Who We Are

The Fairfax-Falls Church Community Services Board (CSB) serves the community as the public agency responsible for planning, organizing and providing services to person who have a mental illness, mental retardation, or a substance use disorder. Programs are directly operated or provided by private organizations and are licensed by the Virginia Department of Mental Health, Mental Retardation and Substance Abuse Services.

The CSB was established in 1969 by the joint action of Fairfax County and the Cities of Fairfax and Falls Church. The CSB functions as part of the Fairfax County Human Services system. The State Code requires that every jurisdiction in the Commonwealth of Virginia has a CSB.

Our Vision

People receive individualized, quality services when they need them in addition to active support and acceptance in the community.

Our Mission

The mission of the Fairfax-Falls Church Community Services Board is to:

- Serve Fairfax-Falls Church residents with or at risk of severe and persistent mental illness or acute psychiatric/emotional distress; mental retardation; or alcohol or drug abuse or dependency.
- Empower and support the people we serve to live self-determined, productive and valued lives within our community.
- Identify, develop and offer programs on prevention, intervention, treatment, rehabilitation, residential and other support services in a personalized, flexible manner appropriate to the needs of each individual and family whom we serve.

The Fairfax-Falls Church Community Services Board normally meets at 7:30 p.m. on the fourth Wednesday of each month. Meetings are held at the Fairfax County Government Center in Fairfax, Virginia and the public is invited to attend.

Call the Board Calendar at 703-324-7035, TTY 703-802-3015 or visit our web site at www.fairfaxcounty.gov/csb to confirm time and location.

Message from the Chair

This year our Annual Report focuses on activities supporting healthy lives for our consumers, their families and our community. During FY 2006 the Fairfax-Falls Church CSB continued its work in step with the Virginia Department of Mental Health, Mental Retardation and Substance Abuse Services Board's vision for the future: "Our vision is of a consumer-driven system of services and supports that promotes self-determination, empowerment, recovery, resilience, health and the highest possible level of consumer participation in all aspects of community life, including work, school, family, and other meaningful relationships. This vision also includes the principles of inclusion, participation, and partnership." We implemented transformation and recovery initiatives through programs and services that support infants, youth, adults and older adults.

To reach these important goals, the CSB used a Virginia Tobacco Settlement Foundation grant to train pre-school teachers to deliver evidenced-based, resiliency-focused childhood curriculum in many pre-school classrooms across our community. We supported mental health consumer empowerment through the initiation of a consumer-run drop-in center in the northwest part of Fairfax County. The CSB continued programs designed to divert individuals in need of substance abuse treatment and/or mental health services from jail into treatment. We are a proactive partner in planning and developing services for the County's Hypothermia Initiative to serve people who are homeless through innovative partnerships with private providers and multiple faith-based organizations. We also are involved in the citizen Long Term Care Coordinating Council to help older persons and people with disabilities to live full and independent lives in our community.

At the end of June 2006 the Fairfax County Board of Supervisors established the Josiah H. Beeman Commission named in honor of the late Ambassador Beeman, former CSB chair. This is in keeping with Chairman Beeman's vision to create a blue ribbon panel to look at the future direction and design of the public mental health system. The Commission consists of national, state, regional and local mental health experts, consumers, advocates and family members to, "bring fresh knowledge and perspective to the task of recommending a vision and blueprint for revamping/transforming the local mental health delivery system for Fairfax County, Fairfax City and the City of Falls Church." All of us look forward with anticipation to that expertise to speed the transformation of the mental health services system to further strengthen our system of services in support of consumer self-determination, partnership and recovery.

I wish to express my heartfelt thanks to the CSB Board members who have worked so hard and such long hours to support all our consumers in reaching towards and becoming active, achieving residents in our community.

Thank you!

A handwritten signature in cursive script that reads "Mary Ann Beall".

Mary Ann Beall
FY 2007 Chair

Infants and Toddlers

Accomplishments

- **ITC Grows!** – Between FY 2000 and FY 2006, service demand for Infant and Toddler Connection (ITC) increased by an average annual growth of 11.3%
- **Family Involvement and Support** – The number of families participating in ITC-sponsored parent support groups increased from eight families in FY 2004 to 33 families in FY 2007.
- **Prevention Grant Award for Preschool Program** – The CSB was awarded a three year grant totaling \$193,536 from the Virginia Tobacco Settlement Foundation. This capacity building project will train pre-school teachers in multiple preschool classrooms across the County to deliver an evidence-based resiliency-focused childhood curriculum called “Al’s Pals: Making Healthy Choices.”
- **Expanded Services for Youth** – Mental Health Services increased the number of groups for children ages 4-6, and corresponding parents groups; consolidated head start programming for youth ages 2-6 for better efficiency; expanded school-based services to nine pre schools to include individual and family treatment services, and consultation to school personnel.

- **Breaking Down Barriers to Treatment** – New Generations and the Recovery Women’s Center partnered to design a short-term intervention strategy for women in need of crisis stabilization but not long term residential substance use disorder services. The pilot has increased treatment options for women with infants and children.

Consumer & Family Stories

“Thanks to the great staff that support this program; it’s not just the money that I view as my support system, it’s you the human factor that makes it all happen.”
– Parent of child in Mental Retardation Services’ Family Support program

“When my daughter was born prematurely I was extremely concerned about her development. The therapists who worked with us were thoughtful and reassuring. I don’t think I could have gotten through this difficult time without them – nor do I think my daughter would have made the significant advances without them. They should be commended for their outstanding work with my daughter.” – Parent of child in Infant and Toddler Connection program

Children and Teens

Accomplishments

- **Innovative Youth Drug Court Program** – This program is a best-practice approach that helps youth move from being court-involved to productive community members. The Youth Drug Court is a collaborative effort between the Fairfax County Juvenile and Domestic Relations District Court and Alcohol and Drug Services. It is recovery focused and provides mandatory substance abuse treatment for juvenile offenders with substance abuse problems.
- **Statewide Achievement Award** – The Leadership and Resiliency Program (LRP) received an Achievement Award from the Virginia Municipal League for its entrepreneurial public sector efforts using revenue produced in nationwide training workshops as an investment in local programming. The CSB created this nationally recognized school and community-based program for high school students to enhance internal strengths while preventing involvement in substance use, related violence and other problem behaviors.
- **Meeting Quality Standards** – The CSB continues to demonstrate its commitment to quality services by meeting national standards for program excellence. The Sunrise Youth residential program has maintained its Commission on Accreditation of Rehabilitation Facilities (CARF) accreditation throughout the year. CARF accredits rehabilitation and human services providers in the U.S., Canada and Europe and requires compliance with rigorous guidelines for service and quality.

Consumer & Family Stories

“The entire agency has been very supportive in terms of helping me with Medicaid, Metro Access, and most especially job assessments. Our case manager has been wonderful to work with. I have the utmost respect for all of you, and, as a parent, I want to thank everyone for their hard work, patience, and support!” – Parent of an upcoming special education graduate going through school to work transition planning

“Our son has been in various programs over the past two years and Sunrise, with its caring staff, is the only one that has worked. This is a well-rounded program with great teachers, counselors and a psychiatrist on staff.” – Parent of adolescent with co-occurring disorder in the Sunrise program

“I wanted to thank you for all your help. Your assistance with everything (too much to mention) and all the times you listened to me go on and on about how much I believed that she could be better and yet didn’t know how to make it happen. We can’t say enough.” – Parent of child in Youth and Family Mental Health Services program

Adults

Accomplishments

- **Support and Services for Medicaid Waiver Eligible Individuals**

– The CSB was allocated 13 newly funded Mental Retardation Medicaid Waiver slots in FY 2006. For all case management services, Medicaid reimbursed the CSB more than \$2.6 million in FY 2006, or approximately 35 percent more than the FY 2005 total of \$1.9 million. Mental Retardation Services staff also worked to maximize Medicaid revenue by converting eligible individuals from County-funded services to Medicaid State Plan Option and Medicaid Waiver services.

- **Diversions from Jail to Treatment** – The CSB diversion programs are designed to divert individuals who need substance abuse treatment and/or mental health services from the jail to treatment. Nearly 350 consumers received services from the ADS Detoxification Diversion program and 59 adults with serious mental illness received services from the Mental Health Services Jail Diversion component.

- **“Housing First” Wins Award!** – The Housing First Program was named best housing program in Virginia in 2006 by the Virginia Department of Housing and Community Development and the Virginia Housing Development Authority. This award recognizes innovative services for those needing permanent housing. Housing First is a collaborative effort with the CSB, New Hope Housing and Pathway Homes, Inc.

- **Recovery Report** – In September 2005 the MHS Adult Outpatient Recovery Workgroup, which included staff, consumers, and family members, completed an extensive report on recovery. This report reviewed the various factors of recovery and assessed what was already being done well and what improvements were

needed related to recovery-based services in MHS Adult Services Outpatient/Case Management Services. There is ongoing work on implementing the recommendations.

- **Consumer Interviewers** – Another ongoing effort in FY 2006 was the Consumer Interviewers project. Consumers, family members and MHS Adult Services staff developed an interview tool that consumers would use to interview other consumers for their feedback about their experience with services in MHS Adult Services. An interview event was held at the Woodburn site. This effort will be continued by the Mental Health Services Recovery Workgroup in FY 2007.

- **Consumer-Run Drop-In Centers** – During this fiscal year, a consumer-run drop-in center was opened in the northwest section of the county. These centers are managed and staffed by consumers and provide an array of services to include: support groups, advocacy and job training and socialization opportunities. The goal of the consumer-run drop-in center is to provide consumer empowerment.

- **Employment Success** – Job training and support services were provided to over 1,100 individuals with mental retardation. The average annual earnings of 543 people surveyed were \$8,305 and their total gross earnings totaled \$4,509,413.
- **Access to Supports** – The CSB mobilized staff resources and launched a substantial initiative to provide education and support to consumers who were faced with complex decisions about Medicare Part D, and assisted many in getting enrolled in plans.

- **Support for Recovery** – Mental Health Services launched a Wellness Recovery Action Plan (WRAP) group. WRAP follows a “self-help” model which teaches concepts, skills and strategies to clients living with serious mental illnesses.
- **ADS Service Enhancements** – In order to meet changing treatment needs, numerous service enhancements were implemented, including services for people with co-occurring disorders at all outpatient sites, psychiatric medication capabilities and increasingly individualized service approaches.
- **FAITH Award for MHS** – Foundation for Appropriate and Immediate Temporary Help (FAITH) honored the MHS Special Populations Program with an award for its outstanding contributions. The program provided consultation and clinical support to the domestic violence program at the Islamic organization, FAITH. This program has also collaborated with Boat People SOS to implement a 3-year Substance Abuse and Mental Health Services Administration grant to provide mental health services to Vietnamese elders and their families. Boat People SOS assists Vietnamese refugees and immigrants with community programs.

Consumer & Family Stories

“I had lost everything – my family, my job, and my life – to addiction. Thanks to ADS, I have found my way back through the promise of recovery and a lot of hard work. I am so grateful to the staff and to the programs that exist in this community! While my life isn’t perfect, it’s all mine. For the first time since I can remember, I have hope and plans for the future.” – Consumer who completed treatment for a substance use disorder

“It has been a pleasure getting therapy sessions from you. Our sessions have been the most beneficial and extremely positive help in uplifting my life and spirit. Your understanding my culture and religion has been a valuable contribution to the sessions, it’s easier to relate with someone who knows. You have helped me focus on my good potential and helped me improve my self esteem. With the medication and our regular sessions, I have been able to get my job back and keep it.” – Consumer, Mental Health Services’ Adult Community Services

“I didn’t know recovery was possible until you all gave me the roadmap, and guided me along the way. You empowered me so that I could become a victor instead of victim.” – Consumer, Mental Health Services

Older Adults

Accomplishments

- **Geriatric Systems of Care Projects** – In FY 2006 in the Fairfax-Falls Church area, 88 persons in need of geriatric mental health services were placed outside of the County. The Northern Virginia Regional Strategic Planning Partnership and the Northern Virginia Aging Network have developed a comprehensive proposal that will effectively serve older adults in the community. An initiative is included to establish a demonstration project with area nursing homes. This project will create a community-based system of care for a population of older adults with significant infirmities of aging and mental illness, mental retardation and/or substance use disorder.

- **Commitment to Older Adults** – CSB provided ongoing staff support to the Long Term Care Coordinating Council (LTCCC), an appointed citizens council with the mission of enabling older adults and persons who have disabilities to live independent and full lives in the community through collaborated public and private services which also support their families and care givers. Staff from Alcohol and Drug Services, Mental Health Services and Mental Retardation Services were directly involved in supporting the activities of the LTCCC. This included a presentation to the LTCCC on a joint service partnership between the CSB and a non-profit minority community provider.

Consumer & Family Stories

“We first learned about the CSB when mom was in need of supports to stay in her home. Not only did we learn about your vital services, you helped connect us to an array of community resources! We are so appreciative for your help at a time when we needed it most.” – Family seeking Alcohol and Drug Services for another family member

“I was in despair and I appreciate so much the intelligence of my therapist, the professional feedback, and her ability to talk to me in a proactive way. I really felt that my therapist understood my problems. It was very stimulating for me. It is the best therapy I have ever had.” – Older Adults Family Program participant

“The counselors in my brother’s group home are most pleasant and caring in every way. My requests are always followed graciously and in a professional, pleasant manner. Any questions I have are always answered which gives me the impression that they are kept well-informed at all times. I cannot express in writing how grateful we are in the way he is being cared for.” – Sibling of a consumer in a Mental Retardation Services group home

Community Living

Accomplishments

- **Prevention Moves Forward!** – The CSB continues to partner with other agencies in the development of a system for prevention. This dynamic effort focuses on maximizing resources by targeting and developing services around key community issues.
- **Crisis Response** – The CSB was actively involved in providing on-site crisis services to Fairfax County residents who had lost their homes and/or were displaced by rain storms and flooding in the Huntington area of the County in June 2006. The CSB worked with other County departments, such as Police and Fire and Rescue to assure necessary mental health and supportive services were provided.
- **Warmth from the Cold** – The CSB has been a proactive partner in the planning and development of services for the County’s Hypothermia Initiative. The program serves people who are homeless and is an innovative partnership with private providers and multiple faith-based organizations.

- **Regional Strategic Planning Partnerships** – The CSB continues to actively participate in the development of a variety of regional initiatives as a way to further empower consumers, maximize resources and broaden service capacity. The Partnership has finalized plans to expand Residential Crisis Stabilization services, establish a Crisis Stabilization Team for persons with mental retardation and mental illness, extend Discharge Assistance services to more persons and significantly enhance consumer-run programs and related training.

- **Shared Mission with Housing Partners** – The CSB has partnered with the Robert Pierre Johnson Housing Development Corporation of the National Capital Area (RPJ Housing) to purchase and renovate a six bedroom home which will be used as a residential program for adults with mental retardation and related disabilities. The renovations will make the home fully accessible to include an accessible bathroom, kitchen, laundry room and accessible entrances.

- **Approved Human Services Facilities Bonds in Capital Improvement Program** – Following the 2004 voter approved bond referendum, design for three CSB mental health facilities’ improvements began. Construction is scheduled to be completed in 2009 and 2010. The facility improvements are:

- Gregory Drive Residential Treatment Facility – This site will be redeveloped with a newly constructed barrier free facility to meet physical accessibility requirements under the Americans with Disabilities Act and will expand the space to serve 16 adults with both mental illness and a substance use disorder.
- Mount Vernon Community Mental Health Center – This site will be renovated and updated and an addition will be built to accommodate a relocation of CSB services which will provide the community more efficient access to an array of services in one location.
- Woodburn Community Mental Health Center – The Center will be relocated to a newly constructed facility located in the mid-county area and will provide the community access to CSB services.

- **Forums on Self-Directed Services** – Mental Retardation Services partnered with The Arc of Northern Virginia to conduct three community forums to promote self-directed services, an alternative to traditional day support and employment programs that increase individual and family choice. The forums were attended by families as well as providers of day support and employment services and staff from the Fairfax-Falls Church and Arlington CSBs, Fairfax County Public Schools, The Arc of Northern Virginia and the Virginia Department of Mental Health, Mental Retardation and Substance Abuse Services.

- **Information Technology** – Accomplishments on behalf of staff, consumers and their families:

- To improve quality of clinical services, the CSB established the goal of achieving full electronic connectivity by 2010.
- To enhance the ability to bring services to the consumer, the CSB is increasing the number of laptops and wireless cards for staff use to complete their work in the field.
- To better capture outcomes, meet national standards and improve functionality, the CSB worked with state and national software users to identify needed changes to the CSB Electronic Health Record.
- To utilize staff time most effectively, the CSB provided leadership in state initiatives to streamline documentation requirements.

- **Building Consumer Capacity** – The CSB sponsored two consumers at a WRAP (Wellness Recovery Action Plan) training in the Tidewater area. These individuals will be offering WRAP groups for consumers. The consumers who were sponsored by the CSB reported excitement about the process and the training, as well as feeling that they were being given a chance to give to others and take pride in their abilities.

- **Volunteer Programs** – The CSB received over \$600,000 worth of volunteer support in FY 2006. The 2006 Virginia average hourly value of volunteer time determined by the Virginia Employment Commission is \$21.72. Based on that rate, the CSB estimates that in FY 2006, the value of services provided by the volunteers was worth \$616,848. Nearly 260 volunteers provided a total of 28,400 hours of services for CSB consumers and programs. Some of the activities included:

- The Great Falls Women’s Club has adopted the Women’s Shelter as their charity focus. In the past year, the Club provided volunteer support three nights a week to the Shelter’s Children’s program. They and several other groups also raised money for various projects for the women and children at the shelter.
- The Fairview Marriott staff provided their volunteer services for a day at Woodburn Place Crisis Care program cleaning, doing yard work and other projects as part of their “Spirit to Serve Our Community Day”.
- Volunteers coached clients in résumé writing and job seeking skills, taught computer classes and life skills to teens.

- **Universal Design and Barrier Free Housing for People with Disabilities** – Universal design is an approach to the development of “products and environments that can be used effectively by all people, to the greatest extent possible, without the need for adaptation or specialized design” (North Carolina State University, 1997). It is an inclusive process aimed at enabling all, whether or not a person has a disability, to experience the full benefits of a product and environment regardless of age, size, or ability.

In January 2005, the CSB began a technical study of the application of the concepts of Universal Design for group home development with plans to develop a prototype that can be shared with the public and private sector. An architectural firm began extensive research on accessible design and upon completion will submit floor plans and a technical manual with very specific guidance on best choices to accommodate the community.

- **CSB Collaborates with County on Pandemic Flu Plans** – A Pandemic Flu plan was created to help CSB consumers and the entire community to be better prepared in the event of a health emergency.

Consumer & Family Stories

“Prevention – stopping problems before they start – is a simple concept full of complexities. You have helped me understand. I can see how the CSB works hard to help people come together around prevention to intervene early and help build a strong community. Thanks!” – Community workshop participant

“Our daughter has severe mental retardation and will not fit into all settings because of her special needs. Your program sounds perfect for our daughter! We want to have her live with us and direct services from our home. Thanks for your flexible services designed to meet individual needs.” – Family member at Mental Retardation Services’ Forum on Self-Directed Services

Persons Served in FY 2006
