Where can I find the "online survey"??

September 2, 2020 from Ali Althen to everyone: 7:27 PM
<https://www.fairfaxcounty.gov/environment-energy-coordination/public-engagement-cecap>

September 2, 2020 from Aaron Sobel to all panelists: 7:47 PM
These are certainly useful and meaningful climate goals, and you certainly can't reduce what you can't measure so this has been good work. Would Fairfax County be looking to enact any policies to assist in meeting these goals or are we relying on state, regional, and Federal policies to strengthen?

September 2, 2020 from Kris Rosenthal to all panelists: 7:48 PM
What can the County do about gas pipelines underground which need monitoring and may leak methane and natural gasses?

September 2, 2020 from Bruce Wright to all panelists: 7:48 PM
Have you modeled the impact of aggressive use of micromobility on transportation carbon emissions?

September 2, 2020 from Jessica Browne to all panelists: 7:48 PM
How is nuclear energy generation treated from carbon perspective? Zero emission?

September 2, 2020 from Kris Rosenthal to all panelists: 7:48 PM
What is on the table for increasing weatherization of apartments buildings and SFH, and are there other ideas about decreasing need for energy?

September 2, 2020 from John Clewett to all panelists: 7:49 PM
If Montgomery County can set a goal of carbon neutral by 2035, why can Fairfax County not do as well?

September 2, 2020 from Vestal Tutterow to all panelists: 7:49 PM
PM Could Jeff elaborate on the potential for RNG, and potential sources for RNG for the county?

September 2, 2020 from Kurt Doehnert to all panelists: 7:50 PM
What about the social / cultural / political elements to enable success? Part of the plan? After all, some say it's a hoax

September 2, 2020 from Kim Young to host (privately): 7:50 PM
We understand Virginia has made moves to put money into electric charging stations-what is the Fairfax plan to increase charging stations for county vehicles

as well as the private owners?

September 2, 2020 from Richard Lay to all panelists: 7:50 PM
New York is leading the country, embracing beneficial electrification.
I am so glad to see Fairfax county (my home) joining this movement
New York believes that heat pumps and specifically Ground Source Heat Pumps
(Geothermal)
Are a large part of the answer to their goals
Do you plan to encourage the growth of this technology

September 2, 2020 from Steve Andreadis to all panelists: 7:51 PM
Very happy to see where this is going. In 2018, the National Academies came out with a study that found 5 negative emission technologies like aforestation, reforestation, changes in agriculture, etc. (not carbon capture) are ready for wide-scale adoption and cost effective. Did the study take those into account at all to help achieve that 90% reduction, which I'm glad to see?
<https://www.nationalacademies.org/news/2018/10/technologies-that-remove-carbon-dioxide-from-air-and-sequester-it-need-to-play-a-large-role-in-mitigating-climate-change-says-new-report>

September 2, 2020 from Paul DeBoeck to everyone: 7:51 PM
Fairfax permits have become more difficult for Geothermal permits when geo is on the the top of attainable goals... why

September 2, 2020 from Kelly Naylor to everyone: 7:51 PM From Karen Sheffield: It was presented that E+ is very aggressive at 87% but surrounding jurisdictions Montgomery County, Washington DC, City of Alexandria and Arlington County have committed to 100%. What barriers does Fairfax County have that prevent us to committing to 100% vs other Virginia jurisdictions? OR what flaws do you find with other Virginia jurisdictions that will prevent them from reaching their 100% goals?

September 2, 2020 from Jessica Browne to all panelists: 7:52 PM
You need a new gas SCADA system to monitor flows vs input supported by ami metering technology - which can be promoted by standards and policy

September 2, 2020 from doug bergner to host (privately): 7:52 PM
i filled in the survey but how can i find my response? it went to you a week ago.

September 2, 2020 from Bob Petrine to host (privately): 7:52 PM
Why are new development projects in Fairfax Co. NOT required to have the MOST energy efficient standards used during construction?

September 2, 2020 from david nichols to everyone: 7:53 PM
EcoAction Arlington has an Enrgy Masters program which hleps homeowners w/ lighting insulation etc improvements

September 2, 2020 from Kris Rosenthal to all panelists: 7:54 PM
Food production is a major component of GHG; will there be any focus on education

for County residents about the value of eating more plants and less meat, for instance?

September 2, 2020 from Jeff King COG to all panelists: 7:54 PM
Some efforts are being made to improve energy efficiency through the commercial property assessed clean energy program. C-PACE.

September 2, 2020 from Prachi S to all panelists: 7:54 PM I noticed Montgomery county's goal (2035) too. Rest all the counties are looking at a 2050 goal. What is Montgomery county looking to differently that other counties can perhaps learn from? Also wondering if the public would like to commit to near-term goals as that would seem more fulfilling and allow them to incrementally commit to more actions.

September 2, 2020 from Ali Althen to everyone: 7:55 PM
Information on the Fairfax County Energy Action Fairfax program, which helps encourage weatherization at home, is available here:
<https://www.fairfaxcounty.gov/environment-energy-coordination/energyactionfairfax>

September 2, 2020 from Kyle Hendrickson to all panelists: 7:55 PM
Can Doug be muted please?

September 2, 2020 from mary pierce to all panelists: 7:55 PM
Does Fairfax County govt. plan to partner with organizations who are like minded to educate the public. I find that most of the residents of Fairfax are not as informed as say the residents of Arlington County.

September 2, 2020 from Richard Lay to all panelists: 7:56 PM
Thank you

September 2, 2020 from Richard Lay to all panelists: 7:57 PM
Do you plan on supporting and encouraging the implementation of R-Pace

September 2, 2020 from Ali Althen to everyone: 7:58 PM
David Nichols, Fairfax County is in the process of rolling out a program similar to Energy Masters. Stay tuned!

September 2, 2020 from david nichols to everyone: 8:00 PM
Would it be possible to use public service announcements to educate Fairfax citizens about what's available and why these changes are important? If the public doesn't understand why this is important changes won't get made

September 2, 2020 from Jessica Browne to all panelists: 8:00 PM
How do you think these goals will play a role in economic growth of the county? Do you believe they will attract new development or drive it to areas where standards are less aggressive?

September 2, 2020 from Elizabeth Finn to all panelists: 8:02 PM
Fairfax county and Virginia seem to be behind in solar panels for residential homes. What can Fairfax County do to help with this ?

September 2, 2020 from Eric Honour to all panelists: 8:02 PM
How can the County push for changes that require buy-in from larger players? I'm thinking of Dominion, which serves multiple *states*, and therefore may not be as responsive to individual counties?

September 2, 2020 from Aaron Sobel to all panelists: 8:03 PM
Setting extremely aggressive goals that are science-based seems perhaps more meaningful since the team has set targets that are achievable based on strategies that have been developed rather than an aspirational goal of 100% if there isn't a strategy to get there. 100% certainly sounds good but that last bit can be quite difficult, and 2050 is a long way off. Goals will have the opportunity to improve over time.

September 2, 2020 from Jeff King COG to all panelists: 8:05 PM
Elizabeth - you might want to look into the NVRC Solarize Program. Fairfax communities have been active and there are great opportunities to do more. COG tracks grid connected renewable systems across the region and we're seeing strong and continued growth, but even more can be done for sure.

September 2, 2020 from Ali Althen to everyone: 8:05 PM
Elizabeth, great question. Fairfax County has several significant incentives for residential solar. We just completed our annual Solarize campaign to provide discounts on solar. Here is information on using solar in the county:
<https://www.fairfaxcounty.gov/environment-energy-coordination/using-solar>

September 2, 2020 from John Cartmill to all panelists: 8:07 PM
are there any considerations of environmental justice prioritization

September 2, 2020 from Elizabeth Finn to all panelists: 8:07 PM
Thank you!

September 2, 2020 from Richard Morton to all panelists: 8:10 PM
Creating urban forests reduces the opportunities for solar power generation. Our house has no chance of making use of solar panels because we have too many tall trees.

September 2, 2020 from Richard Lay to everyone: 8:11 PM
Expedited no cost permits would be huge

September 2, 2020 from Sarah Turner to everyone: 8:12 PM
Moving forward can FC preserve more green space, parks and trees through Fairfax equity policy?

September 2, 2020 from Samantha Hudson to all panelists: 8:12 PM
Maximize co-benefits!!

September 2, 2020 from Jeff King COG to all panelists: 8:12 PM
Richard, through community solar programs it may be possible for homeowners who can't invest in solar on their home to invest off-site. Something that is being

looked at a bit more recently in the region.

September 2, 2020 from mary pierce to all panelists: 8:13 PM
Richard Morton: very true, but trees provide benefits such as cooling and lowering the temperatures as well as providing food (depending on the species)

September 2, 2020 from Bruce Wright to all panelists: 8:15 PM
The county can reduce funding for big road projects and use those funds for bike/ped/transit infrastructure.

September 2, 2020 from Kyle Hendrickson to all panelists: 8:15 PM
GRID Alternatives is a great initiative for solar installs

September 2, 2020 from Aaron Sobel to all panelists: 8:15 PM
Can you repost the solar in FFX County for those of us who joined later?

September 2, 2020 from Ali Althen to everyone: 8:15 PM
Sure! Here is a link:
<https://www.fairfaxcounty.gov/environment-energy-coordination/using-solar>

September 2, 2020 from david nichols to everyone: 8:18 PM
arcadia Power provides wind power offsets thru Dominion Power for a minimal surcharge.

September 2, 2020 from Vestal Tutterow to all panelists: 8:18 PM
Are microgrids and distributed energy being looked at as part of the solution?

September 2, 2020 from Jeff King COG to host & presenter: 8:21 PM
Jessica -emission rates from the power plants supplying the grid serving Fairfax are taken from the US EPA eGRID program. I believe nuclear power plants are not considered CO2 emitters. To learn more about eGrid, see:
<https://www.epa.gov/egrid/egrid-questions-and-answers>

September 2, 2020 from david nichols to everyone: 8:22 PM
Trees provide stormwater control, help hold & build soil, provide habitat and food for our animals , insects and birds, provide wind control, sequester carbon. Cutting down and burning trees releases carbon into the atmosphere and worldwide is a major pollutant - think slash & burn, not to mention forest fires.

September 2, 2020 from Steve Andreadis to all panelists: 8:22 PM
I highly support the One Fairfax proposal, especially the effort to engage with communities who are historically underrepresentative or may be left out if these efforts are solely through credits or economic incentives that are still expensive even with rebates.

September 2, 2020 from Kim Young to host (privately): 8:22 PM
Faith communities are often active in this area of concern and great partners

September 2, 2020 from John Clewett to all panelists: 8:23 PM

Amen to David's comments. Tree's also clean the air. We should be preserving the tree canopy and expanding it.

September 2, 2020 from John Cartmill to all panelists: 8:23 PM
thanks Maya

September 2, 2020 from Ali Althen to everyone: 8:23 PM You
can find the speedy survey here:
<https://www.fairfaxcounty.gov/environment-energy-coordination/public-engagement-cecap>

September 2, 2020 from Cara Blumenthal to everyone: 8:23 PM
Survey:
<https://www.fairfaxcounty.gov/environment-energy-coordination/public-engagement-cecap>

September 2, 2020 from Kelly Naylor to everyone: 8:25 PM
CECAPOutreach@fairfaxcounty.gov

September 2, 2020 from John Cartmill to all panelists: 8:26 PM
is the business community, chamber of commerce etc engaged

September 2, 2020 from Kim Young to host (privately): 8:29 PM
FCPS--is climate change being taught in schools?

September 2, 2020 from John Cartmill to all panelists: 8:30 PM
via schcan schhols distribute

September 2, 2020 from david nichols to everyone: 8:30 PM
Would it be possible to use public service announcements to educate Fairfax citizens about what's available and why these changes are important? If the public doesn't understand why this is important changes won't get made

September 2, 2020 from John Cartmill to all panelists: 8:31 PM
soory about that can schhols distribute info or links

September 2, 2020 from Ali Althen to everyone: 8:32 PM Hi
David, thank you for the suggestion. PSAs can be a great tool but are budget dependent. We are certainly looking at all possible means of reaching county residents and stakeholders.

September 2, 2020 from Arthur Purves to host (privately): 8:32 PM
Process improvement: Hold public engagement meetings after Labor Day, when people are back from vacation, or at least not on a week that is adjacent to Labor Day.

September 2, 2020 from Prachi S to all panelists: 8:33 PM Tap
into existing local groups/communities and identify a POC per group who would share information and improve engagement within that group. This can perhaps provide the scale and reach that is needed. Examples - scouts, school clubs, neighborhood

associations.

September 2, 2020 from Eric Honour to all panelists: 8:33 PM
"Given the way Dominion is regulated" - how is that?

September 2, 2020 from Vestal Tutterow to all panelists: 8:34 PM
Thank you Jeff. Great info.

September 2, 2020 from Kyle Hendrickson to all panelists: 8:35 PM
Agree with Prachi, we would really look to bridge that gap at KPMG, the company I work for.

September 2, 2020 from mary pierce to all panelists: 8:37 PM
Also all the volunteers such as Master Gardeners, Master Naturalists, etc.

September 2, 2020 from Prachi S to all panelists: 8:38 PM I haven't taken the survey yet (will do so soon) but maybe the survey can ask if the survey-taker could be that POC of their group :)

September 2, 2020 from Kyle Hendrickson to all panelists: 8:44 PM
Excellent discussion. Glad to see everyone's efforts and contributions.

September 2, 2020 from Aaron Sobel to all panelists: 8:44 PM
Might be worth noting the Climate Adaptation and Resilience Plan work upcoming again since adaptation was mentioned a few times in the chat.

September 2, 2020 from Arthur Purves to everyone: 8:45 PM To repeat an earlier observation, the survey does not have an answer for those who have already updated insulation, etc.

September 2, 2020 from Ali Althen to everyone: 8:45 PM More information on Climate Adaptation and Resilience is here:
<https://www.fairfaxcounty.gov/environment-energy-coordination/climate-adaptation-and-resilience-planning>

September 2, 2020 from Aaron Sobel to all panelists: 8:46 PM
This is a gigantic but incredibly important undertaking. My wife and I truly appreciate the work done to date and the effort to include the community. The targets set are very meaningful and we're excited to learn more about the county's efforts to make up for the current lack of ambition at the national level.

September 2, 2020 from KATHY DICKMAN to all panelists: 8:46 PM
Lots of good information and discussions. Thank you!

September 2, 2020 from Prachi S to all panelists: 8:46 PM
Great panel! Thank you for this.

September 2, 2020 from Richard Lay to everyone: 8:47 PM
Thank you everybody

September 2, 2020 from Kyle Hendrickson to all panelists: 8:47 PM
Thank you!!

September 2, 2020
great discussion
