

Huntley Meadows

Habitat Management Design Components

1 Natural, non-intrusive habitat management plan

2 Habitat management in keeping with the park's origin

3 Maximize habitat diversity

4 Boardwalk to remain in current location

5 Scientifically based management decisions

- a. Geotechnical data
- b. Survey data
- c. Vegetation data

6 Silt removal and sedimentation management

7 Use of dam and/or control structures

8 Allow continued beaver activity and interaction with surrounding hydrology

9 Incorporation of deep pools into the design

10 Design habitat for species of interest

11 Invasive plant control

12 Wildlife management (e.g. duck nesting boxes, snakehead fish monitoring, Canada geese control)
