Special Recognition

Multiple larcenies in the Franconia District of the Fairfax County Police Department have been solved because Officer John Parker was able to collect crucial evidence from the scene of several larcenies.

On July 8, 2010, PFC Parker responded to a larceny complaint where a man stole money from a coin operated laundry machine and fled. PFC Parker dusted the equipment for fingerprints and sent the evidence for processing. The fingerprints identified a suspect and enabled PFC Parker to further investigate. He later obtained warrants for destruction of property and grand larceny.

A week later, PFC Parker responded to a similar call involving coin operated laundry machines. He thoroughly processed that scene as well and collected multiple latent prints. Those fingerprints identified the same suspect and Officer Parker obtained more warrants for grand larceny and destruction of property.
