¹ In order to account for revenues and expenditures in the proper fiscal year, an audit adjustment in the amount of \$31,571.40 has been reflected as an increase to FY 2010 expenditures to accurately record an expenditure accrual. The audit adjustment has been included in the FY 2010 Comprehensive Annual Financial Report (CAFR).

² Capital projects are budgeted based on the total project costs. Most projects span multiple years, from design to construction completion. Therefore, funding for capital projects is carried forward each fiscal year, and ending balances fluctuate, reflecting the carryover of these funds.

³ Ending balance fluctuations are a result of operating and revenue requirements that change annually. Funding is carried forward each fiscal year to provide flexibility given the uncertainty of market conditions and expenditure requirements.

⁴ The Active Cell Closure Liability Reserve is necessary for the closure of active disposal cells of the Ashfill and is necessary for ashfilling activities to progress in accord with state requirements.

⁵ The Environmental Reserve is a contingency fund, assuring that the County has funds to implement, or at least start to implement, unplanned actions to protect the environment or meet regulatory requirements. Specific examples of future environmental projects are likely to include: Landfill Gas Control Projects, Stormwater Management, Wastewater (Leachate) Management, and Groundwater protective measures.

⁶ The Capital Equipment Reserve was set up for the timely replacement of equipment required to operate the I-95 Ashfill. Funds are transferred from Ash Disposal Revenue to equipment reserve as are proceeds from the sale of equipment. The reserve requirement is based on a replacement schedule comprised of yearly payments to the reserve, which is based on the useful life of the equipment and vehicles.

⁷ The Post-Closure Reserve is required for a 30-year period after the ashfill closes and is mandated by federal and state regulations. The FY 2011 projected reserve of \$24.4 million represents approximately 53 percent of the estimated requirement of \$46,320,930 and is not sufficient to cover all identified costs. Additional funds will be set aside in future years.

⁸ The PC Replacement Reserve provides for the timely replacement of obsolete computer equipment.

⁹ Effective July 1, 2000 the jurisdictional fee for ash disposal was reduced from \$14/ton to \$11.50/ton. The rate remained at \$11.50/ton from FY 2001 to FY 2009, and was increased to \$13.50/ton in FY 2010 to meet operating and post closure reserve requirements. The rate for FY 2011 remains at \$13.50/ton.
