

August 27, 2020 from Michelle Heelan to everyone: 7:01 PM
Hello everyone. We are giving folks just a minute or two to join and then we will begin.

August 27, 2020 from Brian Castelli to host (privately): 7:06 PM
Brian Castelli

August 27, 2020 from Robert Brown to host (privately): 7:06 PM
Robert Brown

August 27, 2020 from Renee Grebe to host & presenter: 7:06 PM
Renee Grebe (Lee District Focus Group Liasion)

August 27, 2020 from Sara H to host & presenter: 7:06 PM Sara Holtz,
Providence

August 27, 2020 from THOMAS CALHOUN to all panelists: 7:06 PM Tom
Calhoun Braddock District Focus Group and Task Force Member

August 27, 2020 from ken quincy to host (privately): 7:06 PM Ken
Quincy

August 27, 2020 from Scott Peterson to host (privately): 7:07 PM
Scott Peterson of Faith Alliance for Climate Solutions (FACS) I am a task force
alternate to Eric Goplerud.

August 27, 2020 from Brian Castelli to all panelists: 7:07 PM
Brian Castelli

August 27, 2020 from Renee Grebe to host & presenter: 7:07 PM
We're all muted

August 27, 2020 from Kathleen Turk to host (privately): 7:10 PM I
have joined and I am connecting from home

August 27, 2020 from Theodore Dumas to host (privately): 7:10 PM Ted
Dumas, Fairfax

August 27, 2020 from Kathleen Turk to host (privately): 7:13 PM I am
not able to unmute myself, but I vote i nfavor

August 27, 2020 from Cara Blumenthal to everyone: 7:22 PM The
"Everyone" option is all the way at the bottom of the dropdown menu.

August 27, 2020 from Kshirajaa Ramesh to all panelists: 7:22 PM It
says public chat has been disabled. I can only share with panelists

August 27, 2020 from Debra Jacobson to host (privately): 7:23 PM
Sending to everyone is NOT an option on the dropdown menu. It is not at the bottom!

August 27, 2020 from Kat Kehoe to all panelists: 7:23 PM Hover over the bottom of the screen and look for the speaking bubble, that is the "chat" option.

August 27, 2020 from Harvey Haines to all panelists: 7:23 PM We do not have the option to send a chat to EVERYONE. We can send to All Panelists

August 27, 2020 from Ana Young to everyone: 7:24 PM NextDoor

August 27, 2020 from Homan Wai to host (privately): 7:24 PM email

August 27, 2020 from Joanne Potter to everyone: 7:24 PM someone told me about it

August 27, 2020 from Margaret Fisher to everyone: 7:24 PM From the Faith Alliance for Climate Solutions

August 27, 2020 from Joanne Hutton to everyone: 7:24 PM Faith Alliance for Climate Solutions

August 27, 2020 from Kat Kehoe to all panelists: 7:24 PM Had to ask someone who is on the Task Force. It was not on the website a week or so ago.

August 27, 2020 from Marilyn Kupetz to everyone: 7:24 PM NVSWCD newsletter

August 27, 2020 from Blythe Merritt to everyone: 7:24 PM 350-Fairfax

August 27, 2020 from Mary Bloom to host (privately): 7:24 PM on the web

August 27, 2020 from Brian Castelli to all panelists: 7:24 PM email

August 27, 2020 from Harvey Haines to everyone: 7:25 PM Via emails from friends

August 27, 2020 from Ken Sandler to host (privately): 7:25 PM Someone mentioned it to me.

August 27, 2020 from Kshirajaa Ramesh to everyone: 7:25 PM Email from Royal Lake

August 27, 2020 from Wendy Cohen to everyone: 7:25 PM 350 Fairfax

August 27, 2020 from norbert pink to everyone: 7:25 PM Sierra Club Great Falls Group email

please. also posters and flyers for outreach

August 27, 2020 from Kat Kehoe to all panelists: 7:34 PM I'm not a
fan of the survey. It was 99% multiple choice and did not allow citizens to have a
voice on their ideas and suggestions. There was a suggestion box on the end but did
not allow for overarching idea sharing.

August 27, 2020 from Ken Sandler to host (privately): 7:38 PM
Agreeing with Kat's comment, turning it into a question: what opportunities will the
public have to provide detailed comments?

August 27, 2020 from Margaret Fisher to everyone: 7:39 PM Does
this include the stuff that we buy that is made elsewhere?

August 27, 2020 from Maya Dhavale to everyone: 7:40 PM Thanks for
the comments on the survey. Yes it is mostly multiple choice given the amount of
respondents we expect to have (over 70 so far just today!). Please send detailed
comments to: cecapoutreach@fairfaxcounty.gov

August 27, 2020 from Maya Dhavale to everyone: 7:41 PM We cannot
always respond individually, but we will incorporate everything into a comment
matrix for review

August 27, 2020 from Kshirajaa Ramesh to everyone: 7:41 PM I think that might be scope 3 emissions- for things that are produced elsewhere. I don't think scope 3 emissions are used in the inventory. Is that correct?

August 27, 2020 from Kat Kehoe to all panelists: 7:41 PM How does the "tradeable credits" work??

August 27, 2020 from Maya Dhavale to everyone: 7:42 PM Scope 3 is under consideration but not explicitly called out in this inventory

August 27, 2020 from Meg Jonas to everyone: 7:43 PM I sent most of my responses to "all attendees". I don't think they got counted. On my screen, there is no option to select "everyone". thanks.

August 27, 2020 from Ken Sandler to host (privately): 7:45 PM Do you have an estimate for number of vehicles registered in the county? That would be a useful number to set transportation goals.

August 27, 2020 from Kat Kehoe to all panelists: 7:45 PM did he saw "horses"?

August 27, 2020 from Meg Jonas to everyone: 7:46 PM thank you!

August 27, 2020 from Kathleen Turk to everyone: 7:47 PM I am curious how the remote working that many have switched to has affected the impact transportation has on GHG

August 27, 2020 from Flint Webb to all panelists: 7:51 PM I can't submit anything in the Q&A box.

August 27, 2020 from Joanne Potter to everyone: 7:51 PM Please continue to use the Chat box.

August 27, 2020 from Kshirajaa Ramesh to everyone: 7:54 PM Does Fairfax county have the opportunity to participate in a low carbon concrete pilot project? Concrete in construction is also a large source of emissions

August 27, 2020 from Flint Webb to all panelists: 7:54 PM What is the source of GhG emissions from waste operations? I would think that since we incinerate the waste there wouldn't be any methane.

August 27, 2020 from Flint Webb to all panelists: 7:55 PM In calculating the GhG emissions for waste operations did you include the emissions from picking up and taking the waste to the incinerator?

August 27, 2020 from Kat Kehoe to all panelists: 7:55 PM Our incinerators are huge generators of emissions! Talk to Mothers Out Front.

August 27, 2020 from Kathleen Turk to everyone: 7:56 PM I love that composting is mentioned here. Does Fairfax County have plans to implement a

curbside compost collection program?

August 27, 2020 from Kat Kehoe to all panelists: 7:56 PM Talk to Julie Kimmel at Mothers Out Front, Fairfax County about the enormous amount of emission Fairfax County's incenerator emits.

August 27, 2020 from Steve Walz to everyone: 7:57 PM This is Steve Walz. I will enter some answers to questions on the inventory. The main source of waste emissions is the emissions from combustion of the waste at the County's waste-to-energy plant. There also are emissions from composting.

August 27, 2020 from Brian Castelli to all panelists: 7:57 PM I recall the TF discussion as a preference for the 87% reduction goal (C neutral was next preference).

August 27, 2020 from Steve Walz to everyone: 7:57 PM There have been some examples of low-carbon concrete projects in Virginia and elsewhere. Participation will be up to the County.

August 27, 2020 from Margaret Fisher to everyone: 7:58 PM I would think we need much sooner interim goals, knowing human nature...

August 27, 2020 from Ken Sandler to host (privately): 7:58 PM Sector specific goals, reviewed annually, are absolutely essential to ensure progress.

August 27, 2020 from Marilyn Kupetz to everyone: 8:00 PM Much of what needs to happen requires systems thinking. For example, reducing solid waste requires less packaging. Less yard waste requires sorting what's acceptable for compost from what isn't. How are folks thinking about cause and effect and unintended consequences?

August 27, 2020 from Ken Sandler to host (privately): 8:00 PM This would be a great time to do a little research, even back of the envelope, as to whether telework ACTUALLY reduces emissions. Transportation emissions, yes, but not necessarily building/electricity emissions.

August 27, 2020 from Kat Kehoe to all panelists: 8:01 PM Can not "send" under Q&A - Can we please discuss one rule recycling in Fairfax County instead of 14 different independent contractors rules and also increasing what is recycled to reduce waste?

August 27, 2020 from Kshirajaa Ramesh to everyone: 8:01 PM What about the use as compost for fertilizer on county lands?

August 27, 2020 from Harvey Haines to everyone: 8:01 PM I am the director of Association Affairs for the VA Geothermal Heat Pump Association. Geothermal heat pumps could make one of the biggest impacts in reducing GHG for buildings (the largest source of GHGs in the county). The county is currently in the process of making it more difficult to put in a geothermal systems by increase

permit fees and regulations. These need to be streamlined to make it easier and encourage installation of geothermal systems. The NY geothermal association is currently setting goals in the neighborhood of 35% of all systems in NY State to help meet the NY Climate goals.

August 27, 2020 from Bradley Dressler to all panelists: 8:02 PM I am interested in applying the work of ethonal activist David Blume. We can collect all leftover food from grocery stores and restaurants, collect candy and pumpkins from halloween, even all of our grass clippings, and distill into ethoanl fuel. We can then fuel a fleet of county vehicles, and keep the money in Fairfax county.

August 27, 2020 from Steve Walz to everyone: 8:02 PM Scope 3 emissions from activities in upstream activities, such as emissions from manufacturing products county residents and businesses purchase are not counted in the County's inventory. These emissions would be counted in the inventory of the locality in which the manufacturing took place. This avoids double counting emissions in both areas. This does not mean that the Task Force cannot address the issue if it wants.

August 27, 2020 from Cheri Conca to everyone: 8:03 PM Where will the CECAP "live"? Will it become part of the Comprehensive Plan? Will its strategies and actions be incorporated into other plans, such as the forthcoming Strategic Plan?

August 27, 2020 from Margaret Fisher to everyone: 8:03 PM Please do address Scope 3 as well.

August 27, 2020 from Kat Kehoe to all panelists: 8:04 PM Our recycling program is broken. Residents in Fairfax County do not know what can and can not be recycled including myself and I Chair an Environemtal Committee.

August 27, 2020 from Kshirajaa Ramesh to everyone: 8:05 PM I wonder if Fairfax county has a green purchasing program- it would be for government I'm guessing- but would serve as a good market signal for environmentally preferable products and services

August 27, 2020 from norbert pink to everyone: 8:06 PM Early on in the process

August 27, 2020 from norbert pink to everyone: 8:06 PM Early on in the process, Fairfax County indicated the success of CECAP would be the involvement of the community to get their participation. My question is how has Fairfax County engaged the community and the success? Please provide the details and the organizations name you have contacted and the success, if possible. Like number of hits on website, etc. This list is important as if a community member sees a deficient, they can take an action to engage that group of the community.

August 27, 2020 from Maya Dhavale to everyone: 8:07 PM Norbert -- excellent points. We are working on getting Task 4, the community action partners and outreach to many different groups underway

August 27, 2020 from Flint Webb to all panelists: 8:08 PM It may be reasonable for the County to include Scope 3 emissions in the County operations but I don't think it would be appropriate to include scope 3 for the County as a whole.

August 27, 2020 from Maya Dhavale to everyone: 8:08 PM We would love to meet with you/the Sierra Club and continue this conversation

August 27, 2020 from Harvey Haines to everyone: 8:08 PM VA just passed the VCEA to clean up the energy used in the state. The VCEA has energy efficiency goals. Unfortunately they have defined energy efficiency as a reduction in the use of electricity. This needs to be redefined as the reduction of energy. The current definition does not allow Dominion to get credit for replacing a natural gas heating system with a heat pump, which is more efficient and produces no direct emission. Can Fairfax county help change this definition and goals to clean up carbon emissions from buildings?

August 27, 2020 from Rick Galliher to everyone: 8:09 PM I agree with Harvey.

August 27, 2020 from Kat Kehoe to all panelists: 8:10 PM Yes!

August 27, 2020 from norbert pink to everyone: 8:10 PM Relating to composting, Fairfax County should focus on educating homeowners to do composting on their property like their yard waste, like leaves and grass, rather than having a trash truck pick it up.

August 27, 2020 from Jim Ball to everyone: 8:12 PM Fairfax County now has tremendous sunk costs in the widening of Route 66 and other roads that not only destroy valuable square miles of valuable carbon sequestering and rainwater absorbing vegetation and reallocated monies that might be used for carbon reduced transportation, but it has destroyed property values and increased air and noise pollution as well as increased the heat sink in our area. Wide roads make it difficult to walk, bike, and just be comfortable. Wide roads are a Radical Monopoly and force people who might like to walk or bike, drive. Reversing that will take real political courage.

August 27, 2020 from Harvey Haines to everyone: 8:12 PM Listening to Adam, the county should be promoting charging stations in multi-family residences and businesses. One of the main reasons people give for not purchasing an electric car is there are not good choices for charging especially for those that live in multifamily housing.

August 27, 2020 from Flint Webb to all panelists: 8:12 PM I agree home composting would be best. But perhaps for restaurants it would make sense to have a program to pick up food wastes for centralized composting.

August 27, 2020 from Kat Kehoe to all panelists: 8:12 PM I think this is a great start to what Fairfax County can do to lower emissions.

August 27, 2020 from norbert pink to everyone: 8:13 PM In regards to tree plantng we should put as much effort in saving our existing mature trees.

August 27, 2020 from Flint Webb to all panelists: 8:13 PM How does the inventory separate out the food waste from restaurants from the food waste from homes?

August 27, 2020 from Marilyn Kupetz to everyone: 8:14 PM Are you familiar with behavior-centered design methods? Are you willing to have community participation in designing interventions?

August 27, 2020 from Steve Walz to everyone: 8:14 PM The county greenhouse gas invntory does not get to the level of separating food waste from restaurants, institutions and homes. We looked at the total waste stream generated. Program implementation will need to dig into these differences

August 27, 2020 from Ken Sandler to host (privately): 8:15 PM It's hard for any of us to grasp the kind of massive transformations that are going to bre needed to achieve the kind of goals suggested. Need to get beyond the incremental and focus on game changers.

August 27, 2020 from Rick Galliher to everyone: 8:15 PM The County is hoping to have composting drop off at I-66 and Lortn. There hasn't been a huge outcry of people asking for curbside. A few supermarkets already compost on their own.

August 27, 2020 from Flint Webb to all panelists: 8:16 PM My biggest concern is that the inventory is not structured in a way that makes it easy to evaluate control measures.

August 27, 2020 from Amy Anderson to everyone: 8:16 PM I agree that charging stations need to be encouraged in higher density neighborhoods. Even townhouse communities can make it difficult get a charger installed.

August 27, 2020 from Brian Castelli to all panelists: 8:17 PM Adam's point on Co-benefits is critical in offsetting costs of implementing GHG reduction measures as the value of the external benefits far outweigh the direct costs of implementing measures. Quantifying those benefits is critical to balance cost and benefits of a robust climate action plan.

August 27, 2020 from Marilyn Kupetz to everyone: 8:17 PM Thank you--helpful answers.

August 27, 2020 from Flint Webb to all panelists: 8:17 PM What supermarkets are composting?

August 27, 2020 from Kshirajaa Ramesh to everyone: 8:18 PM Does the county have direct access to VW settlement funds or does it go through the state? Regarding EVs and charging infrastructure

August 27, 2020 from Ken Sandler to host (privately): 8:18 PM I didn't see many strategies mentioned to expand renewable energy within the county. It may seem that we don't have much land to do so, but two things we have many acres of are rooftops and parking lots. Please look into solar carports as a strategy to simultaneously provide clean energy, shading and potentially EV charging.

August 27, 2020 from Steve Walz to everyone: 8:19 PM The VW settlement funds are managed by the state. They are making some available for counties to use, but decisions are made at the state level

August 27, 2020 from Kshirajaa Ramesh to everyone: 8:20 PM Got it. Thanks

August 27, 2020 from Rick Galliher to everyone: 8:23 PM Walmart and Target volunteered they do, but it varies by store. But in 2019 a total of 8,567 tons of food waste were "recycled" in Fairfax. I asked, and the Walmart customer service said that means composting.

August 27, 2020 from Ken Sandler to host (privately): 8:23 PM I agree with Flint on the vehicle goals. Estimate how many cars are registered in the county to set goals of how many gas-powered single occupancy vehicles need to be replaced.

August 27, 2020 from Kshirajaa Ramesh to everyone: 8:24 PM County parks would be a great place for EV charging. People usually spend a couple of hours there so the time need would go hand in hand. A solar canopy combined with charging would also be a good public facing educational opportunity and just cool

August 27, 2020 from Amy Anderson to everyone: 8:24 PM Great info. Good night!

August 27, 2020 from Steve Walz to everyone: 8:24 PM Food recovery is also an important action, particularly in this time of food insecure households

August 27, 2020 from Ines Nedelcovic to all panelists: 8:25 PM How much of the plan is geared towards sequestering GHG?

August 27, 2020 from Ines Nedelcovic to all panelists: 8:27 PM thank you!

August 27, 2020 from Harvey Haines to everyone: 8:28 PM With buildings being the largest source of GHGs in the county, you should consider a separate set of meetings in tackling this largest source. It is also the source of emissions that county policies can have the biggest impact, as transportation goals are set at higher levels (i.e. the national level), where building policies are set

at the local level.

August 27, 2020 from Theodore Dumas to everyone: 8:29 PM This video shows the power of trees in reducing CO2 <https://www.youtube.com/watch?v=x1SgmFa0r04>

August 27, 2020 from Ken Sandler to everyone: 8:31 PM I just realized I wasn't sending my comments to All Participants, so resending my messages one by one. First, Sector specific goals, reviewed annually, are absolutely essential to ensure progress.

August 27, 2020 from Margaret Fisher to everyone: 8:31 PM Re: equity. What are your thoughts about including low income residents and people of color in these initiatives?

August 27, 2020 from Rick Galliher to everyone: 8:32 PM I agree (again) with Harvey. Separating discussions by topic : buildings, transportation, trees, solid waste might be easier than a single meeting covering everything.

August 27, 2020 from Ken Sandler to everyone: 8:32 PM Another comment resending: I agree with Flint on the vehicle goals. Estimate how many cars are registered in the county to set goals of how many gas-powered single occupancy vehicles need to be replaced.

August 27, 2020 from Ken Sandler to everyone: 8:33 PM Another: I didn't see many strategies mentioned to expand renewable energy within the county. It may seem that we don't have much land to do so, but two things we have many acres of are rooftops and parking lots. Please look into solar carports as a strategy to simultaneously provide clean energy, shading and potentially EV charging.

August 27, 2020 from Ken Sandler to everyone: 8:34 PM Another: It's hard for any of us to grasp the kind of massive transformations that are going to be needed to achieve the kind of goals suggested. Need to get beyond the incremental and focus on game changers.

August 27, 2020 from Cara Blumenthal (privately): 8:34 PM Maya--also the Focus Groups meant to represent people in their districts

August 27, 2020 from Flint Webb to all panelists: 8:34 PM Equity is a good point. We will need to apply equity filters on the electric vehicle or similar rebate programs to ensure that the more wealthy members of the community don't get disproportionate benefits.

August 27, 2020 from Margaret Fisher to everyone: 8:34 PM It would be a huge miss opportunity not to have equity considerations built into all these plans right from the start.

August 27, 2020 from Theodore Dumas to everyone: 8:35 PM Planet of the Humans clearly illustrates the problems with the idea that we can simply replace fossil fuel with "sustainable" energy sources. Can you comment on this?

August 27, 2020 from Ken Sandler to everyone: 8:35 PM Final re-sent comment: I didn't see many strategies mentioned to expand renewable energy within the county. It may seem that we don't have much land to do so, but two things we have many acres of are rooftops and parking lots. Please look into solar carports as a strategy to simultaneously provide clean energy, shading and potentially EV charging.

August 27, 2020 from Ines Nedelcovic to all panelists: 8:38 PM Would you post the link to the survey in the chat? Also the link to download the slides would be appreciated.

August 27, 2020 from Cara Blumenthal to all panelists: 8:38 PM <https://www.fairfaxcounty.gov/environment-energy-coordination/public-engagement-cecap>

August 27, 2020 from Kshirajaa Ramesh to everyone: 8:39 PM I agree with that comment

August 27, 2020 from Ken Sandler to everyone: 8:39 PM Yes - sector specific meetings are a great idea, and you can invite different stakeholders to them.

August 27, 2020 from Kat Kehoe to all panelists: 8:39 PM Yes, need to have focused discussion and goal setting by sector.

August 27, 2020 from Ines Nedelcovic to all panelists: 8:39 PM thank you

August 27, 2020 from Margaret Fisher to everyone: 8:41 PM How about planning your report to address equity as part of each separate section? Even not knowing anything about it, I can easily imagine possible solutions for all the items you enumerated.

August 27, 2020 from Harvey Haines to everyone: 8:43 PM Yes

August 27, 2020 from Harvey Haines to everyone: 8:43 PM Yes will share with at least 3 people

August 27, 2020 from Flint Webb to all panelists: 8:44 PM There isn't an "already done" option

August 27, 2020 from Harvey Haines to everyone: 8:44 PM Don't know will have to review slides

August 27, 2020 from Kat Kehoe to all panelists: 8:45 PM The Fairfax County Democratic Party Environmental Committee would like to see firm carbon emissions reductions for Fairfax County's buildings and vehicles for goal dated of 2025 and 2030.

August 27, 2020 from Kat Kehoe to all panelists: 8:45 PM Sorry for

bad grammar!

August 27, 2020 from Margaret Fisher to everyone: 8:48 PM The lack of an "already done" choice on the survey is problematic. There are a lot of questions we can't answer for that reason.

August 27, 2020 from Harvey Haines (privately): 8:49 PM I would like to become a ?community? partner in the process.

August 27, 2020 from Cara Blumenthal to all panelists: 8:50 PM <https://www.fairfaxcounty.gov/environment-energy-coordination/public-engagement-cecap>

August 27, 2020 from Meg Jonas to everyone: 8:50 PM please include the chat from this meeting with the meeting slides - thank you! there are so many good comments!

August 27, 2020 from Robert Brown to everyone: 8:50 PM yes

August 27, 2020 from Ken Sandler to everyone: 8:50 PM Thanks!

August 27, 2020 from Adam Agalloco to everyone: 8:50 PM Thank you everyone!
