

TDP Revised (Alt 1) : Level of Service

The TDP Revised service alternative seeks a service concept that more efficiently serves major corridors in Tysons-Vienna. This service alternative alters daily spans and vehicle headways to create a more consistent service for riders. New route concepts are highlighted in red. The Revised TDP seeks to increase frequency on certain routes to provide a higher level bus service. Routes that are planned but not yet operating have an asterisk. Routes 660 and 680 are grant routes, subject to approval of funding.
