

# Fairfax Local Parks

By James P., Grade 3

Fairfax local parks have trees, plants, and flowers,  
Which have super oxygenation powers.  
The trees release oxygen to keep the air clean  
And also make the whole park green.

There are walking paths, trails, and hills galore.  
All Fairfax parks offer so much more!  
Lake Fairfax Park and Lake Accotink Park too,  
Braddock and Burke Lake Parks; just to name a few.

At local parks, you can go running and hiking.  
Also, you can play sports and go biking.  
You can go fishing and relaxing at lakes so blue,  
And go boating and canoeing there too.

Park staff work hard to make parks greener  
And take care of plants that make the air cleaner.  
They plant trees and flowers, keep the park pristine,  
And make sure trash on grounds are hardly seen.

Local parks are now more beautiful with less pollution;  
Park staff are keen to find the solution.  
They care for the parks; that's what they do.  
So, park staff, here's a big THANK YOU to you!

Our local parks have made the county greener.  
The air, water, and grounds are much cleaner.  
Due to parks, Fairfax County is healthier today  
For all of us to live, work, and play.
