

2020 PARK BOND PROJECTS AND SOCIAL VULNERABILITY

*Eight different datasets from the 2013-2017 American Community Survey were used to create the Vulnerability Index. These datasets include: People of Color, Low English-Speaking Ability, Low Educational Attainment, Household Income, Households without a Vehicle, Population without Health Insurance, Housing cost-burdened households, and Severely housing cost-burdened renters.

To create a score for each indicator, the data was classified into 5 classes using natural breaks. A score of 1 - 5 was given to each census tract for each indicator, with 5 representing the most vulnerable. The index was calculated by adding all scores together and dividing by 8.
