

Response to Questions on the FY 2019 Budget

Request By: Supervisor Herrity

Question: How many busses have a ridership of less than 20? Of these how many are because they are split feeder busses? (Facilities and Transportation Services)

Response: The following response was prepared by Fairfax County Public Schools (FCPS):

One bus can serve up to 4 schools (routes). Of the 5,006 general education routes, 4.2 percent or 212 (routes) have less than 20 students assigned. Two of which are split feeder bus routes. This is necessary due to the multiple out of boundary student placements and programs. Transportation's practice is to stay within a 60-minute bus ride, whenever possible.
