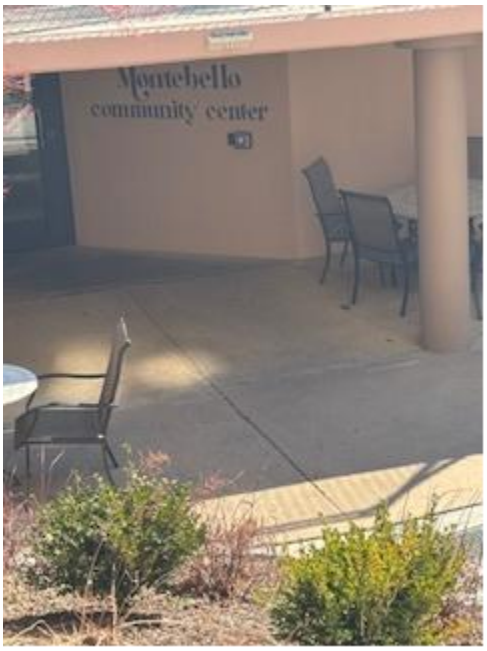
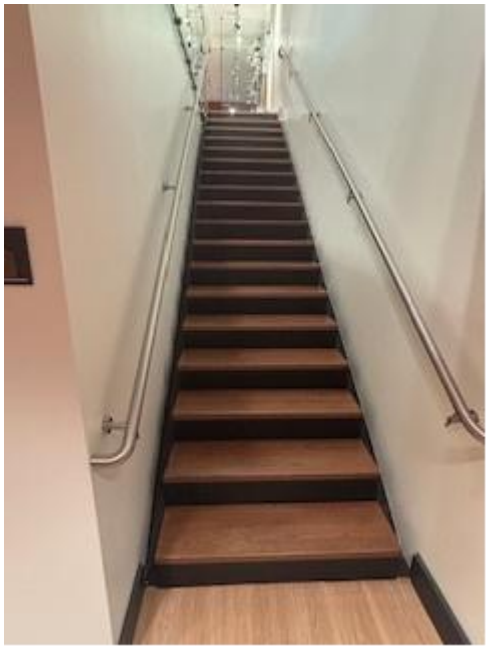
The two main entrances to Montebello Community Center.



The accessible walkway and entrance to the voting room.

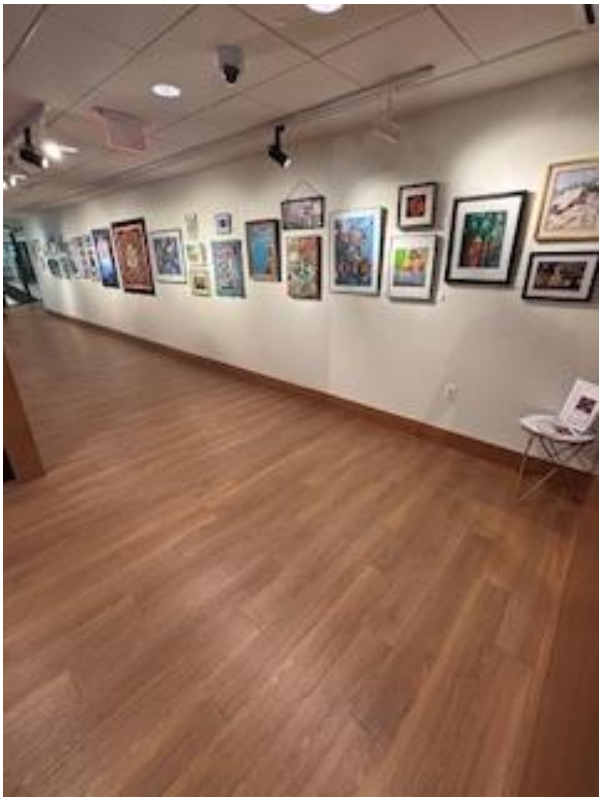
Curbside spaces by the accessible entrance. These will be marked and designated as accessible parking on Election Day.

Using either of the main entrances, residents must take the stairs or elevator down to the floor to access the voting room.



Bottom of the stairs

Entrance to the voting room



Proposed area for the internal 40 ft prohibited area. This location is at the top of the stairs near the elevator. If approved, pollworkers may distribute information from this area. They may not go down to the level where the voting room is located. Pollworkers will have access to residents without having to create a distribution station outside the two main entrances. There is adequate space for pollworkers to distribute information outside the accessible entrance.

At a site visit on September 4, 2025, management agreed to this proposal.
