

Fund 69000 Sewer Revenue

Focus

All Availability Charges and Sewer Service Charges associated with the Wastewater Management Program are credited to this fund as system revenues. The total receipts from all revenue sources are used to finance the following: Operation and Maintenance (Fund 69010); Construction Improvement Projects (Fund 69300); Debt Service (Fund 69020); Subordinate Debt Service (Fund 69040); and Sewer Bond Construction (Fund 69310). Any remaining balance in Fund 69000, Sewer Revenue, is used for future year requirements and required reserves.

The Program’s Availability Charge and Sewer Service Charge are based on staff analysis and consultant recommendations included in the January 2018 Wastewater Revenue Sufficiency and Rate Analysis.

Availability Charges

The Availability Charge is a one-time charge to new customers for initial connection to the system. The revenue from the Availability Charge is used to offset the costs of expanding treatment facilities. In FY 2019, the Availability Charge will remain at \$8,100 for single-family homes based on current projections of capital requirements. Rates are based on requirements associated with treatment plant upgrades and interjurisdictional payments that result from population growth, more stringent treatment requirements and inflation.

The FY 2019 rate is consistent with the recommendations of the Department of Public Works and Environmental Services and the analysis included in the Wastewater Revenue Sufficiency and Rate Study Forecasted Period Fiscal Year 2018 through Fiscal Year 2023. Rates are expected to remain at the FY 2019 level through FY 2023. The following table displays the rates by category:

Category	FY 2018 Availability Charge	FY 2019 Availability Charge
Single Family	\$8,100	\$8,100
Townhouses and Apartments	\$6,480	\$6,480
Hotels/Motels	\$2,025	\$2,025
Nonresidential	\$405/fixture unit	\$405/fixture unit

Fund 69000

Sewer Revenue

Sewer Service and Base Charges

Sewer Service and Base Charges are revenues received from existing customers and are used to fully recover program operation and maintenance costs, debt service payments and capital project requirements attributable to improving wastewater treatment effluent quality as mandated by state and federal agencies. The five-year sewer rate plan approved by the Board of Supervisors as part of the FY 2018 Adopted Budget Plan proposed to increase the sewer charges by 4.9 percent in FY 2019. After a careful review, the Wastewater Management staff recommended no change from the FY 2019 rate, which will result in an annual increase of \$29.04 to the typical household. The Sewer Service Charge will increase from \$6.75 to \$7.00 per 1,000 gallons of water consumed based on Fairfax County’s winter quarter average consumption of 18,000 gallons.

The Base Charge will increase from \$27.62 per quarter to \$30.38 per quarter. The Base Charge provides for a more equitable rate structure by recovering a portion of the program’s fixed costs. The industry practice for a fixed charge revenue rate is 25 percent of operating revenues. The expected fixed charge revenue percentage in FY 2019 of 20.1 percent. The current system, including sewer lines, facilities, purchased capacity and equipment, is valued at approximately \$2.0 billion. Based on the age and required maintenance of the system, reinvestment must continue to be addressed. The implementation of the increases to the Base Charge will help ensure that all users of the system share in the fixed costs associated with reinvestment and operations.

Increases to both the Sewer Service Charge and Base Charge will change the annual average customer bill from \$596.48 in FY 2018 to \$625.52 in FY 2019, a cost increase of \$29.04 or 4.9 percent. The FY 2019 average bill in Fairfax County is one of the lowest compared to the average bill in other regional jurisdictions even with the proposed increases. The increases in the Sewer Service Charge and Base Charge will partially offset the increased costs associated with capital project construction, system operation and maintenance, debt service and upgrades to meet new, more stringent nitrogen discharge limitations from wastewater treatment plants.

Year	Sewer Service Charge Per 1,000 gallons water	Base Charge Per Quarterly Bill	Sewer Charges Percentage Increase	Fixed Charge Revenue Percentage
2018	\$6.75	\$27.62	NA	19.1%
2019	\$7.00	\$30.38	4.9%	20.1%
2020	\$7.34	\$33.42	5.9%	21.1%
2021	\$7.70	\$36.76	5.9%	22.0%
2022	\$8.08	\$40.44	6.0%	22.8%
2023	\$8.56	\$42.87	6.0%	23.3%

This level of revenue in FY 2019 will allow the system to meet permit conditions, meet and maintain all of the required financial targets through FY 2023, maintain competitive rates with neighboring utilities, continue to preserve its AAA bond rating, and require less debt to support capital projects.

The table on the next page reflects the Wastewater Management Program’s projected fiscal health in FY 2019 and FY 2020. The financial planning process incorporates the following indicators that are

Fund 69000 Sewer Revenue

interrelated and structured to identify the adequacy of rates from a cash flow, business, and compliance standpoint. These indicators are used by the rating agencies to determine the Program's credit rating.

Calculated Financial Indicators

Financial Indicator	Target	Achieved	FY 2019	FY 2020
Net Revenue Margin	37.0% to 50.0%	Yes	52.7%	54.1%
Days Working Capital ¹	150 to 200 days	Yes	153	153
Debt Coverage Senior	Min. 3.00x	Yes	4.09x	3.83x
Debt Coverage All-in	1.80x to 2.20x	Yes	2.11x	2.12x
Affordability (% of median income spent on sewer bill)	Less than 1.2%	Yes	0.5%	0.6%
Debt to Net Plant in Service	Below 40.0% Never above 50.0%	Yes	32.2%	32.8%
Outstanding Debt per Connection	Max \$3,000	Yes	\$1,600	\$1,645
Anticipated Sewer Bond Sales Through FY 2019				\$100 M

(1) The Days Working Capital financial indicator is exclusive of Availability Charges in Fund 69000, Sewer Revenue, and Fund 69300, Sewer Construction Improvements. It is calculated based on Operating Expenses and 360 days.

It is anticipated that the rates in FY 2019 will support the County's ability to maintain high bond ratings (AAA by Fitch Investor Service and Standard and Poor's Corporation and Aaa by Moody's Investors Service, Inc.) from the rating agencies. These high credit ratings have enabled the County to sell bonds on behalf of the Program at interest rates lower than those obtained by most sewer authorities, thereby achieving savings throughout the life of the bonds.

Changes to FY 2018 Adopted Budget Plan

The following funding adjustments reflect all approved changes in the FY 2018 Revised Budget Plan since passage of the FY 2018 Adopted Budget Plan. Included are all adjustments made as part of the FY 2017 Carryover Review, and all other approved changes through December 31, 2017.

- ◆ **Carryover Adjustments** **\$0**
 As part of the FY 2017 Carryover Review, the Board of Supervisors approved an increase of \$5,556 to the FY 2018 Transfers Out. This increase was necessary to provide a sufficient level to satisfy the legal reserve requirements for the 2009 Sewer Revenue Bonds, 2012 Sewer Revenue Bonds, 2014 Sewer Refunding Bonds, 2016 Sewer Refunding Bonds and 2017 Sewer Revenue Bonds. These reserves provide for one year of principal and interest as required by the Sewer System's General Bond Resolution.

Fund 69000

Sewer Revenue

¹ In order to account for revenues in the proper fiscal year, an audit adjustment in the amount of \$80,768.30 has been reflected as an increase to Interest on Investments in FY 2017. This audit adjustment is included in the FY 2017 Comprehensive Annual Financial Report (CAFR). Details of the audit adjustment will be included in the FY 2018 Third Quarter package.

² The Wastewater Management Program maintains fund balances at adequate levels relative to projected debt service requirements, operation and maintenance expenses and capital improvements.

³ The Operating and Maintenance Reserve provides for unforeseen expenses associated with sewer system emergencies. This reserve is targeted to be maintained at a level between \$25 and \$45 million. This level of reserve is based on an industry practice to maintain existing customer reserves at a level that can support 30 and 180 days of working capital and approximately 50 percent of one year's requirements for rehabilitation and replacement of the current system's assets.

⁴ The New Customer Reserve provides for debt service and administrative expenses associated with new customer debt, until such time as adjustments to availability charges can be accommodated. This reserve is based on payment expenses associated with one year of debt service and administrative expenses associated with new customer debt.

⁵ The Virginia Resource Authority Reserve was established in anticipation of debt service reserve requirements for Virginia Resource Authority loans related to future treatment plant issues.

⁶ The Capital Reinvestment Reserve is intended to address both anticipated and unanticipated increases within the Capital Improvement Program. This reserve will provide for significant rehabilitation and replacement of emergency infrastructure repairs. A reserve of 3.0 percent of the five-year capital plan is consistent with other utilities and is recommended by rating agencies. Based on the total five-year capital plan, an amount of \$30 million would be required to reach 3.0 percent.
