

Functional Family Therapy

Family Priority, LLC

Family Priority has received a state grant to provide Functional Family Therapy (FFT). The staff is comprised of culturally competent, trauma informed, Master's Level therapists, who have extensive training and ongoing consultation with certified FFT therapists.

The FFT model is based on acceptance and respect of the family. The FFT therapist uses assessment and intervention to address risk and increase protective factors for the child and the family.

Functional Family Therapy is a high quality, evidence and strengths based family therapy program. The FFT program at Family Priority is a short-term program based in the family home. The FFT program is for children aged 11-18 years old, who demonstrate emotional or behavioral concerns. Referrals can be received from juvenile justice, mental health systems, schools and child welfare.
