PROGRAM DESCRIPTION

The Human Services program includes services for individuals with mental illness, intellectual disability, and substance use disorders; child care services; and support to individuals and families who are homeless. The Fairfax-Falls Church Community Services Board, the Department of Family Services and the Office for Children, the Department of Neighborhood Community Services, Office to Prevent and End Homelessness, and the Health Department are the major providers of these services.

LINK TO THE COMPREHENSIVE PLAN

Fairfax County’s Comprehensive Plan has established a number of objectives and policies in order to:

- Develop human services centers to serve the eastern and western portions of the County.
- Provide for the residential needs of persons with mental illness, intellectual disability, and substance use disorders, through small and large supervised and supported residential services located Countywide.
- Develop adequate transitional housing for homeless families, and provide for the before- and after-school child care needs of 15 percent of children attending elementary schools.
- Locate public health offices to maximize accessibility to the service population.

CURRENT PROGRAM INITIATIVES

Over the past several years, the County has implemented a regional approach to the human service delivery system. This approach allows for drawing on regionally based staff from multiple agencies to respond to the needs of specific communities. This approach also has allowed Fairfax County to participate in the national trend to engage and serve the community more effectively. In addition, co-locating service providers in regional facilities has enabled the County to promote the one-stop shopping idea. It has also fostered collaboration and better flow of information among various service providers. Co-location of services has facilitated implementation of professional development initiatives for the work force that have helped improve the quality of services. The Human Services system is unique among the County service systems in that it not only delivers a wide spectrum of services through both private and public agencies, but also in that these services are delivered in a variety of settings including: private homes, satellite field offices, residential group homes, senior centers, health care facilities and regional co-located service centers.
The County continues to develop a comprehensive Human Services Capital Improvement Plan (CIP) with a vision that addresses efficient delivery of human services to meet individual and community needs and supports sensitivity to the trends most likely to influence and impact County government programs and services. These facilities are viewed as community focal points, instead of institutional government buildings. The goals of the Human Services CIP promote co-location of services and revitalization of communities by:

- Allowing future growth of the service areas that meet the community’s existing requirements and emerging needs identified through the socio-economic indicators as well as demographic parameters and trends;
- Providing efficient service delivery by co-locating appropriate service providers in a readily accessible and user-friendly environment and by strengthening communication and collaboration amongst Human Service agencies to achieve common goals. Service delivery centers need to strategically and comprehensively integrate the human element and work environment to optimize service delivery;
- Exercising principles of sound financial management and balancing the planned service delivery centers with the fiscal capacity of the County. The current commercially leased human services facilities may more effectively be replaced with County owned centers to reduce costs associated with service delivery; and
- Promoting economic vitality and supporting quality of life. The focus of future development is shifting from accommodating new growth to that of redevelopment and providing more lifestyle choices for an increasingly diverse population.

Fairfax County is expected to experience a steady increase in the number and percentage of persons age 65 and older due to longer life spans and the number of persons currently between 60 and 65 who are expected to remain County residents. This increase in the aging population will increase the demand for programs that provide support and respite for caregivers and care for those without family caregivers. It will also increase the need for adult day health care, community health care network and senior assisted living, as well as initiatives such as Program of All-Inclusive Care for the Elderly (PACE). Several CIP projects are currently in place to respond to the already occurring trends in the County.

Fairfax-Falls Church Community Services Board

The Fairfax-Falls Church Community Services Board (CSB) is the publicly-funded agency that plans, organizes and provides a system of services for residents of Fairfax County and the cities of Fairfax and Falls Church who have mental illness, substance use disorders, and/or developmental disabilities. The CSB also provides early intervention services for infants and toddlers who have, or are at risk of having, developmental delays. These services, as well as community outreach, education and prevention efforts, benefit the entire community. CSB staff and contracted service providers include psychiatrists, psychologists, nurses, counselors, therapists, case managers, peer specialists, and administrative and support staff, as well as over 2,000 dedicated volunteers and interns. The CSB partners with community organizations, schools, other Fairfax County agencies and many other groups to provide a safety net of vital services for the community’s most vulnerable residents. The CSB is mandated by state law, and operates as part of Fairfax County government's human services system. It is one of 40 such entities in the Commonwealth of Virginia, which has 39 Community Services Boards and one Behavioral Health Authority (BHA).

The CSB has refined its system-wide service structure in recent years to facilitate the provision of integrated treatment for individuals with complex needs and provide greater opportunities for sharing staff expertise, information and resources throughout the organization. Nationally, the average lifespan of people with serious mental illness is 25 years shorter than that of the general population, due to preventable, treatable diseases such as hypertension and diabetes. A key priority for the CSB is to improve overall health outcomes and access to primary health care services for the individuals it serves, many of whom have poor or no access to such services.

The CSB is operating in an increasingly challenging environment as the need for services escalates. As of July 1, 2016, CSBs throughout the Commonwealth, including the Fairfax-Falls Church CSB, became the single point of eligibility determination and case management for people with developmental disabilities. The CSB’s role and oversight responsibility has grown larger, and the number of people served will increase. This major change, and the resources it requires, impacts the entire agency. There
are approximately 2,000 Fairfax residents on the state waiting list for Medicaid Waivers, and approximately 1,000 of those are considered to have “urgent need.” The U.S. Department of Justice has mandated the Commonwealth to eliminate the waiting list by 2020.

The CSB has also documented a critical need for community-based treatment and residential services for persons with mental illness, substance use or co-occurring disorders who are aging or have intensive medical needs. Nearly one in twenty adults receiving ongoing CSB services is over the age of 60. The baby boom cohort is experiencing the onset of physical health issues associated with aging, yet they are expected to live longer than any previous generation. The population of persons age 65 and older in Fairfax County is projected to increase 70 percent between 2012 and 2030. Likewise, the population of aging adults with mental illness, substance use disorders and intellectual disabilities is projected to grow at a similar rate over the next 18 years. The combined mental health, medical and physical care concerns of this population will require the system to develop significant capacity for their specialized treatment and housing needs. The loss of market rate affordable housing, lack of rental subsidies, insufficient auxiliary grant rates for assisted living care and a dearth of physically accessible housing have hindered the development of these housing and service options.

Fairfax County has not been spared as the nation faces a growing crisis of heroin and opioid addiction and drug-caused deaths. The CSB’s detoxification and residential treatment services are in high demand, with wait lists. Even people needing medical detoxification must wait two to three weeks for an available bed.

Demographic trends indicate, if increased demands for services are unmet, many residents will be at greater risk for life-threatening health problems caused by aging, chronic mental illness, substance use disorder, and homelessness. The lack of appropriate treatment facilities and supportive housing options often interferes with discharge planning, disrupts the recovery process, and puts individuals at risk of homelessness, incarceration, hospitalization or institutionalization. For example, Woodburn Crisis Care is housed in a single family home that runs on a septic system, has numerous barriers for those with mobility and sensory limitations, and has a layout that requires extra staffing to ensure 24/7 monitoring and supervision. This facility does not have the capacity to serve the complex needs of 16 individuals with co-occurring serious mental illness and substance use disorders who are at risk of harming themselves or others, especially individuals with physical and sensory disabilities or uncontrolled medical conditions. Woodburn Crisis Care is the County’s only crisis stabilization facility.

To develop and operate cost-effective facilities that support delivery of critically needed services in a person-centered manner, the CSB is reconfiguring its capital needs program and focusing on opportunities to develop different business models that include shared facility use or co-locating programs such as outpatient and/or residential treatment with primary care clinics or supportive housing, public-private ventures, and targeted use of county resources. In addition, the CSB has begun to identify opportunities for adaptive re-use or expansion of the County-owned buildings it occupies, rather than developing new sites. The CSB currently has several feasibility studies underway, including the Woodburn Crisis stabilization facility. In addition, feasibility studies have been completed on two residential treatment facilities, Crossroads and A New Beginning, to make them better equipped to serve individuals with primary substance use disorders who also experience mental illness. An additional study was completed to reconfigure and expand Dual Diagnosis, a residential treatment facility serving individuals with serious mental illness and substance use disorders who typically have acute psychiatric symptoms and medical issues. Shared dormitory style rooms would be converted to single rooms, and the facility would be expanded to include on-site supportive housing for individuals moving from the treatment to the re-entry phase of the program. The Fairfax Detoxification Services site was also studied to determine the cost to reconfigure the facility to accommodate a crisis stabilization service delivery model. A study is currently in progress to identify sites, conceptual designs, cost estimates and financing options for up to four intermediate care facilities serving individuals who are transitioning from state training centers or who, due to age-related conditions require a higher level of care than group homes provide.
Office to Prevent and End Homelessness
The Office to Prevent and End Homelessness administers the County's homeless shelter system in partnership with non-profit service providers. Services to the homeless include homeless prevention and rapid-rehousing services, medical/health care in the homeless shelters, drop-in centers for the unsheltered homeless, and hypothermia centers developed in partnership with the community. Currently, there are five homeless shelters in the County, two serving homeless individuals, two serving families only and one serving both families and single adults. Homeless shelters can no longer meet “crisis/emergency” needs of homeless families in the community. The County shelters are full to capacity every night of the week throughout the year. The use of motels to shelter families is limited in the community as an option of last resort as they do not offer an ideal environment for families, especially for the children in these families. Permanent housing opportunities are needed and partnerships to develop and obtain this type of housing are strongly supported.

Based on the continuing demand for homeless services, Fairfax County is looking to make significant changes in the way services are delivered. Members of the community have responded to the County call for ending homelessness. Community representatives have joined with non-profit organizations, faith communities, businesses and County staff to develop new strategies for preventing and ending homelessness. One strategy to be examined is how all shelters could be used differently. In some areas, homeless shelters have been converted to permanent housing and/or assessment and triage centers. These centers are used to assist homeless and potentially homeless persons and to rapidly provide access to the most appropriate available housing and supportive services options. The Katherine K. Hanley Family Shelter opened in August 2007; however, the four remaining shelters are all more than 20 years old and do not meet modern standards for accessibility or enhanced service delivery. The wear and tear of the shelters which are full every night of the year is significant. Replacement/renovation of all four homeless shelters were approved as part of the 2016 Human Service/Community Development Bond Referendum.

Fairfax County Health Department (FCHD)
The Fairfax County Health Department (FCHD) is a locally administered health department operating under a Memorandum of Agreement with the Virginia Department of Health. The FCHD has five core functions: preventing epidemics and the spread of disease; protecting the public against environmental hazards; promoting and encouraging healthy behaviors; assuring the quality and accessibility of health services; and responding to disasters and assisting communities in recovery.

The FCHD plays a prominent role in the county’s response to emergencies. As part of the National Capital Region, the FCHD engages with local, state, and federal partners to conduct exercises and to respond to public health emergencies, such as H1N1, Ebola, TB and Zika. The FCHD employs 652 employees and offers services at 18 sites around the county. The FCHD is comprised of 4 divisions including: Division of Community Health Development & Preparedness, Division of Environmental Health, Division of Laboratory Services and the Division of Patient Care Services.

The Community Health Development and Preparedness was established to provide structure and better coordinate the many departmental initiatives to build local public health service capacity and effectively prepare for and respond to public health emergencies and emerging community health needs. Activities within the program areas enhance the department’s emergency preparedness; surge capacity; external and internal communications; strategic planning; outreach, education and capacity building efforts; and ability to provide community-centered and culturally appropriate services.

The Environmental Health Division has three program areas and the primary services conducted by these programs include: routine and complaint driven public health investigations; commercial and residential plan reviews; vector surveillance and control activities; and community outreach and education. The program also works closely with the Health Department’s Communicable Disease Unit and Lab to investigate, confirm and contain disease outbreaks.

The Laboratory is the only biosafety level 3 (BSL-3) public health lab in Northern Virginia. It provides comprehensive laboratory services to support essential public health services including communicable disease testing, patient specific health monitoring (such as drug testing); environmental monitoring (e.g. water quality of private wells and streams) and molecular testing of mosquito pools for WNV. The lab also serves as surge capacity for the state lab, particularly for testing to support emergency response.

Patient Care Services is the largest division providing clinical services (such as STD, TB, immunizations, refugee screening and International Travel) at 5 different sites. This division also provides School Health,
Maternal Child Health, Women Infant and Children (WIC), Communicable Disease, Tuberculosis Control, and Long Term Care services. And lastly this division includes three Community Health Care Network (CHCN) primary healthcare sites that support the county safety net.

**Department of Family Services (Office for Children)**
The Office for Children (OFC) in the Department of Family Services advances the care, education and healthy development of Fairfax County children from birth through elementary school and supports the Fairfax County childcare community in providing safe, educational care that helps prepare children for lifelong success. Support services provided by OFC programs include permitting and monitoring family childcare homes in the County and subsidizing childcare fees of families with low and moderate incomes who are working to attain and/or maintain their economic self-sufficiency. The Child Care Assistance and Referral (CCAR) program offers the Fairfax community information about County childcare providers and centers, tips for choosing quality childcare, and assistance with identifying child care options. CCAR staff also track and respond to federal and state child care legislation. Direct services provided by OFC include the School-Age Child Care (SACC) program, providing before and after-school childcare services for working families throughout the county, and operating the Fairfax County Employees’ Child Care Center for children of County employees. OFC also administers the Head Start and Early Head Start programs, which provide early childhood education and comprehensive services to income eligible pregnant women and families with children from birth to five years of age.

OFC actively works to increase the supply and quality of child care services and programs in the County by recruiting family child care providers, providing professional development and technical assistance to the County’s child care workforce, and sponsoring the Child Care Adult Care Food Program. OFC’s participation in the Virginia Preschool Initiative (VPI) program ensures that quality preschool programs are available for eligible four-year-olds. With an emphasis on school readiness, OFC actively collaborates with community organizations, the business community, county agencies, public schools, families and early childhood and school age childcare professionals to support the success of the County’s children in kindergarten and beyond.

Fairfax County currently has an early childhood education mixed delivery systems in which services are provided by the community, the County and Fairfax County Public Schools (FCPS). Early childhood programs support the healthy development and education of children from birth to five year of age and include programs such as: Head Start, FCPS Pre-K, the Child Care Assistance and Referral (CCAR) Program and the Virginia Preschool Initiative. There are currently 1,444 children under the age of five on the CCAR waitlist and 427 children on the Pre-K waitlist. Staff is working to develop a long-range plan to address the space required to increase the number of children served and provide equitable access to high quality early childhood learning and development programs.

**Department of Family Services (Office for Women & Domestic and Sexual Violence Services (OFWDSVS))**
The OFWDSVS is the state-accredited domestic and sexual violence program and state certified batter intervention program in Fairfax County. Designed from a trauma-informed, client-driven, and family-systems perspective, OFWDSVS provides services to victims, children and youth, as well as offenders, and works towards ensuring every resident’s life free of violence. OFWDSVS advances the mission of preventing and ending domestic and sexual violence, stalking and human trafficking by fostering a community based on equality and mutual respect through prevention and intervention, community engagement and awareness, policy and advocacy. Services include: Artemis House, the only 24-hour crisis shelter for victims of domestic and sexual violence, stalking, and human trafficking; a 24-hour crisis hotline; the Domestic Violence Action Center (DVAC), a comprehensive, co-located service center staffed by county agency and community non-profit partners created to provide culturally responsive information and support services for victims of domestic violence and stalking and their families as well as to promote the accountability of offenders of these crimes through specialized prosecution and offender supervision; individual and group counseling for adult and child victims of domestic violence and sexual assault; Anger and Domestic Abuse Prevention and Treatment (ADAPT) services for offenders; court advocacy and support services; economic and housing services; compassion training for couples in conflict; community outreach, prevention, and education services; hospital and court accompaniment for victims of domestic and sexual violence; and teen dating violence prevention and healthy relationship programs.
CURRENT PROJECT DESCRIPTIONS

1. **School Age Child Care Centers Contribution** (Countywide): This is a continuing project for which an annual contribution is funded to offset school operating and overhead costs associated with School-Age Child Care (SACC) centers. In FY 2018, funding of $1,000,000 is included for the County's annual contribution.

2. **Bailey's Shelter** (Mason District): $15,667,258 to fund the replacement of the Bailey's Shelter. The Shelter is an emergency homeless shelter that accommodates 50 adults and serves as a day time drop-in center and main operations center for the region’s hypothermia prevention program. The facility is over 27 years old and has had no major renovations since it was constructed. Consolidation and joint redevelopment of the current site with a private development partner, as part of the redevelopment plan in the southeast area of the County, creates the need for the shelter to be relocated. The County has purchased a new site for the homeless shelter replacement near the existing shelter area to construct the new shelter. On the new site, the Office to Prevent and End Homelessness, will leverage the property and services to provide a more cost effective solution to reducing homelessness by adding new permanent supportive housing units. This project was approved as part of the 2016 Human Services/Community Development Bond Referendum.

3. **Eleanor Kennedy Shelter** (Mt Vernon District): $12,000,000 to fund the renovation of the Eleanor Kennedy Shelter. The Shelter is an emergency homeless shelter located on the Fort Belvoir Military Reservation that is leased indefinitely to Fairfax County. The facility accommodates beds for 38 men and 12 women. The facility can also accommodate an additional 15 people, in a trailer, for overflow capacity year round and another 10 during cold weather (hypothermia). A renovation and expansion to the Eleanor Kennedy Shelter is essential to meet the ever increasing emergency homeless population and their needs within Fairfax County including many homeless veterans. In addition, this facility has not had any significant infrastructure improvements since its inception as a shelter almost 30 years ago. This project was approved as part of the 2016 Human Services/Community Development Bond Referendum.

4. **Patrick Henry Shelter** (Mason District): $12,000,000 to fund the renovation or replacement of the Patrick Henry Shelter. The Patrick Henry Shelter provides emergency 30-day accommodations to homeless families. The shelter has a capacity to serve 7 families with an additional 2 emergency overflow units available. A renovation or replacement is greatly needed for the Patrick Henry Family Shelter to meet the growing needs of Fairfax County’s homeless family population resulting from limited affordable housing. Improvements are needed to the facilities’ community and shared family spaces due to high utilization, age of the facility and normal wear and tear from every day use of the building. This project was approved as part of the 2016 Human Services/Community Development Bond Referendum.

5. **Embry Rucker Shelter** (Hunter Mill District): $12,000,000 to fund the replacement of the Embry Rucker Shelter. The Shelter provides temporary emergency shelter and is comprised of 42 beds (10 rooms) for families, 28 beds for unaccompanied adults (20 men and women) and 10 beds for cold weather overflow (hyperthermia). The one story 11,000 square feet facility was constructed in 1987 and has had no major renovations. The shelter is located within the overall master plan area that reconfigures and provides integrated redevelopment of approximately 50 acres currently owned by Fairfax County and Inova at Reston Town Center North. The redevelopment of the site will include the replacement of the Embry Rucker Shelter. The Office to Prevent and End Homelessness, may also leverage the property and services to provide a more cost effective solution to reducing homelessness by adding new permanent housing units. This project was approved as part of the 2016 Human Services/Community Development Bond Referendum.
6. **Reston Town Center North (Infrastructure and Blocks 7 & 8)** (Hunter Mill District): Approximately $76,000,000 million is proposed to rezone and develop the overall master plan that reconfigures and provides integrated redevelopment of approximately 50 acres currently owned by Fairfax County and Inova at Reston Town Center North (south of Baron Cameron Avenue between Town Center Parkway and Fountain Drive), including the replacement of Reston Regional Library, Embry Rucker Shelter, currently on this site, and development of additional facilities to accommodate Human Services needs. The plan maximizes the development potential consistent with the needs of the community and in conformance with the Comprehensive Plan Amendment approved in February 2013. Three current facilities impacted by the redevelopment are the Reston Regional Library, the Embry Rucker Shelter, and the North County Human Services Center. The County plans to solicit development proposals under the PPEA guidelines, for the Phase 1 Development on the two County-owned parcels, known as Blocks 7 and 8, which currently house the existing library and shelter facilities. As a result of the Phase 1, Part 1 solicitation issued in summer 2015, prequalified development partners have been identified and evaluation and community coordination is underway. Phase 1, Part 2 solicitation for development proposals will be issued in spring 2017. The County will solicit a future Phase 2 PPEA for the remaining balance of the property, including the parcel containing the North County Human Services Center. Funding of $12,000,000 was approved as part of the fall 2016 Human Services/Community Development Bond Referendum for the Shelter and $10,000,000 was approved as part of the 2012 Library Bond Referendum for the Library. It is anticipated that approximately $10 million will be required in FY 2018 to fund the County share of the Comprehensive Real Estate and Infrastructure Development Agreement with Inova that will provide for the real estate exchange, and design and construction of the campus site infrastructure. Economic Development Authority (EDA) bond financing is anticipated for implementation of the plan.

7. **North County Human Services Center** (Hunter Mill District): $125,000,000 to fund a replacement facility for the existing North County Human Services Center located in Reston. The existing facility is within the redevelopment master plan area known as Reston Town Center North which will be reconfigured for an integrated redevelopment consistent with the needs of the community and in conformance with the Comprehensive Plan Amendment approved in February 2013. The proposed North County Human Services Center will also support a consolidation of existing leased facility spaces in the service area into one Human Services site to provide enhanced and integrated multi-disciplinary services to residents in the western part of the County. This facility will be a part of the future Phase 2 PPEA solicitation for the redevelopment of the overall Reston Town Center North master plan. Phase 1 solicitation for the development for the two County-owned parcels, known as Blocks 7 and 8, on which the Reston Library and the Embry Rucker Shelter are currently located, is underway. It is anticipated that EDA bonds will finance the project.

8. **East County Human Services Center** (Mason District): $125,500,000 is proposed for a new East County Human Services Center of which $5,375,000 is currently funded for initial design phases, rezoning and developer negotiations. Funding was provided from 2004 Human Services Bonds remaining from completed projects to support initial design work for this project. This facility will provide enhanced service delivery to the residents of the Eastern part of the County through a consolidation of existing leased facility spaces in the service area to an integrated Human Services site with the goal to address the residents’ needs in an effective and efficient manner. Development options are being evaluated including the current site of the Bailey’s Shelter site with the adjacent private property for a possible real estate exchange and coordinated private residential development. It is anticipated that EDA bonds will finance the County’s share of project.
