

County of Fairfax, Virginia

AMENDMENT

Date: August 8, 2024

PCS ID: 20240806-143

AMENDMENT NO. 6

CONTRACT TITLE: Next Generation 9-1-1 ESInet and Core Services

CONTRACTOR
AT&T Enterprise (AT&T)
P.O. Box 5095
Carol Stream, IL 60197-5095

SUPPLIER CODE
1000011437

CONTRACT NO.
4400007825

By mutual agreement, contract 4400007825 is hereby amended as follows:

- 1) To add the FirstNet ESInet back up circuits at the following rates:

AT&T FirstNet for ESInet backup - One time non-recurring fee \$5,200.00
AT&T FirstNet for ESInet backup - Monthly recurring charge \$800.00

The product description is attached herein as Attachment A.

The added products are governed by the existing contract terms and conditions related to ESInet.
No additional terms and conditions apply.

1. To renew for one (1) year effective August 8, 2024 through August 7, 2025 at existing prices, terms and conditions. This is the third of five renewal options.

The Contractor shall provide a current Certification of Insurance (COI) in accordance with the CONTRACT INSURANCE PROVISIONS, within ten (10) days after receipt of the executed amendment.

All other prices, terms and conditions remain the same.

This pricing extends for the duration of the Fairfax County Contract # 4400007825

FirstNet PSAP Backup solution description:

Each year, 9-1-1 centers in the U.S. receive an estimated 240 million calls. Today's technology allows people to communicate faster than ever. And public safety needs to communicate just as easily. The AT&T ESInet™ Next Generation 9-1-1 (NG9-1-1) call routing service now supports interconnection with the FirstNet® public safety broadband network to increase reliability.

With FirstNet, AT&T ESInet extends network connectivity to remote Public Safety Access Points (PSAPs) that may be experiencing an outage. FirstNet wireless connectivity provides a cost-effective alternative to special construction charges.

Private Mobile Connection:

AT&T ESInet™ uses the FirstNet Private Mobile Connection (PMC) service to allow:

- Highly secure connectivity between the PSAP and the AT&T national NG911 ESInet infrastructure
- AT&T ESInet to connect to PSAP endpoints to deliver IP-based 9-1-1 call traffic without using the public internet

And should AT&T ESInet detect a failure of the primary connection to the PSAP, the service automatically routes calls over the FirstNet connection.

This helps maintain continuity of operation and delivery of 9-1-1 calls.

This connection between NG911 and FirstNet creates a foundation for future connected 9-1-1 applications. This could allow 9-1-1 operators to share caller and incident information – like location, pictures and text – with first responders over a private, highly secure, end-to-end path.
