

	<b>Air Quality</b> <i>One Recommendation in 2022</i>	<b>Status / EQAC Comments</b>
1	<p><i>Recommendation: 7AQ-2021.1</i></p> <p><b>1. County officials should continue efforts to strongly encourage people to telework where possible, take public transit, and use alternative forms of transit.</b></p> <p>Many air quality issues are tied to federal and state actions over which the county has little or no control. This is one area where the county can take an active role to reduce single vehicle trips within the county and thus enhance air quality through a decrease in vehicle emissions, which are a major contributor to ground-level ozone formation and greenhouse gas emissions in the county.</p> <p><b>Summary of Action Taken by Agency or Department</b></p> <p>County staff concurs with this recommendation and is taking steps to implement it.</p>	<p>Making progress/ Recommended since 2021</p>  <p>This recommendation remains an important action in helping to achieve county goals.</p>
