

Alcohol Policy – Park and Facility Listing

An approved Park Authority Alcoholic Beverage Use Application (ABUA), associated rental contract or park use permit, and appropriate VA ABC license, are required for any park uses involving alcohol. Please turn your ABUA form into the same location or department that you submitted your rental contract or permit. (ex: if it is at a picnic area, turn form in to the picnic department. If it is at a nature center or visitors center, send it to those locations) If an ABUA request is submitted, it is not guaranteed that the request will be approved. Staffing levels and other criteria need to be considered prior to permit approval.

There are many special use facilities within parks that could attract events that may request the use of alcohol that may not be specifically listed below. The Park Authority will assess requests for parks and facilities not listed on a case-by-case basis considering such things as mission alignment, park location, capacity, buffer areas, presence of pre-existing potential inherent dangers, culturally or naturally sensitive areas, vehicular related items such as parking egress access, availability of public transportation and site layout related to flow of traffic, as well as the availability of restrooms, utilities, and staffing. Following staff review and recommendation, the Park Authority Executive Director will have final approval.

Park	Location	Dedicated Area Description
These parks are generally indoor facilities, have on-site staff and are available “after hours” or not during regularly scheduled program hours.
