

## Response to Questions on the FY 2011 Budget

**Request By:** Supervisors McKay and Foust

**Question:** Please provide the percentage of taxpayers who would actually pay less at a real estate tax rate of \$1.09 up through a rate of \$1.12

**Response:** Just over 80 percent, or approximately 266,000 residential equalization real estate parcels, had an assessment decrease in calendar year 2010 (FY 2011).

At a real estate tax rate of \$1.09, approximately 175,000, or 54 percent, of residential equalization real estate parcels would pay less. The remaining 152,000 parcels, or 46 percent, would pay more.

At a real estate tax rate of \$1.10, approximately 148,000, or 45 percent, of residential equalization real estate parcels would pay less. The remaining 179,000, or 55 percent, would pay more.

At a real estate tax rate of \$1.11, approximately 125,000, or 38 percent, of residential equalization real estate parcels would pay less. The remaining 202,000 parcels, or 62 percent, would pay more.

At a real estate tax rate of \$1.12, approximately 108,000, or 33 percent, of residential equalization real estate parcels would pay less. The remaining 219,000 parcels, or 67 percent, would pay more.
