now focused on preventing constituents of concern from entering the E/RRF all together.	2006	Action completed. E/RRF Pollution Preventions controls will continually be updated to meet Federal, State, Local Regulations.
SW07-05	Little if any opportunities for Legislative support anticipated. Tracking Supreme Court activity on a flow control case.	2006	Action completed. Recent flow control decision thought to support County's goals.

V. PARKS, TRAILS, AND OPEN SPACE (PT)

Title of Action	Action Taken	Date Completed	Comments
SW-A. Completed Actions			
PT07-20: Analysis of Developed/Undeveloped Land Within the Park Authority Park System	Completed	2007	Action completed and data is available on GIS system.

VI. ENVIRONMENTAL STEWARDSHIP (ES)

Title of Action	Action Taken	Date Completed	Comments
ES-A. Completed Actions			
<p>ES07-01: Master Watershed Stewards Certification Program</p> <p>A watershed education program covering a wide range of topics, including stream ecology, LID and urban stormwater management.</p>	<p>66 Master Watershed Stewards graduated, having fulfilled the requirements of attending 8 classroom sessions and undertaking a watershed project and/or volunteer activities. One example was the Providence District parking lot LID retrofit. Participants represented 18 watersheds and completed 1,812 hours. The Potomac River Greenways Coalition secured a grant to fund and staff the program, with the support of several partners including DPWES, NVSWCD, ANS, and Fairfax Trails and Streams)</p>	<p>Graduation July 2004</p>	<p>Feedback from participants overwhelmingly indicated program was well-received and should be offered again; program partners agreed. The original program was grant funded; instruction was done by partners and volunteers. Funding would be needed for staff to coordinate future programs.</p>
<p>ES09-01: Government Center Lighting and Variable Frequency Drive Retrofit</p>	<p>The constant volume air handling units in the three building in the Government Center complex were retrofitted with variable frequency drives and energy efficient motors. All existing lighting fixtures were relamped with T8 28W lamps and the lighting control software was upgraded.</p>	<p>December 2005</p>	<p>Project resulted in annual cost savings of over \$86,000. The project cost was \$895,220, and factoring in rising energy costs, payback is expected in approximately 7 years.</p>

Title of Action	Action Taken	Date Completed	Comments
ES09-02: T-8 Lighting Retrofit of Remaining County Facilities	Miscellaneous buildings still required upgrading of lighting from T-12 to T-8 to reduce electrical consumption. Retrofit was finished spring of 2007.	Spring 2007	The result is a reduction in energy consumption, approximately 40% per fixture. Some of these facilities had T12 fixtures throughout, and others only had a few remaining fixtures in specific locations, so this makes it difficult to quantify the total savings through analyzing utility bills..
ES09-03: Installed Energy Management Control Systems (EMCS) in Burkholder and John Marshall Library	EMCS can reduce energy consumption 25-50% based on facility type and operating hours. FMD has 58 systems installed in over 170 facilities. Capital Facilities will install them in all new facilities.	End of CY 2006	The cost was \$50,000 for Burkholder and \$60,000 for John Marshall. Burkholder was newly turned over to FMD; John Marshall results will be quantified over time.
ES09-04: Reduced Energy Consumption by 13.2% kBtu/SF between FY 2001 and FY 2006	The cumulative efforts of all energy projects implemented by FMD were estimated by evaluating utility data between FY2001 and FY2007.	End of FY2007	The energy projects installed in this time period resulted in total energy cost avoidance of over \$4 million.
ES09-11: Energy Star for Vending Machines	All vendors were required to install Energy Star compliant machines for new or replacement locations. Existing machines were retrofitted with an external control to reduce consumption.	End of CY2007	All vending machines in County facilities are now Energy Star compliant. Energy use by these machines could be reduced by 30-46% and provide an annual savings of up to \$100-\$150 per machine.
