

EMBARK

RICHMOND HIGHWAY

CREATING A MULTIMODAL FUTURE

WHAT IS A BRT SYSTEM?

- A bus rapid transit system (BRT) operates primarily on dedicated lanes in the roadway.
- It provides frequent, reliable and attractive service to reduce travel times.
- It works with the traffic signals to extend green time for the buses.
- It features intelligent transit system components such as innovative fare collection, real-time bus tracking for mobile devices, and more.

COMMUNITY MEETING

May 9, 2016, 7-9 p.m.

Walt Whitman Middle School Auditorium, 2500 Parkers Lane, Alexandria

Learn about the plans and work currently underway on the Embark Richmond Highway project. The meeting will feature:

- Remarks by Lee District Supervisor Jeff McKay and Mount Vernon District Supervisor Dan Storck
- Formal presentation
- Open house to talk one-on-one with county staff working on the project.

Embark Richmond Highway is a multi-year effort involving land use and transportation planning, design and construction activities that will result in a bus rapid transit (BRT) system that will operate primarily on dedicated lanes along Richmond Highway initially from the Huntington Metrorail Station to Fort Belvoir, and will include a future extension of the Metrorail Yellow Line to Hybla Valley.
