

Capital Projects Overview

Summary of Capital Construction Program

The Capital Construction Program of Fairfax County is organized to meet the existing and anticipated future needs of the citizens of the County and to enable the County government to provide necessary services. The Capital Construction Program (other than sanitary sewer construction and resource recovery projects) is primarily financed through transfers from the General Fund and the sale of General Obligation Bonds. Supplementing the General Fund and General Obligation Bond monies are additional funding sources including federal and state grants, contributions, and tax revenues from special revenue districts.

The Fairfax County Capital Construction Program includes, but is not limited to construction of both new and renovated school facilities, park facilities, transportation facilities, libraries, trails/sidewalks, fire stations, government centers with police substations, stormwater management facilities, athletic fields, housing units to provide affordable housing opportunities to citizens, commercial revitalization initiatives and infrastructure replacement and upgrades at County facilities. In addition, the Program includes contributions and obligations in support of the capital construction.

Funding in the amount of \$906,011,481 is included in FY 2020 for the County's Capital Construction Program. Of this amount, \$337,211,783 is included for debt service and \$568,799,698 is included for capital expenditures. The source of funding for capital expenditures includes: \$18,143,691 from the General Fund; \$208,000,000 in General Obligation Bonds; \$196,500,000 in sewer system revenues; \$18,400,000 in Real Estate revenues supporting the Affordable Housing Program; \$56,586,444 in Stormwater Services revenue; \$45,251,990 in Commercial and Industrial tax revenues; and \$25,917,573 in financing from various other sources. Other sources of financing include, but are not limited to, transfers from other funds, pro rata share deposits, user fees, developer contributions and/or payments.

Capital Projects Overview

General Fund Support

In FY 2020, an amount of \$18,143,691 is supported by the General Fund for capital projects. This includes an amount of \$12,353,691 for commitments, contributions and facility maintenance and \$5,790,000 for Paydown projects. The Paydown program has been redesigned at the request of the Board of Supervisors to exclude those projects that are on-going maintenance projects or annual contributions. Paydown now includes infrastructure replacement and upgrades, ADA compliance, athletic field improvements and other capital improvements. The FY 2020 General Fund Capital Program represents an increase of \$1,382,215 from the FY 2019 Adopted Budget Plan primarily associated with increased support for Environmental Improvement Program projects, annual requirements associated with the Americans with Disability Act (ADA) compliance, and increased annual funding for walkway and roadway repairs consistent with established multi-year plans. Due to budget constraints, there is no funding included for infrastructure replacement and upgrade projects in FY 2020, however, an amount of \$8,538,000 is anticipated to be funded as part of the *FY 2019 Third Quarter Review* or *FY 2019 Carryover Review*. In recent years, it has been the Board of Supervisors' practice to fund some or all of the infrastructure replacement and upgrade projects using one-time funding as available as part of quarterly reviews.

The FY 2020 General Fund Supported Program is illustrated below:

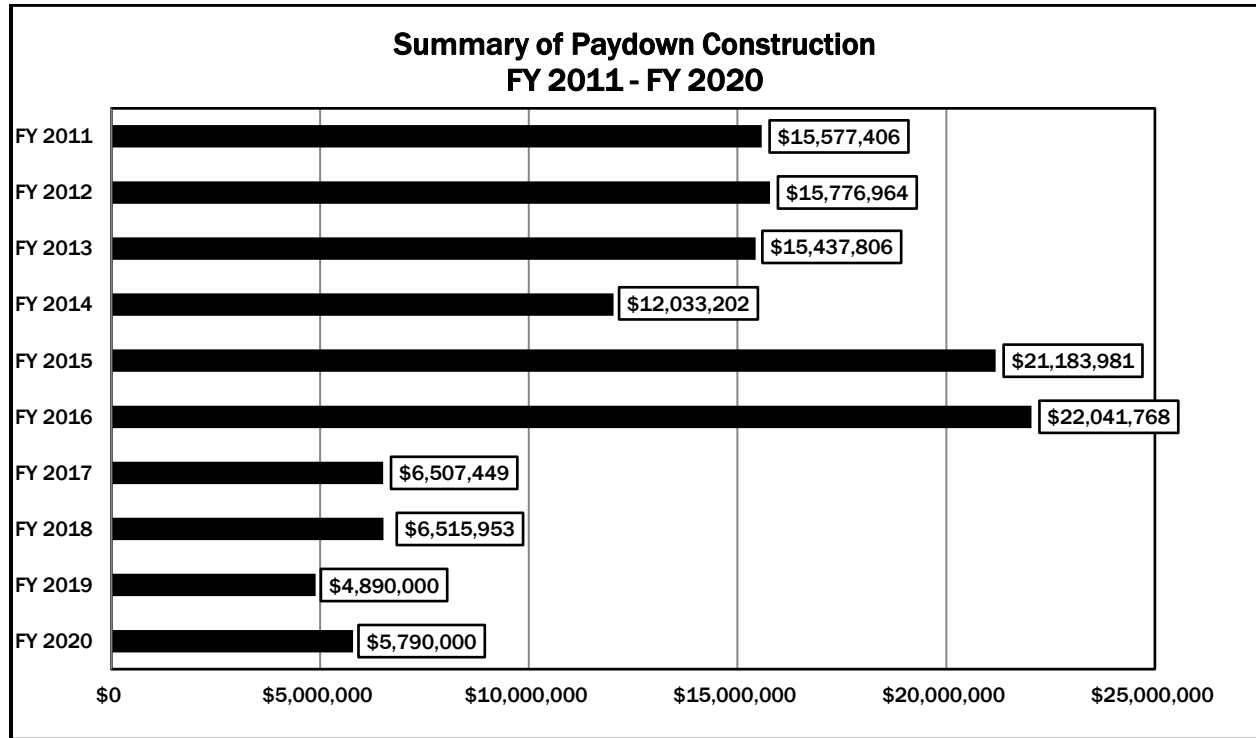

FY 2020 Capital Construction/Paydown Summary*			
	Commitments, Contributions and Facility Maintenance	Paydown	Total General Fund Support
Athletic Field Maintenance and Sports Projects	\$4,435,338	\$1,700,000	\$6,135,338
Park Authority Inspections, Maintenance and Infrastructure Upgrades	\$960,000	\$1,740,000	\$2,700,000
Environmental Initiatives	\$916,615	\$0	\$916,615
Revitalization Maintenance	\$1,410,000	\$0	\$1,410,000
Payments and Contributions / On-going Development Efforts	\$4,631,738	\$200,000	\$4,831,738
County Infrastructure Replacement and Upgrades	\$0	\$0	\$0
ADA Improvements	\$0	\$650,000	\$650,000
Reinvestment, Repairs of County Roads and Walkways	\$0	\$1,500,000	\$1,500,000
Total General Fund Support	\$12,353,691	\$5,790,000	\$18,143,691

* Reflects General Fund support. Other funding sources such as dedicated revenue and bond funding are not included in these totals.

It should be noted that in recent years, the Board of Supervisors has approved additional one-time funds for the Paydown Program as part of both the Third Quarter and Carryover Reviews. In addition, to funding approved at quarterly reviews, the Board has allocated available year-end funds to the Capital Sinking Fund. The Capital Sinking Fund is populated each year as part of the Carryover Review based on 20 percent of the available year-end balances. Funding provides for infrastructure replacement and upgrades, such as facility roofs, electrical systems, HVAC and reinvestment in trails, pedestrian bridges and other infrastructure requirements. When taking into account the allocation of these available one-time funds, the FY 2019 Paydown Program funding totaled \$36,585,247. This trend is expected to continue in FY 2020.

Capital Projects Overview

The graph below depicts the level of Paydown funding between FY 2011 and FY 2020. The decrease beginning in FY 2017 is associated with the revised definition of the Paydown program.

Specifics of the FY 2020 General Fund Supported Program include:

Athletic Field Maintenance and Sports Projects

FY 2020 funding in the amount of \$7,610,338 has been included for the athletic field maintenance and sports program. This level of funding is supported by a General Fund transfer of \$6,135,338 and revenue generated from the Athletic Services Fee in the amount of \$1,475,000. Of the Athletic Services Fee total, \$800,000 will be dedicated to the turf field replacement program, \$275,000 will be dedicated to custodial support for indoor sports organizations, \$250,000 will be dedicated to maintenance of school athletic fields, \$75,000 will be dedicated to synthetic turf field development, and \$75,000 will partially fund the Youth Sports Scholarship Program. The Athletic Service Fee revenue is based a rate of \$5.50 per participant per season and \$15 for tournament team fees for diamond field users and indoor gym users and a rate of \$8.00 per participant per season and \$50 tournament team fees for rectangular fields users. The rate for rectangular field users is specifically to support the turf field replacement fund.

Specific funding levels associated with maintenance include:

- ◆ An amount of \$860,338 provides for contracted services to improve the condition of athletic fields scheduled for community use at FCPS elementary schools, middle schools and centers. Maintenance responsibilities include mowing and annual aeration/over-seeding. This effort is supported entirely by the General Fund and is managed by the Park Authority.

Capital Projects Overview

- ◆ An amount of \$1,000,000 is dedicated to the maintenance of diamond fields at Fairfax County Public Schools and is partially supported by revenue generated by the Athletic Services Fee. This funding supports contracted maintenance aimed at High School sites, athletic field renovations, and irrigation maintenance of non-Park Authority athletic fields. This includes 408 non-Park Authority athletic fields of which 352 are located at elementary, middle schools, and centers. All field maintenance is coordinated between the Park Authority and the Department of Neighborhood and Community Services. Of the total funding, an amount of \$250,000 is included for this program based on the FY 2020 projection of revenue generated from the Athletic Services Fee and \$750,000 is supported by the General Fund.
- ◆ An amount of \$50,000 is included for routine maintenance of girls' softball field amenities on select Fairfax County Public School sites. These amenities, such as dugouts, fencing and irrigation systems, were added or constructed by the County based on recommendations from the citizen-led Action Plan Review Team (APRT) in order to reduce disparities in the quality of fields assigned to boys' baseball and girls' softball organizations. Routine maintenance is necessary both to maintain equity and to ensure safety. For five years, funding of \$200,000 was provided to support Girls' Fast Pitch Field Maintenance improvements to various girls' softball fields throughout the County as requested by the Fairfax Athletic Inequities Reform (FAIR). FY 2020 funding will provide maintenance to the improvements and amenities previously made to girls' softball fields. This project is supported entirely by the General Fund and coordinated by Department of Neighborhood and Community Services.
- ◆ An amount of \$75,000 is included to support the development of synthetic turf fields. Fields are chosen through a review process based on the need in the community, projected community use and the field location and amenities. This effort is coordinated between the Park Authority and the Department of Neighborhood and Community Services and funding is provided from revenue generated from the Athletic Services Fee.
- ◆ An amount of \$2,700,000 is included for athletic field maintenance and repairs, irrigation repairs, lighting repairs, turf maintenance, utility costs, and capital equipment replacement costs. The Park Authority is responsible for full service maintenance on 262 athletic fields, of which 39 are synthetic turf and 223 are natural turf. In addition, the field inventory includes 115 lighted and 115 irrigated fields. The fields are used by more than 200 youth and adult sports organizations as well as Fairfax County citizens. This effort is supported entirely by the General Fund and is managed by the Park Authority.
- ◆ An amount of \$275,000 is included for custodial support for indoor gyms used by sports organizations. The use of FCPS indoor facilities on the weekend requires FCPS to schedule a school system employee to open and close the facility and provide custodial support. Revenue generated from the Athletic Services Fee is used to provide payment for FCPS staff, eliminating the need for indoor sports organizations to pay the hourly rate previously charged. This project is entirely supported by revenue generated from the Athletic Services Fee and is managed by the Department of Neighborhood and Community Services.
- ◆ An amount of \$150,000 is included for the Youth Sports Scholarship Program. The Youth Sports Scholarship Program provides support to youth from low-income families who want to participate in community-based sports programs. Of the total funding, an amount of \$75,000 is included for this program based on the FY 2020 projection of revenue generated from the Athletic Services Fee, and \$75,000 is supported by the General Fund.

Capital Projects Overview

Specific funding levels associated with Paydown capital improvements include:

- ◆ An amount of \$250,000 is included to continue the replacement and upgrading of Fairfax County Public Schools (FCPS) athletic field lighting systems at middle and high schools used by many County organizations. Funding supports a replacement and repair schedule, as well as improvements to bring existing lighting systems up to new standards. FY 2020 funding supports the replacement and repair for one field's existing lighting systems. This project is supported entirely by the General Fund and coordinated by the Department of Neighborhood and Community Services.
- ◆ An amount of \$2,250,000 is included for the turf field replacement program in FY 2020. Funding of \$800,000 is supported by Athletic Service Fee revenue and \$1,450,000 is supported by the General Fund. There are a total of 92 synthetic turf fields throughout the County, of which 24 are FCPS stadium fields and 68 are County Parks/FCPS non-stadium fields. There are over 130,000 youth and adult participants (duplicated number) annually that benefit from rectangular turf fields. Funding is required to address the growing need for field replacement and to support a replacement schedule over the next 10 years. If turf fields are not replaced when needed, they may need to be closed for safety reasons. Most manufacturers provide an 8-year warranty for a properly maintained synthetic turf field; however, it is a generally accepted practice to assume a life expectancy of the synthetic turf field of no more than 10 years. For planning purposes, the County adopted an annual budget estimate of a little more than half of the installation funding, which is a generally accepted practice for the industry. The current projected replacement cost per field is approximately \$450,000. Based on a projected 10-year replacement cycle and the current 68 County field inventory, replacement funding requires a regular financial commitment. Therefore, staff developed a 10-year replacement plan for the current inventory which requires revenue from the Athletic Fee and the General Fund support.

Park Inspections, Maintenance and Infrastructure Upgrades

FY 2020 funding in the amount of \$2,700,000 has been included for Park facilities and grounds, an increase of \$50,000 over the [FY 2019 Adopted Budget Plan](#). The Park facilities maintained with General Fund monies include but are not limited to: rental properties, historic properties, nature centers, maintenance facilities, sheds, shelters, and office buildings. Park priorities are based on the assessment of current repair needs including safety and health issues, facility protection, facility renewal and improved services. In addition, Park maintenance requirements are generated through scheduled preventative maintenance or from user requests for facility alterations. Without significant reinvestment in buildings and grounds, older facilities can fall into a state of ever decreasing condition and functionality, resulting in increased maintenance and repair costs in the future. Preventative and repair work is required for roofs, HVAC, electrical and lighting systems, fire alarm systems and security systems. Funding is essential to the maintenance and repair of building stabilization, including infrastructure replacement and upgrades at 551,091 square feet of non-revenue supported Park Authority structures and buildings. Maintenance is also required on over 580 pieces of grounds equipment. Specific projects funded in FY 2020 include:

Facility Maintenance

- ◆ An amount of \$476,000 is provided to fund annual requirements for Parks grounds at non-revenue supported parks. The Park Authority is responsible for the care of a total park acreage of 23,512 acres of land, with 427 park site locations. This funding is used for mowing and other grounds maintenance, as well as arboreal services. Arboreal services are provided in response to Park staff and citizens' requests and include pruning, removal and inspections of trees within the parks. There has been a rise in staff responses to requests for the inspection and removal of hazardous or fallen trees within the parks and those that may pose a threat to private properties.

Capital Projects Overview

- ◆ An amount of \$484,000 is included to provide corrective and preventive maintenance and inspections at over 551,091 square feet at non-revenue supported Park Authority structures and buildings. This maintenance includes the scheduled inspection and operational maintenance of HVAC, plumbing, electrical, security and fire alarm systems. This funding is critical in order to prevent the costly deterioration of facilities due to lack of preventative maintenance.

Infrastructure Replacement and Upgrades (Paydown)

- ◆ An amount of \$925,000 is included for general park infrastructure replacement and upgrades at non-revenue supported Park facilities. Repairs and replacements support building systems at or beyond life expectancy which are experiencing significant annual maintenance. These requirements include: various roof replacements and/or repairs on outdoor public restrooms and picnic shelters (\$200,000); replacement of fire and security systems at historic sites, nature centers, and maintenance facilities including the addition of freeze and water monitoring sensors to several historic sites (\$125,000); replacement of windows, doors, and siding at picnic shelters, outdoor restrooms, and historic sites (\$150,000); replacement of HVAC equipment at Nature Centers, Visitor Centers, and Maintenance Shops (\$250,000) and the stabilization or repairs of buildings at properties conferred to the Park Authority (\$200,000).
- ◆ An amount of \$815,000 is included to provide improvements and repairs to park facilities and amenities including playgrounds, trails and bridges, athletic courts, fences, picnic shelters, parking lots and roadways. In addition, funding will provide for annual reinvestment to 327 miles of trails and replacement of un-repairable wooden bridges with fiber glass bridges to meet county code. FY 2020 funding represents an increase of \$50,000 to address trail reinvestment throughout the park system. This increase is consistent with annual increases to county-wide trail reinvestment funding.

Environmental Initiatives

FY 2020 funding of \$916,615 has been included for environmental initiatives, an increase of \$381,615 over the FY 2019 Adopted Budget Plan. FY 2020 projects were selected based on the project selection process supported by the Environmental Quality Advisory Council (EQAC). The selection process includes the application of specific project criteria, review of proposals from County agencies, and identification of projects for funding. Specific funding levels include:

- ◆ An amount of \$250,000 is included to continue the Invasive Management Area (IMA) program. The Park Authority manages this volunteer program, as well as other invasive removal initiatives. These programs restore hundreds of acres of important natural areas, protect tree canopy, and reach thousands of volunteers. Currently more than 20,000 trained volunteer leaders have contributed 67,000 hours of service since the program's inception in 2005, improving over 1,000 acres of parkland. This funding level represents an increase of \$50,000 to continue to implement portions of unfunded treatment plans to control non-native invasive vegetation at two high quality natural areas. Two hundred and forty acres will be treated at Ellick Park and Natural Area Preserve, as well as a 22-acre treatment plan at South Run District Park. The activities will ensure the ecological integrity of the three natural areas and prevent further degradation of their native communities.

Capital Projects Overview

- ◆ An amount of \$10,000 is included for the Green Purchasing Program. This program is designed to support limited term staff to assist in clearly specifying environmental attributes during the County's procurement process. Fairfax County has a current inventory of over 2,400 contracts and emphasizing environmental attributes such as recycling, energy efficiency, durability and reduced toxicity during the procurement process can contribute to the purchase of green products, creating fiscal and environmental savings.
- ◆ An amount of \$7,115 is included for the award-winning spring outreach programs. These programs reach thousands of people in the county and have a deep impact on many youth and adults. Programs include classroom presentations, outdoor learning experiences, outreach events and festivals, high school Envirothon competitions, rain barrel workshops, seedling sales, high school science fair project judging, stream monitoring, Enviroscene trainings, storm drain marking, the Sustainable Garden Tour and more.
- ◆ An amount of \$75,000 is included for the Watershed Protection and Energy Conservation Matching Grant Program. This program is intended to support energy education and outreach initiatives and promote community engagement around sustainability and conservation issues. Specifically, the program will provide financial incentives to empower civic associations, places of worship and homeowners through their associations to implement on-the-ground sustainability projects. The initiative will build on current programs that provide technical assistance, hands-on support, outreach and education to Fairfax County homeowners and residents. Projects will improve water quality, reduce greenhouse gas emissions and conserve energy and water. This funding level will support printing and materials, matching grants and one limited term full-time position to conduct outreach and education, site assessments, and inspections.
- ◆ An amount of \$10,000 is included for the Energy Action Fairfax (EAF) LED Light Bulb Exchange Program to support nine LED Lightbulb Exchange events. In the spring of 2018, EAF hosted seven LED Lightbulb Exchanges throughout the county in conjunction with the Fairfax County Public Library system. The LEDs that EAF distributed in 2018 were 60W equivalent, warm white and ENERGY STAR® certified. These LEDs use 85 percent less energy than a comparable "old" incandescent bulb and 33 percent less energy than a compact fluorescent light (CFL). In total, 8,000 LEDs were distributed in 2018 to approximately 1,600 people at seven events. Based on an average home's lighting consumption, use of these LEDs will result in annual avoidance of nearly 200,000 kilowatt hours (kWh) and energy savings of \$22,000. The avoided electricity use equates to approximately 280,000 pounds of carbon dioxide not being released into the atmosphere – about the same as taking 28 passenger vehicles off the road.
- ◆ An amount of \$41,500 is included for the *Watch the Green Grow* pilot program, which is an outreach and education program with the overarching goal of creating buffers surrounding natural areas by encouraging green behaviors on private property. The outcome will be a web map "snapshot" of stewardship activities of an informed citizenry that actively and voluntarily engages in behaviors that protect and enhance Fairfax County's natural areas and wildlife corridors. This project is designed as a public education project to increase residents' awareness of the value of public green spaces (especially wildlife corridors) and lead them to adopt small but important stewardship behaviors that will help buffer these places from urbanization stressors like invasive plants.

Capital Projects Overview

- ◆ An amount of \$138,000 is included for the installation of water smart web-based irrigation controllers at Green Spring Gardens. More than 30 acres is watered at Green Spring Gardens using 400 feet of hose and oscillating sprinklers. The current practice leads to an excess of inefficiencies. The new irrigation controller uses local weather data to automatically adjust watering times and saves water consumption by watering only when needed. The manufacturer estimates that smart irrigation technology can save 40 percent on water consumption.
- ◆ An amount of \$60,000 is included for the “Bike to Parks” bike rack installation pilot project. This pilot project will promote biking as a safe and reliable transportation choice for recreational destinations. The Park Authority will add 60 bike racks in approximately 15 parks and RECenters that are near countywide trails in two high density revitalization areas, Annandale and Richmond Highway. In addition to the bike racks installation at the collaboratively identified locations, this project will include public outreach, and targeted improvements such as adding bike lanes and connections at appropriate locations, and adding signage and wayfinding systems from major regional trails to the bicycle parking locations at park entrances.
- ◆ An amount of \$250,000 is included for energy efficiency and renewable energy systems to be incorporated into the Sully Woodlands Stewardship Education Center. The Stewardship Education Center will be an indoor/outdoor, state-of-the-art interpretive center, providing educational and visitor services in environmental stewardship, natural and cultural resource management activities, and land management of the Sully Woodlands region. A major goal of the program is to achieve net positive energy usage, meaning the facility must produce more energy than it uses. The building will be used as a demonstration tool educating the public about sustainable features used on the facility that could also be used at their homes.
- ◆ An amount of \$75,000 is included for Natural Landscape projects associated with the Natural Landscape Implementation Plan. Staff will identify cost-effective natural landscaping retrofit projects that apply natural landscaping concepts and techniques in the landscape design, implementation, and maintenance of County-owned properties and facilities. Natural landscaping is guided by locally native plant species and these materials can be used to protect and enhance existing natural resources, including soil and water; mitigate climate change, improve and preserve air quality; and contribute to resource conservation.

In addition, an amount of \$58,140 has been provided in Fund 10030, Contributory Fund, to continue partnering with two non-profit agencies to support tree planting efforts throughout the County.

Revitalization Maintenance

An amount of \$1,410,000 is included to continue routine and non-routine maintenance in five major commercial revitalization areas (Annandale, Route 1, Springfield, McLean and Baileys Crossroads) and provide landscaping maintenance associated with the Tyson’s Corner Silver Line area. The goal of this program is to provide an enhanced level of infrastructure and right-of-way features in these urbanizing areas to facilitate pedestrian movements and create a “sense of place.” Routine maintenance in the commercial revitalization areas currently includes grass mowing, trash removal, fertilization, mulching of plant beds, weed control, and plant pruning. Non-routine maintenance includes asset maintenance or replacement (e.g., trees, plants, bicycle racks, area signs, street furniture, bus shelter, drinking fountains) to sustain the overall visual characteristics of the districts. FY 2020 funding of \$950,000 will support revitalization area improvements such as maintenance and/or replacement of degraded and/or failing sidewalk and crosswalk pavers. Routine and non-routine repairs and recurring landscape maintenance are

Capital Projects Overview

also required in the Tyson's Corner Silver Line area along the Route 7 corridor, from Route 123 to the Dulles Toll Road. Routine maintenance includes landscape maintenance along the median and both sides of the road, trash removal, snow removal, and stormwater facility maintenance. This area is different from other Metro stations due to the County's responsibility to maintain 27 water quality swales under the raised tracks of the Silver Line located in VDOT right-of-way. Typical maintenance for the swales includes litter and sediment removal, vegetation care, and structural maintenance. FY 2020 funding of \$460,000 will support the Tysons Silver Line area. These two maintenance initiatives were previously budgeted in separate projects, however in FY 2020 the funding has been combined into one project to provide maximum flexibility and efficiency.

Payments and Contributions

- ◆ Funding of \$814,023 is included for the annual payment associated with the Salona property based on the Board of Supervisors' approval of the purchase of this conservation easement on September 26, 2005. The total cost of the property is \$18.2 million with payments scheduled through FY 2026.
- ◆ Funding of \$1,000,000 is included for the County's annual contribution to offset school operating and overhead costs associated with School-Age Child Care (SACC) Centers consistent with the FY 2019 Adopted Budget Plan funding level.
- ◆ Funding of \$2,572,715 is included for Fairfax County's contribution to the Northern Virginia Community College (NVCC). Funding provides for the continued construction and maintenance of various capital projects on college campuses within the NVCC system. The FY 2020 rate of \$2.25 per capita is applied to the population figure provided by the Weldon Cooper Center.

On-going Development Efforts

- ◆ An amount of \$150,000 is included to support payments to developers for interest earned on conservation bond deposits. The County requires developers to contribute funds to ensure the conservation of existing natural resources. Upon satisfactory completion of projects, the developer is refunded the deposit with interest. This estimate represents an increase of \$75,000 over the FY 2019 Adopted Budget Plan and is based on actual funding requirements in the past several years.
- ◆ An amount of \$95,000 is included to support the maintenance of geodetic survey control points for the Geographic Information System (GIS). This funding level represents an increase of \$20,000 from the FY 2019 Adopted Budget Plan and is based in actual requirements in recent years. This project also supports the development and maintenance of an interactive, GIS-based website that will provide convenient and cost effective monumentation information to the County's land development customers.
- ◆ Funding of \$300,000 is included to support the Developer Default program, consistent with the FY 2019 Adopted Budget Plan funding level. This project is necessitated by economic conditions surrounding the construction industry that result in some developers not completing required public facilities, including acceptance of roads by the state, walkways and storm drainage improvements. FY 2020 funding is supported by \$200,000 in General Fund monies and \$100,000 in anticipated developer default revenue based on the trend of 2-3 default projects being received annually.

Capital Projects Overview

County Infrastructure Replacement and Upgrades

Infrastructure Replacement and Upgrades support the long-term needs of the County's capital assets to maximize the life of County facilities, avoid their obsolescence, and provide for planned repairs, improvements and restorations to make them suitable for organizational needs. Fairfax County will have a projected FY 2020 facility inventory of over 11 million square feet of space (excluding schools, parks, and housing facilities). This inventory continues to expand with the addition of newly constructed facilities, the renovation and expansion of existing facilities and the acquisition of additional property. With such a large inventory, it is critical that a planned program of repairs and restorations be maintained. In addition, the age of a major portion of this inventory of facilities is reaching a point where major reinvestments are required in the building subsystems.

Each year, the Facilities Management Department (FMD) prioritizes and classifies infrastructure replacement and upgrade projects into five categories. Projects are classified as Category F: urgent/safety related, or endangering life and/or property; Category D: critical systems beyond their useful life or in danger of possible failure; Category C: life-cycle repairs/replacements where repairs are no longer cost effective; Category B: repairs needed for improvements if funding is available, and Category A: good condition.

The requirement for County infrastructure replacement and upgrades is estimated at \$26 million per year. This estimate is based on current assessment data, as well as industry standards (2 percent of the current replacement value). Based on current staffing levels, the complexity of many of the projects, and the timeline for completing replacement and upgrade projects, it is estimated that approximately \$15 million per year would be a good funding goal. Due to budget constraints, there is no funding included in FY 2020 in this fund. However, an amount of \$8,538,000 is anticipated to be funded as part of the *FY 2019 Third Quarter Review* or *FY 2019 Carryover Review*. In recent years, it has been the Board of Supervisors' practice to fund some or all of the infrastructure replacement and upgrade projects using one-time funding as available as part of quarterly reviews. These projects, all Category F, will address emergency building repairs, fire alarm system replacement, HVAC system upgrades, roof repairs and waterproofing, elevator repairs, and electrical system upgrades/repairs.

Americans with Disabilities Act (ADA) Compliance

FY 2020 funding in the amount of \$650,000 has been included for the continuation of Americans with Disabilities Act (ADA) improvements, an increase of \$650,000 over the FY 2019 Adopted Budget Plan. Specific funding levels in FY 2020 include:

- ◆ Funding in the amount of \$300,000 is included for FMD to provide ADA improvements at County owned facilities. As buildings and site conditions age, additional annual ADA compliance work is required. For example, over time sidewalks may settle or erosion occurs changing the slope and creating gaps or obstructions, program usage changes can result in new physical barriers, or pedestrian entrance ramps can deteriorate based on heavy usage. FMD is continually reviewing building conditions and prioritizing to ensure the greatest needs are addressed.
- ◆ Funding in the amount of \$300,000 is included for the continuation of Park Authority ADA improvements to support Park Authority Transition Plan requirements. The Parks Authority continues to complete ADA improvements to facilities which were identified as part of the Department of Justice required self-assessments identified in the settlement of agreement signed by the Board of Supervisors on January 28, 2011.

Capital Projects Overview

- ◆ Funding in the amount of \$50,000 is included for the continuation of ADA improvements at Housing facilities required as facilities age and change. Funding will provide flexibility to accommodate emerging needs.

Reinvestment and Repairs to County Roads and Walkways

- ◆ An amount of \$800,000 is included for the Reinvestment, Repair, and Emergency Maintenance of County Roads. The County is responsible for 38 miles of roadways not maintained by VDOT. The FY 2020 funding level represents an increase of \$100,000 over the FY 2019 Adopted Budget Plan based on recommendations included in the 2015 Rinker Study. This study was conducted in order to build an accurate inventory and condition assessment of County-owned roads and service drives and identified an amount of \$4 million in reinvestment funding required for the roadways with the most hazardous conditions. It is anticipated that funding for the \$4 million reinvestment program will be supported by funding from the allocation of the Capital Sinking Fund. Annual investment funding was also identified and is recommended to increase each year. Annual funding supports pothole repair, drive surface overlays, subgrade repairs, curb and gutter repairs, traffic and pedestrian signage repairs, hazardous tree removal, grading, snow and ice control, patching of existing travelways, minor ditching and stabilization of shoulders, and drainage facilities. The FY 2020 annual funding level is consistent with the recommendation of the Rinker Study.
- ◆ An amount of \$700,000 is included to meet emergency and critical infrastructure requirements for County trails, sidewalks and pedestrian bridges. The Department of Public Works and Environmental Services (DPWES) and the Fairfax County Department of Transportation are responsible for the infrastructure replacement and upgrades of 678 miles of walkways and 76 pedestrian bridges. Ongoing critical repairs include the correction of safety and hazardous conditions such as the damaged trail surfaces, retaining wall failures, handrail repairs, and the rehabilitation of bridges. The FY 2020 funding level represents an increase of \$100,000 over the FY 2019 Adopted Budget Plan based on recommendations included in the 2013 Rinker Study. This study was conducted in order to build an accurate inventory and condition assessment of County walkways and revealed that there are approximately 10 miles of trails in extremely poor condition requiring \$3 million in initial reinvestment. The \$3 million reinvestment program was supported by funding from the allocation of the Capital Sinking Fund and work continues on reinvestment associated with deteriorating trails throughout the County. In addition, the Rinker Study did not include an assessment of pedestrian bridges and sinking fund allocations have enable some progress in this area. Annual investment funding was also identified and is recommended to increase each year. The FY 2020 annual funding level is consistent with the recommendation of the Rinker Study.

Capital General Obligation Bond Program

The Board of Supervisors annually reviews cash requirements for capital projects financed by General Obligation bonds to determine the ongoing schedule for construction of currently funded projects as well as those capital projects in the early planning stages. The bond capital program is reviewed annually by the Board of Supervisors in association with the Capital Improvement Program (CIP) and revisions are made to cashflow estimates and appropriation levels as needed. The CIP is designed to balance the need for public facilities as expressed by the countywide land use plan with the fiscal capability of the County to meet those needs. The CIP serves as a general planning guide for the construction of general purpose, school, and public facilities in the County. The County's ability to support the CIP is entirely dependent

Capital Projects Overview

upon and linked to the operating budget. The size of the bond program in particular is linked to the approved General Fund disbursement level.

The Virginia Constitution requires that long-term debt pledged by the full faith and credit of the County can only be approved by voter referendum. There is no statutory limit on the amount of debt the voters can approve. It is the County's own policy to manage debt within the guidelines identified in the *Ten Principles of Sound Financial Management*. The *Ten Principles* specifically indicate that debt service expenditures as a percentage of General Fund disbursements should remain under 10 percent and that the percentage of debt to estimated market value of assessed property should remain under 3 percent. The County continues to maintain these debt ratios with debt service requirements as a percentage of General Fund disbursements at 8.20 percent, and net debt as a percentage of market value at 1.15 percent as of June 30, 2018.

Continual monitoring and adjustments to the County's CIP have been necessary, as economic conditions have changed. The FY 2020 – FY 2024 Advertised Capital Improvement Program (With Future Fiscal Years to 2029) is released concurrently with the FY 2020 Budget. It should be noted that the operating budget is directly affected by the approval of the capital budget and its capital project components. The operating budget must support the debt service costs of all bond issues related to the capital budget, as well as the operating maintenance costs for each facility and improvement.

In FY 2020, an amount of \$208,000,000 is included in General Obligation Bond funding. Specific funding levels in FY 2020 include:

- ◆ Funding in the amount of \$180,000,000 is included for various school construction projects financed by General Obligation Bonds. For details of the specific proposed school projects, see the Fairfax County Public School's FY 2020 Advertised Budget.
- ◆ Funding in the amount of \$25,000,000 is included to support the 117-mile Metrorail system as well as to maintain and/or acquire facilities, equipment, railcars and buses.
- ◆ Funding of \$3,000,000 is included for the County's annual contribution to the Northern Virginia Regional Park Authority (NVRPA) Capital program. The NVRPA Park system includes 33 parks and over 12,884 acres of land, over 100 miles of trails, numerous historic sites, five waterparks, two family campgrounds, three golf courses, a nature center, botanical gardens, rental cabins and cottages, five marinas.

Stormwater Management Program

Stormwater Services are essential to protect public safety, preserve property values and support environmental mandates such as those aimed at protecting the Chesapeake Bay and the water quality of other local jurisdictional waterways. Projects include repairs to stormwater infrastructure, measures to improve water quality such as stream stabilization, rehabilitation, safety upgrades of state regulated dams, repair and rehabilitation of underground pipe systems, surface channels, flood mitigation, site retrofits and best management practices (BMP), and other improvements.

The Board of Supervisors approved a special service district to support the Stormwater Management Program as part of the FY 2010 Adopted Budget Plan. This service district provides a dedicated funding source for both operating and capital project requirements, by levying a service rate per \$100 of assessed real estate value, as authorized by Code of Virginia Ann. Sections 15.2-2400. In FY 2014, a five-year spending plan was approved to gradually increase both funding and staffing for the Stormwater Program.

Capital Projects Overview

The five-year plan was developed to support anticipated regulatory increases through a phased approach and was supported by increasing the service district rate by \$0.0025 per year, a little over \$1/month for the median single family house. The ultimate goal of a fully funded program was projected to be \$0.0400 per \$100 of assessed real estate value. FY 2019 represents the final year of the five-year spending plan and the rate is currently \$0.0325 per \$100 of assessed value. Staff has made significant progress in the implementation of watershed master plans, public outreach efforts, stormwater monitoring activities and operational maintenance programs related to existing storm drainage infrastructure including stormwater conveyance, quality improvements, and regulatory requirements. Therefore, staff is recommending that the FY 2020 stormwater service rate remain at the current rate of \$0.0325 per \$100 of assessed real estate value.

FY 2020 funding will support \$56,586,444 for capital project implementation including, infrastructure reinvestment, regulatory requirements, dam safety, and contributory funding requirements. Specific funding levels in FY 2020 include:

- ◆ Funding in the amount \$7,000,000 is included for the Stormwater Regulatory Program. The County is required by federal law to operate under the conditions of a state issued MS4 Permit. Stormwater staff annually evaluates funding required to meet the increasing federal and state regulatory requirements pertaining to the MS4 Permit requirements, and State and Federal mandates associated with controlling water pollution delivered to local streams and the Chesapeake Bay. The MS4 Permit allows the County to discharge stormwater from its stormwater systems into state and federal waters. The County currently owns and/or operates approximately 6,800 regulated outfalls within the stormwater system that are governed by the permit. The current permit was issued to the County in April 2015. The permit requires the County to document the stormwater management facility inventory, enhance public outreach and education efforts, increase water quality monitoring efforts, provide stormwater management and stormwater control training to all County employees, and thoroughly document all of these enhanced efforts. The permit also requires the County to implement sufficient stormwater projects that will reduce the nutrients and sediment delivered to the Chesapeake Bay in compliance with the Chesapeake Bay TMDL implementation plan adopted by the State.
- ◆ Funding in the amount of \$9,000,000 is included for Dam Safety and Facility Rehabilitation, including \$3,000,000 for dam maintenance and \$6,000,000 for rehabilitation. There are currently more than 6,700 stormwater management facilities in service that range in size from small rain gardens to large state regulated flood control dams. The County is responsible for inspecting both County owned and privately owned facilities and for maintaining County owned facilities. This inventory increases annually and is projected to continually increase as new development and redevelopment sites are required to install stormwater management controls. This program maintains the control structures and dams that control and treat the water flowing through County owned facilities. This initiative also includes the removal of sediment that occurs in both wet and dry stormwater management facilities to ensure that adequate capacity is maintained to treat the stormwater. The program results in approximately 50 projects annually that require design and construction management activities as well as contract management and maintenance responsibilities. Total funding in the amount of \$9.0 million is included for Dam Safety and Facility Rehabilitation in FY 2020, including \$3.0 million for maintenance and \$6.0 million for rehabilitation.

Capital Projects Overview

- ◆ Funding in the amount of \$8,500,000 is included for Conveyance System Inspections, Development and Rehabilitation in FY 2020, including \$2,000,000 for inspections and development and \$6,500,000 for rehabilitation and outfall restoration. The County owns and operates approximately 1,500 miles of underground stormwater pipes and improved channels with an estimated replacement value of over one billion dollars. The County began performing internal inspections of the pipes in FY 2006. The initial results showed that more than 5 percent of the pipes were in complete failure and an additional 15 percent required immediate repair. Increased MS4 Permit regulations apply to these 1,500 miles of existing conveyance systems, 6,700 stormwater structures, and a portion of the immediate downstream channel at the 6,800 pipe outlets. Acceptable industry standards indicate that one dollar re-invested in infrastructure saves seven dollars in the asset's life and 70 dollars if asset failure occurs. Once the initial internal inspections are complete, the goal of this program is to inspect pipes on a 20-year cycle and rehabilitate pipes and improved outfall channels before total failure occurs.
- ◆ Funding in the amount of \$25,623,984 is included for Stream and Water Quality Improvements. This program funds water quality improvement projects necessary to mitigate the impacts to local streams and the Chesapeake Bay resulting from urban stormwater runoff. This includes water quality projects such as construction of stormwater management ponds, implementation of low impact development techniques on stormwater facilities, stream restoration, and approximately 1,900 water quality projects identified in the completed countywide Watershed Management Plans. In addition, Total Maximum Daily Load (TMDL) requirements for local streams and the Chesapeake Bay are the regulatory process by which pollutants entering impaired water bodies are reduced. The Chesapeake Bay TMDL was established by the EPA and requires that MS4 communities as well as other dischargers implement measures to significantly reduce the nitrogen, phosphorous and sediment loads entering waters draining to the Bay by 2025. Compliance with the Bay TMDL requires that the County should undertake construction of new stormwater facilities, retrofit existing facilities and properties, and increase maintenance. The EPA is currently updating the Bay model and it is anticipated that the update will result in changes to both the assigned targets as well as how projects are credited, which will likely impact future compliance estimates. In addition to being required to meet Bay TMDL targets, the current MS4 Permit requires the County to develop and implement action plans to address local impairments. Most of the 1,900 watershed management plan projects contribute toward achieving the bay and local stream TMDL requirements.
- ◆ Funding in the amount of \$5,000,000 is included for the Emergency and Flood Control Program. This program supports flood control projects for unanticipated flooding events that impact storm systems and flood residential properties. The program provides annual funding for scoping, design, and construction activities related to flood mitigation projects.
- ◆ Funding in the amount of \$800,000 is included for the Stormwater Allocations to Towns project. On April 18, 2012, the State Legislature passed SB 227, which entitles the Towns of Herndon and Vienna to all revenues collected within their boundaries by Fairfax County's stormwater service district. An agreement was developed for a coordinated program whereby the Towns remain part of the County's service district and the County returns 25 percent of the revenue collected from properties within each town. This allows for the towns to provide services independently such as maintenance and operation of stormwater pipes, manholes, and catch basins. The remaining 75 percent remains with the County and the County takes on the responsibility for the Towns' Chesapeake Bay TMDL requirements as well as other TMDL and MS4 requirements. This provides for an approach that is based on watersheds rather than on jurisdictional lines.

Capital Projects Overview

- ◆ Lastly, FY 2020 funding of \$662,460 is included for County contributions. An amount of \$527,730 is provided for the Northern Virginia Soil and Water Conservation District (NVSWCD). The NVSWCD is an independent subdivision of the Commonwealth of Virginia that provides leadership in the conservation and protection of Fairfax County's soil and water resources. It is governed by a five-member Board of Directors, three of whom are elected every four years by the voters of Fairfax County and two who are appointed by the Virginia Soil and Water Conservation Board. Accordingly, the work of NVSWCD supports many of the environmental efforts set forth in the Board of Supervisors' Environmental Excellence 20-year Vision Plan. The goal of the NVSWCD is to continue to improve the quality of the environment and general welfare of the citizens of Fairfax County by providing them with a means of dealing with soil, water conservation and related natural resource problems. It provides County agencies with comprehensive environmental evaluations for proposed land use changes with particular attention to the properties of soils, erosion potential, drainage and the impact on the surrounding environment. NVSWCD has consistently been able to create partnerships and leverage state, federal and private resources to benefit natural resources protection in Fairfax County. In addition, an amount of \$134,730 is provided for the Occoquan Watershed Monitoring Program (OWMP) to ensure that water quality is monitored and protected in the Occoquan Watershed. Given the many diverse uses of the land and water resources in the Occoquan Watershed (agriculture, urban residential development, commercial and industrial activity, water supply, and wastewater disposal), the OWMP plays a critical role as the unbiased interpreter of basin water quality information.

The Penny for Affordable Housing Fund

The Penny for Affordable Housing, formerly known as the Housing Flexibility Fund, was established in FY 2006 and is designed to serve as a readily available local funding source with the flexibility to preserve and promote the development of affordable housing. For fiscal years 2006 through 2009, the Board of Supervisors dedicated revenue commensurate with the value of one cent from the Real Estate tax rate to the Preservation of Affordable Housing, a major County priority. In FY 2010, the Board of Supervisors reduced annual funding to The Penny for Affordable Housing, by 50 percent in order to balance the budget. From FY 2006 through FY 2019, the fund has provided a total of \$234.8 million for affordable housing in Fairfax County.

A total of 3,016 affordable units have been preserved for both homeownership and rental purposes in a variety of large and small projects. Of that number, 252 units are preserved as affordable housing for periods of five years or less, and 2,764 units are preserved for 20 years or longer. A variety of funding sources were used to preserve these units; however, The Penny for Affordable Housing funds were critical for the preservation of several large multifamily complexes purchased by private nonprofits and for-profit organizations. These purchases represent a significant portion of the units: 319 units in Janna Lee Villages in the Hybla Valley area (Lee District), 148 units in Hollybrooke II and III in the Seven Corners area of Falls Church (Mason District), 105 units in Coralain Gardens located on Arlington Boulevard (Route 50) in Falls Church (Mason District), 90 units in Sunset Park Apartments in Falls Church (Mason District), 130 units at Mount Vernon House in Alexandria (Mount Vernon District), 216 units in Madison Ridge in Centreville (Sully District), 74 units in Wexford Manor A and B (Providence District), and 113 units in Huntington Gardens (Lee District). These funds were also instrumental in preserving two large complexes: 180 units at the Crescent apartment complex in Reston (Hunter Mill District) and 672 units at the Wedgewood Apartments complex in Annandale (Mason District). These projects were purchased by the County and are being managed by the Fairfax County Redevelopment and Housing Authority (FCRHA) as part of the low- and moderate-income rental program. Without the availability of The Penny for Affordable Housing, both of these apartment complexes may have been lost as affordable housing.

Capital Projects Overview

In FY 2020, funding of \$18,400,000 is allocated as follows: \$5,750,575 for Wedgewood for the annual debt service, \$2,689,188 for Crescent Apartments annual debt service, \$9,395,237 for the Housing Blueprint Project, and \$565,000 for Affordable/Workforce Housing.

Wastewater Management System

The Fairfax County Wastewater Management Program is operated, maintained, and managed within the Department of Public Works and Environmental Services (DPWES), and includes nearly 3,247 miles of sewer lines, 63 pumping stations, and 57 flow metering stations, covering approximately 234 square miles of the County's 407-square-mile land and water area. Treatment of wastewater generated is provided primarily through six regional wastewater collection and treatment plants. One of the six regional plants is the County owned and operated Noman M. Cole, Jr. Pollution Control Plant (NCPCP), which is currently permitted to treat 67 million gallons per day (MGD) of flow. By agreement, other regional facilities include the Alexandria Renew Enterprises (AlexRenew) Treatment Plant, the Upper Occoquan Service Authority Plant, the District of Columbia Blue Plains Plant, Loudoun Water and the Arlington County Plant. Fairfax County utilizes all of these facilities to accommodate a total treatment capacity of 157 MGD.

Photo of the Noman M. Cole, Jr. Pollution Control Plant

Total FY 2020 funding is \$196,500,000, including support for the following projects:

- ◆ Funding of \$121,500,000 is included to support the reinvestment in the Noman Cole, Jr. Pollution Control Plant in order to maintain regulatory compliance requirements pertaining to the Clean Water Act, Chesapeake Bay Preservation Program and Title V of the Clean Air Act as enforced by the Virginia Department of Environmental Quality. The renovation program follows the plant's Master Plan to evaluate and prioritize projects. based on the current schedule of identified and active projects, these bond proceeds will support the capital projects through FY 2023. This funding will be supported by anticipated sewer revenue bonds.
- ◆ Funding in the amount of \$9,957,000 is included for facility improvements to the DC Water's Blue Plains Treatment Plant to comply with nutrient discharge limits. Projects supporting the Enhanced Nitrogen Removal Program include providing an additional 40 million gallons of new anoxic reactor capacity for nitrogen removal, a new post aeration facility, pump station, and other new facilities to store and feed methanol and alternative sources of carbon. In addition, funding will also provide for the Clean Rivers Project to prevent combined storm and sanitary overflows during major storm events by storing the overflow in tunnels until the plant has capacity to fully treat the water. This project is currently under construction. The County is responsible for 31 mgd of the 370 mgd or 8.38 percent of the capacity at the Blue Plains Treatment Plant.

Capital Projects Overview

- ◆ Funding in the amount of \$19,680,000 will fund the County's share of the upgrades to the Alexandria Renew Enterprises Treatment Plant (AlexRenew). Funding supports the design and construction of a State of the Art Nitrogen Upgrade Program (SANUP) for nitrogen removal. FY 2020 funding is included for engineering design, construction management, landscape architecture and engineering services during construction to comply with the nutrient discharge limits. The County is responsible for 32.4 mgd of the 54 mgd or 60 percent of the capacity at the Alexandria Renew Enterprises Treatment Plant.
- ◆ Funding in the amount of \$784,000 is included for plant upgrades at the Arlington Wastewater Treatment Plant. This funding will support annual repair and rehabilitation work for various facilities as scheduled in Arlington County's Capital Improvement Program. The County is responsible for 3.0 mgd of the 40 mgd or 7.5 percent of the capacity at the Arlington Wastewater Treatment Plant.
- ◆ Funding in the amount of \$19,260,000 is included for the continuation of systematic rehabilitation of structures and equipment at the Noman M. Cole, Jr. Pollution Control Plant (NMCPCP). FY 2020 funding will provide for the rehabilitation and replacement of pumps, gates, and valves; stormwater runoff improvements, and continuation of the rehabilitation of the motor control centers/distribution centers (MCC/DC) and raw wastewater pump station facility.
- ◆ Funding in the amount of \$1,000,000 is included to satisfy the annual appropriation requirement for the County's Extension and Improvement (E&I) Program as approved by the Board of Supervisors on April 12, 2011. This policy adjusts the Connection Charges such that the future cost of the E&I Program is shared equally between the County's Sewer Fund and the property owners seeking public sewer service, when the Health Department determines the properties' septic systems have failed.
- ◆ Funding in the amount of \$300,000 is provided for the systematic rehabilitation of the County's 3,247 miles of sanitary sewer lines. Rehabilitation includes, among other things, the use of trenchless technology to rehabilitate approximately 25 miles of sewer per year.
- ◆ Funding in the amount of \$931,000 is included to complete the rehabilitation of force mains at the Little Hunting Creek, Accotink, Mount Vernon, Langley High School, Ravenwood, Tyson's-Dodge, Waynewood I and II, Wellington I, and Riverwood.
- ◆ Funding in the amount of \$8,020,000 is included for the regularly scheduled repair, renovation, and replacement of pumping station equipment and facilities. There are five pumping stations scheduled to be in the design phase during FY 2020, including Accotink, Piney Branch, Oak Marr, Springfield Estates and Braddock Road. Eight pumping stations are scheduled to be in the construction phase during FY 2020, including Little Hunting Creek, Holmes Run, Central Intelligence Agency located in McLean, Wellington, Ravenwood, Langley Oaks, Weid, High Ridge and Lakevale.
- ◆ Funding in the amount of \$14,000,000 is included for the inspection, repair, and replacement of gravity sewers within the wastewater collection system. FY 2020 funding is provided for the closed circuit television (CCTV) inspection of more than 200 miles of sewer, the rehabilitation of over 35 miles of sewer using cured-in-place pipe (CIPP), and the repair and replacement of defective and aging gravity sewers. Initiatives include repairs for sewer sags and defective slipliners as well as replacements for large diameter infrastructure.

Capital Projects Overview

- ◆ Funding in the amount of \$410,000 is included for the condition assessment of 166 segments of 8 to 15-inch gravity sewer lines and provides recommendations for the rehabilitation and/or replacement alternatives. FY 2020 funding will provide for the next phase of this program, which includes construction work.
- ◆ Funding in the amount of \$258,000 is included for the condition assessment of 49 miles of sewer lines with a diameter of 15 inches or larger and provides recommendations for the rehabilitation and/or replacement alternatives. FY 2020 funding will provide for the next phase of this program which includes construction work.
- ◆ Funding in the amount of \$400,000 is included for the maintenance of the Robert P. McMath Facility that is the headquarters for the Wastewater Collection Division.

County and Regional Transportation Projects Fund

The County and Regional Transportation Projects Fund supports the County's implementation of new transportation projects and is funded by the commercial and industrial real estate tax for transportation and Northern Virginia Transportation Authority (NVTA) local tax revenues. The taxing authority for commercial and industrial real property was authorized under the Transportation Funding and Reform Act of 2007 (HB 3202), approved by the Virginia General Assembly on April 4, 2007, and implemented by the Board of Supervisors as part of the [FY 2009 Adopted Budget Plan](#). This revenue helps accelerate the County's implementation of roadway, transit and pedestrian projects.

HB 3202 allows localities to assess a tax on the value of commercial and industrial real estate and to use the proceeds on new transportation improvements. The County's FY 2020 rate is \$0.125 per \$100 of assessed value (the maximum allowed per state code), which will generate approximately \$56 million in revenue. This estimate is based on current projections in the commercial real estate market.

On April 3, 2013, the Virginia General Assembly approved HB 2313, a transportation funding package. The bill included regional components for planning districts that meet certain thresholds (population, registered vehicles, and transit ridership). Northern Virginia meets these criteria for the imposition of increases on Sales, Grantors, and Transient Occupancy taxes. The bill mandated that 70 percent of this regional funding be allocated by NVTA, with the remaining 30 percent provided to the individual localities embraced within NVTA for their determination. In FY 2018, HB 2313 generated approximately \$328 million in funding for transportation projects in the Northern Virginia region.

FY 2020 funding of \$45,251,990 is included for capital projects and metro capital program contribution. Of this amount, funding in the amount of \$31,251,990 is included in FY 2020 for priority projects supported by commercial and industrial tax revenue and funding received from the Northern Virginia Transportation Authority (NVTA), consistent with the transportation priorities periodically updated and approved by the Board of Supervisors. This amount also includes portions of NVTA local funding allocated to the Towns of Herndon and Vienna. Funding in the amount of \$14,000,000 is included to address WMATA capital funding requirements through the redirection of Grantors Tax and Transient Occupancy Tax revenues under HB 1539/SB 856. This is a new requirement following the 2018 Virginia General Assembly session and this contribution was not included in the [FY 2019 Adopted Budget Plan](#).

Capital Projects Overview

Other Financing

Funding in the amount of \$25,917,573 includes \$1,575,000 that is associated with projects discussed above including \$100,000 in developer default revenues and \$1,475,000 in athletic services fees. The remaining \$24,342,573 supports various other projects financed by other sources of revenue. Specific funding levels in FY 2019 include:

Special Revenue:

- ◆ Funding of \$226,000 is included for the Reston Community Center Fund for Phase II of the Roof Replacement Project, as well as the installation of a projection screen inside the theatre and warming oven at the Lake Anne facility.
- ◆ Funding of \$500,000 is included for I-95 Refuse Disposal Fund for I-95 Landfill New Service Road project.

Housing:

- ◆ Funding of \$198,265 is included for the Undesignated Housing Trust Fund project for reallocation to specific projects when identified and approved by both the Fairfax County Redevelopment and Housing Authority (FCRHA) and Board of Supervisors.
- ◆ Funding in the amount of \$600,000 is included for the Land/Unit Acquisition project for reallocation to specific projects when identified and approved by both the FCRHA and Board of Supervisors.

Other:

- ◆ Funding in the amount of \$22,818,308 is included for various school construction projects financed from a state construction grant, Parent Teachers Association/Parent Teacher Organization receipts, and transfers from Fund S31000, Public School Construction Fund. For more details, see the [Fairfax County Public School's FY 2020 Advertised Budget](#).

Capital Construction and Operating Expenditure Interaction

To maintain a balanced budget, annual revenues are projected and operating and capital construction expenditures are identified to determine the County's overall requirements and funding availability. Funding levels for capital construction projects are based on the merits of a particular project together with the available funding from all financing sources, with primary reliance on General Obligation bonds. The Board of Supervisors annually reviews cash requirements for capital project financing.

The County's capital program has a direct impact on the operating budget, particularly in association with the establishment and opening of new facilities. The Board of Supervisors continues to be cognizant of the effect of the completion of capital projects on the County's operating budget. The cost of operating new or expanded facilities or infrastructure is included in the fiscal year the facility becomes operational. However, in some cases, like the construction of the expanded and renovated Courthouse, the operating impact may be absorbed gradually over several years. For example, costs associated with loose and systems furniture, moving expenses, providing for additional security and staffing, renovating existing courtrooms, implementing new courtroom technology, and setting up an Operations and Maintenance satellite shop with staff dedicated to the courthouse facility are all costs that can be phased in over time, thus spreading the operating impact over a number of years, rather than concentrating costs in the fiscal year the facility opens.

Capital Projects Overview

Capital projects can affect future operating budgets either positively or negatively due to an increase or decrease in maintenance costs, or by providing capacity for new programs or services. Such impacts vary widely from project to project and, as such, are evaluated individually. Operating costs resulting from the completion of a capital project differ greatly depending on the type of capital project and construction delays. A new facility, for example, will often require additional staff, an increase in utility costs, and increases in custodial, security and maintenance contracts. Conversely, a capital project that renovates an existing facility may reduce operating expenditures due to a decrease in necessary maintenance costs. For example, funding HVAC and electrical system repair or replacement projects has the potential to reduce operating expenditures by reducing costly maintenance and staff time spent addressing critical system repairs. The same is true for projects such as fire alarms, emergency generators, and carpet replacement, as well as roof repairs. Investing in aging and deteriorating building systems and components can alleviate the need for future expenditures, often resulting in significant cost avoidance. Additionally, if a system failure should occur, there is the potential that a County facility must shut down, suspending services to citizens and disrupting County business. The County's emphasis on capital renewal and preventative maintenance works to ensure these kinds of interruptions are avoided.

The opening of new County facilities results in a wide range of operating costs. For example, equipment and furniture, a book buy, additional staff, and an increase in utility costs may all be necessary to prepare for the opening of a new library or extensive library expansion/renovation. These costs are estimated as the project is developed and included in the appropriate agency budget in the year the facility becomes operational.

New, Renovated, or Expanded County Facilities in FY 2020

Facility	Fiscal Year Completion	Additional Positions	Estimated Net Operating Costs
FY 2020 New, Renovated, or Expanded Facilities			
Facilities Management Department (FMD) Operational Costs for New Facilities	FY 2020	0/0.0 FTE	\$110,621
Bailey's Shelter	FY 2020	2/2.0	\$553,593
Artemis House	FY 2020	0/0.0	\$1,007,684
Lewinsville	FY 2020	3/3.0	\$433,651
South County Police Station/Animal Shelter	FY 2020	17/17.0	\$2,619,597
Total FY 2020 Costs		22/22.0 FTE	\$4,725,146

Capital Projects Overview

The following facilities are scheduled to open in the near future and may require additional staffing and operational costs through FY 2023. Requests for funding will be reviewed as part of the development of the annual budget in the year the facility becomes operational.

Facility	Fiscal Year Completion
Jefferson Fire Station	FY 2020
Bailey's Shelter	FY 2020
Lorton Fire Station	FY 2021
Reston Fire Station	FY 2021
Edsall Road Fire Station	FY 2021
Scotts Run (Tyson's East) Fire Station	FY 2021
Merrifield Fire Station	FY 2022
Woodlawn Fire Station	FY 2022
Patrick Henry Shelter	FY 2022
Eleanor Kennedy Shelter	FY 2022
Penn Daw Fire Station	FY 2022
Lorton Community Center	FY 2022
Embry Rucker Shelter	FY 2023
Police Heliport	FY 2023
Police Tactical Operations Renovation (Pine Ridge)	FY 2023
South County Police Station/Animal Shelter	FY 2023
Sully Community Center	FY 2023
Events Center	TBD
Original Mt. Vernon High School Redevelopment	TBD
Courtroom Renovations Phase III and IV	TBD
Reston Regional Library	TBD
RTCN Shelter and Human Services Center	TBD

Summary of FY 2020 Capital Construction Program

Major segments of the County's FY 2020 Capital Construction Program are presented in several pie charts that follow to visually demonstrate the funding sources for capital expenditures. Capital construction expenditures by fund are shown in the Summary Schedule of FY 2020 Funded Capital Projects. In addition, a list of all projects funded in FY 2020 and their funding sources has been included in this section. For additional information, see the Capital Project Funds section of the Capital Construction and Other Operating Funds in Volume 2. Detailed information concerning capital projects in Fund S31000, Public School Construction, can be found in the [Fairfax County Public School's FY 2020 Advertised Budget](#).

¹ The sale of bonds is presented here for planning purposes. Actual bond sales are based on cash needs in accordance with Board policy.

² Other financing includes developer contributions and payments, sewer system revenues, transfers from other funds, pro rata deposits, special revenue funds, and fund balances.

³ Reflects the capital construction portion of total expenditures.

⁴ As part of the FY 2010 Adopted Budget Plan, a service district was created to support stormwater management operating and capital requirements, as authorized by Code of Virginia Ann. sections 15.2-2400.

⁵ Reflects capital construction portion of Metro expenses net of State Aid.
