

**Response to Questions on the FY 2010
County's Line of Business & Schools Program Review Processes
Fall 2008**

Request By: Supervisor Gross

Question: Are there any building related issues with closing community libraries on Friday and Sunday while opening them on Saturday?

Response: The Facilities Management Department estimates the County would realize a savings of approximately \$45,966 annually. Actual savings may be different due to a variety of reasons including climatological anomalies, as well as rate changes from the utility provider. It should be further noted that the electric service cannot be eliminated on the days that the facility is closed. Certain functions must be energized even when the building is unoccupied.
