

Tips for Using Cloth Face Masks

Even when wearing a mask, practice **social distancing** and **stay home when sick**.

Wash hands with soap and warm water **BEFORE** putting on a face mask.

Your face mask needs to **cover your nose and mouth** and fit snugly behind ears or back of head.

Do not touch the front of your mask when wearing.

After using, place your **cloth face mask** in the laundry and **wash your hands** with soap and warm water.

Do not use vented masks. They allow your germs to pass through to others. **Save N95 or surgical masks** for healthcare workers and first responders.

Do your part to slow the spread of COVID-19.
