

## Response to Questions on the FY 2010 County's Line of Business & Schools Program Review Processes Fall 2008

**Request By:** Supervisor Gross

**Question:** Please provide information on the recent renovation at the Annandale Adult Day Health Center. What did the renovation consist of and how much was spent?

**Response:** The Facilities Management Department spent approximately \$350,000 over a span of 2 years to perform overall facility upgrades at the location occupied by the Annandale Adult Day Health Center (ADHC). The Annandale ADHC program shares its current location with the Annandale Christian Community for Action (ACCA) group, which is a community non-profit organization that provides child care. The Annandale ADHC occupies approximately one-third of the facility while the ACCA occupies the other two-thirds. Facility upgrades were part of a capital project that included the replacement of all windows, and the pointing and replacing of deteriorated bricks.

In addition, \$65,000 was spent on improvements specific to the Annandale ADHC, including replacements of the water heater, commercial sanitizer dishwasher, chairs in the dining room and exercise area, front doors, as well as the installation of a replacement safety system that alerts the care-takers if a participant attempts to leave the building unsupervised (the Secure Care System). Improvements also included the redesign and update of the reception area.
