STAFF REPORT FOR PLAN AMENDMENT 2013-CW-T3

BACKGROUND

On July 9, 2013, the Fairfax County Board of Supervisors (Board) authorized countywide Plan Amendment (PA) 2013-CW-T3 on the 2013 Pilot Comprehensive Plan Amendment Work Program to update the county's Comprehensive Plan by reflecting completed transportation facilities. The Countywide Transportation Plan Map, part of the Comprehensive Plan, depicts existing transportation facilities and planned transportation improvements. The improvements also are recommended on the Countywide Land Use Plan Map and the Area Plans volumes of the Comprehensive Plan. The Board recognized the need for this amendment during the update to the Comprehensive Land Use Plan Map (PA S11-CW-1CP, Adopted No. 2011-12), adopted on June 19, 2012.

PROPOSED PLAN AMENDMENT

The proposed Plan amendment would update the Countywide Transportation Plan Map, Comprehensive Land Use Plan Map, and Area Plan volumes of the Comprehensive Plan to reflect existing conditions. The revised Plan maps and text would show completed planned transportation improvements as existing facilities. The amendment also would add publicly owned, commuter parking facilities to the map(s) and make editorial changes.

This Plan amendment does not incorporate ongoing transportation Plan amendments. These Plan amendments are currently undergoing their own review process. Conclusions and action will be taken on those amendments on a later date.

PLANNING HISTORY

The Board adopted the first Fairfax County Countywide Transportation Plan Map on September 8, 1976. Since this adoption, the map has been updated multiple times to integrate new planned facilities and to reflect the completion of planned facilities. The Board adopted the most recent version of the Transportation Plan Map on July 31, 2006 as part of a countywide transportation plan update. This map reflects Comprehensive Plan amendments adopted through September 13, 2011.

ANALYSIS

To update the map to reflect completed facilities, a standardized definition and criteria for completed facilities was developed. Completion criteria for the various types of facilities shown on the Transportation Plan Map are shown in Table 1.

Table 1: Completed Facilities Criteria

Interchanges	Planned improvements proposed to be removed from illustration: <ul style="list-style-type: none"> • When the mainline facility's through traffic is no longer stop controlled, and • When both crossing roads have been built to their final planned number of lanes, and <ul style="list-style-type: none"> ○ Or when the final number of planned lanes on both streets can be accommodated by the existing facility (interchange).
Low Density/Rural Residential Roads	Planned improvements proposed to be removed from illustration: <ul style="list-style-type: none"> • When the road has been built to the planned number of lanes, and • When sight distance issues have been addressed, and • When shoulders are present on the facility, and • When existing safety issues on the road have been mitigated.
Urban/Suburban Roads	Planned improvements proposed to be removed from illustration: <ul style="list-style-type: none"> • When the road has been built to the planned number of lanes, and • When curb and gutter has been built on the complete road segment, and • When the road has sidewalks (on both sides) for the majority of its length, and <ul style="list-style-type: none"> ○ For this update sidewalks had to be present for approximately 75% of its length.
Commuter Parking Lot Facilities	Completed facilities proposed to be depicted on map: <ul style="list-style-type: none"> • If the facility is owned and maintained by the Virginia Department of Transportation (VDOT) or Fairfax County, and • When the facility is not co-located at a park, and • When the facility is not located on private property, e.g. shopping center, house of worship.

These criteria were applied to the recommendations in the Transportation Plan Map and corresponding Area Plan figures and text recommendations in the Comprehensive Plan, as amended through July 28, 2015. Those facilities found to meet the criteria for a completed facility and that had been completed by July 28, 2015 are recommended to be removed from the Transportation Plan Map and Area Plan figures, as they are no longer planned facilities. Corresponding Area Plan text and figure recommendations would be modified as well, including

any oversights from the 2006 update to the Transportation Plan Map. The list of completed facilities can be found in Attachment I.

In addition, modifications to the legend are proposed to make the symbology more consistent, based on discussions with the Planning Commission Transportation Committee. Existing facilities would be illustrated as squares and planned facilities as circles. With this modification, existing facilities consistently would be represented as the same shape, as Metrorail and VRE symbols are both squares. The change in symbology would help to clarify the legend and make the map more logical.

Three new symbols are proposed to be included in the Transportation Plan Map: new symbology for existing High Occupancy Toll (HOT) lane facilities, an updated symbol for Commuter Rail Stations and planned underpasses. In previous editions of the Transportation Plan Map, only proposed HOT lane facilities were shown on the Transportation Plan Map. Since the adoption of the last version of the Transportation Plan Map, HOT lane facilities have been completed in the county on both Interstate 95 (I-95) and Interstate 495 (I-495). The symbol for Commuter Rail Stations also is proposed to change to the Virginia Railway Express (VRE) symbol, as all of the commuter rail stations on the map are VRE Stations. This modification would enhance the accuracy of the map by reflecting existing conditions. Finally, the Reston Phase I Plan Amendment ST09-III-UP1(A) introduced a new symbol to the legend for roadway underpasses, which is now included in the legend.

The existing and proposed legend can be seen in Figure 1. The resulting revisions to the transportation figures are shown in Attachment II – Attachment VI.

Figure 1: Symbology

2011 (Current Symbology)

Existing	Proposed	
		Metrorail Station
		Commuter Parking Lot
		Transit Transfer Center (No Parking)
		Commuter Rail Station
		Rail Station
		Full Interchange Improvement (Study Required)
		Partial Interchange Improvement
		High Occupancy Toll (HOT) Lanes
		High Occupancy Vehicle (HOV) Lanes
		Widen or Improve Arterial Roadway (Number Indicates Proposed Number of Lanes Including HOV or HOT Lanes)
		Construct Arterial on New location
		Widen or Improve Collector or Local Street (Number Indicates Proposed Number of Lanes)
		Construct Collector or Local Street on New Location as Development Occurs (Cross sections to be finalized during process of reviewing plans for proposed development)
		Proposed Highway Overpass
		Proposed Cul-de-Sac
		Rail Transit or Bus Rapid Transit (BRT)
		Enhanced Public Transportation Corridor ¹

2014 (Proposed Symbology)

Existing	Proposed	
		Metrorail Station
		Commuter Parking Lot
		Transit Transfer Center (No Parking)
		Commuter Rail Station
		Rail Station
		Full Interchange Improvement (Study Required)
		Partial Interchange Improvement
		Proposed Highway Overpass
		Proposed Highway Underpass
		High Occupancy Toll (HOT) Lanes
		High Occupancy Vehicle (HOV) Lanes
		Widen or Improve Arterial Roadway (Number Indicates Proposed Number of Lanes Including HOV or HOT Lanes)
		Construct Arterial on New location
		Widen or Improve Collector or Local Street (Number Indicates Proposed Number of Lanes)
		Construct Collector or Local Street on New Location as Development Occurs (Cross sections to be finalized during process of reviewing plans for proposed development)
		Proposed Highway Overpass
		Proposed Cul-de-Sac
		Rail Transit or Bus Rapid Transit (BRT)
		Enhanced Public Transportation Corridor ¹

CONCLUSION

This editorial update to the Plan will improve the accuracy of the transportation recommendations within the Comprehensive Plan. The representation of completed facilities, modification to the symbology, and addition of publicly owned Commuter Parking Lots will improve the functionality and legibility of the Plan. The update ensures that the Transportation Plan Map and Comprehensive Plan reflect the most recent conditions possible, through July 28, 2015.

RECOMMENDATION

Staff recommends the Comprehensive Plan be modified as shown below. Text proposed to be added is shown as underlined and text proposed to be deleted is shown with a ~~striketrough~~.

PROPOSED FIGURE CHANGES**MODIFY**

FIGURES: Fairfax County Comprehensive Plan, 2013 Edition, Areas I, II, III and IV, and the Policy Plan. All transportation recommendations figures will be updated to reflect completed improvements, as shown in Attachment II – Attachment VI.

PROPOSED AREA I CHANGES

MODIFY: Fairfax County Comprehensive Plan, 2013 Edition, Area I, Area Plan Overview as amended through 3-24-2015, General Planning Area Recommendations, Transportation, Supporting Facility Recommendations, page 13:

“Supporting Facility Recommendations

Regardless of the mode of public transportation chosen in a specific corridor, supporting facilities such as commuter park-and-ride lots must be identified and located. Such sites could serve as parking areas for HOV or express bus collection, or as rail stations, or perhaps for both functions as public transportation ridership increases over time. The Plan locates these sites in order that actions can be taken to preserve their availability, since the supply of potential sites is rapidly decreasing as the county continues to develop.

...

The countywide Transportation Plan map contains several different symbols representing different types of supporting facilities. These are briefly discussed below:

...

~~C = Commuter Rail Station~~ VRE = Virginia Railway Express. ~~Commuter Rail~~ Virginia Railway Express Stations are identified along the Norfolk Southern and ~~RF & P~~ CSX rail lines where commuter rail service is ~~planned~~ provided. VRE station parking areas are generally surface lots accommodating between 200 and 800 vehicles.”

MODIFY: Fairfax County Comprehensive Plan, 2013 Edition, Area I, Annandale Planning District as amended through 11-18-2014, Districtwide Recommendations, Transportation, page 4:

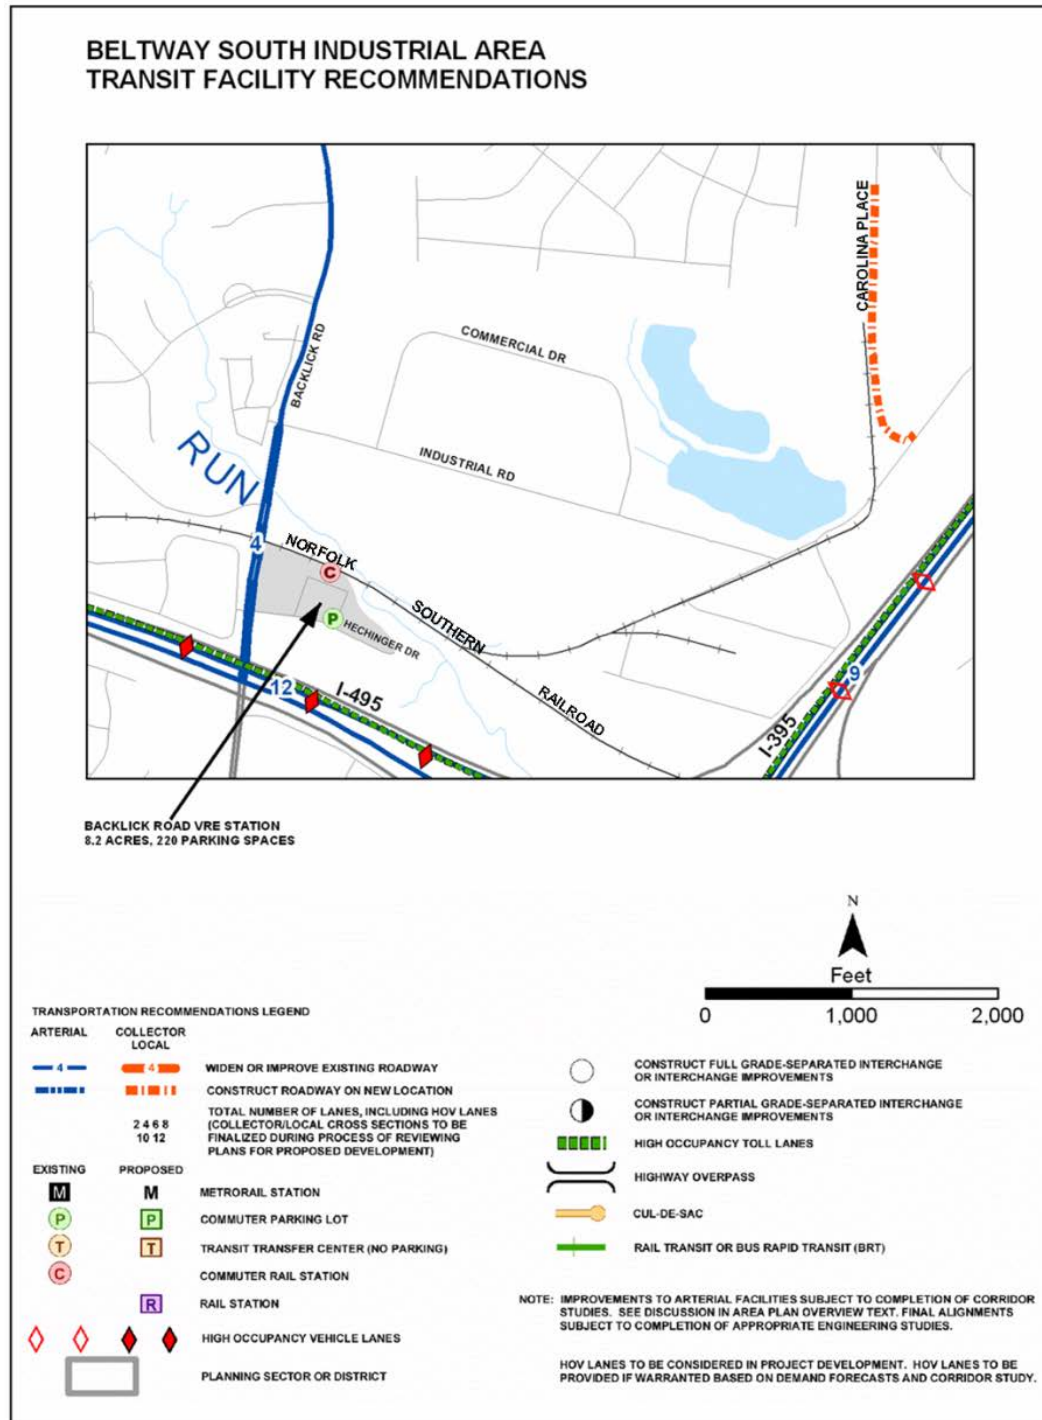

“Transportation [underlined in original text]

...

The Capital Beltway is ~~planned for~~ 12 lanes including HOT lanes (two in each direction) from I-95/I-395 to just north of the Dulles Airport Access Highway, and is planned for 12 lanes including HOT lanes (two in each direction) to the American Legion Bridge.”

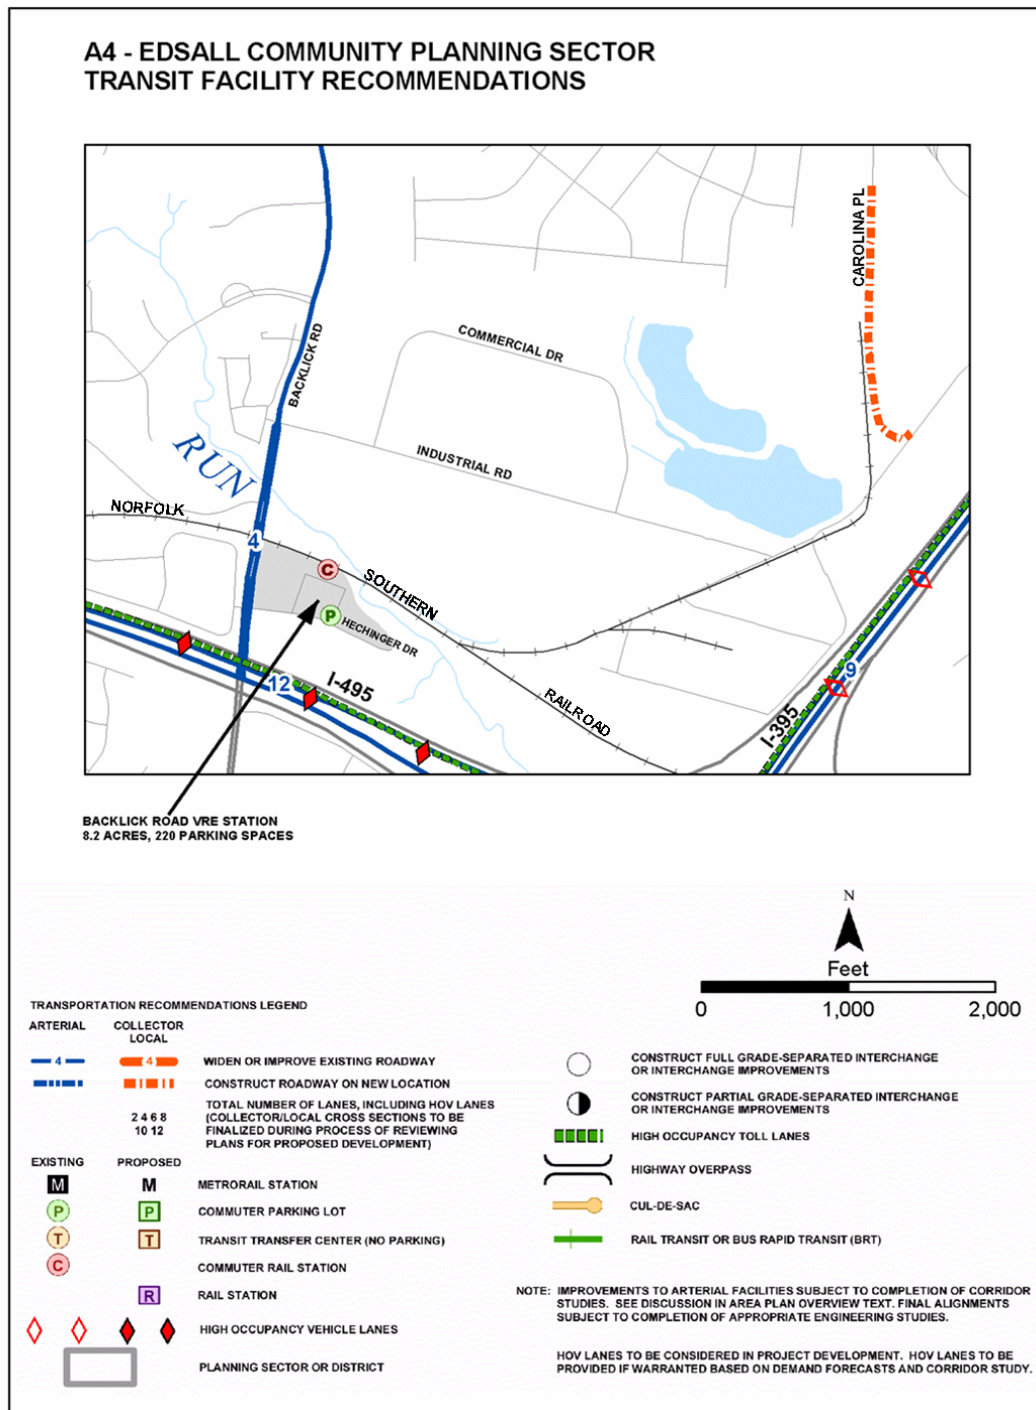

DELETE

FIGURE: Fairfax County Comprehensive Plan, 2013 Edition, Annandale Planning District as amended through 11-18-2014, Beltway South Industrial Area, Figure 28, "Beltway South Industrial Area, Transit Facility Recommendations," page 85, because the figure is no longer relevant as the Commuter Parking Lot is existing.

**DELETE
FIGURE:**

Fairfax County Comprehensive Plan, 2013 Edition, Annandale Planning District as amended through 11-18-2014, A4 – Edsall Community Planning Sector, Figure 43, “A4-Edsall Community Planning Sector, Transit Facility Recommendations,” page 115, because the figure is no longer relevant as the Commuter Parking Lot is existing.

MODIFY: Fairfax County Comprehensive Plan, 2013 Edition, Area I, Merrifield Suburban Center as amended through 3-4-2014, Area-Wide Recommendations, Transportation, Roadway Improvements, Interchanges, page 42:

“Interchanges - The provision of an interchange has both land use and transportation planning implications. In terms of land use, caution must be exercised in reviewing development proposals in the immediate interchange area due to right-of-way implications. In terms of transportation planning, revised access patterns must be accommodated in the immediate area, since the interchange ramps cause grade changes and weaving/merging traffic conflicts. The amount of land needed, and the extent to which access must be re-oriented varies with the actual design of the interchange. Development or redevelopment of properties adjacent to future interchange improvements should recognize the need to reorient access in a manner consistent with the future interchange design.

~~There are three~~ is one interchange planned for improvements which that serves the Merrifield Suburban Center: I-66/I-495, ~~Arlington Boulevard/I-495 and Gallows Road/I-495~~. In addition, there is one new interchange planned for the Lee Highway/Gallows Road intersection, ~~and one new partial interchange planned for Lee Highway/I-495.~~

...

MODIFY: Fairfax County Comprehensive Plan, 2013 Edition, Area I, Merrifield Suburban Center as amended through 3-4-2014, Area-Wide Recommendations, Transportation, Policy Recommendations, Roadway Improvements, Collectors/Local Streets, pages 42 and 44:

“Collectors/Local Streets - Collector roadways route traffic to and from local streets to the arterial road system. Collector roads generally are not intended to attract through trips, but instead provide for internal traffic circulation, including transit service. For the most part, collector and local street improvements will occur in conjunction with redevelopment activity. The following collector and local street improvements are planned to improve traffic circulation within the Merrifield Suburban Center (See Transportation Map, Figure 18):

...

- ~~Merrilee Drive could function as the “Main Street” for the Merrifield Suburban Center by linking the Metro Station and the planned “Town Center.” In order for this to occur, Merrilee Drive is planned to extend north to intersect with Prosperity Avenue and the Dunn Loring Merrifield Metro Station property, and to extend south across Lee Highway and connect with Eskridge Road. The extension of Merrilee Drive to the south requires the realignment of Eskridge Road and Merrilee Drive.~~
- ~~Eskridge Road is planned to extend south to connect with Williams Drive as well as to extend to the north to connect with Merrilee Drive as described above. The extension of Eskridge Road to the north requires the realignment of Eskridge Road and Merrilee Drive. Eskridge Road now connects Merrilee Drive to Williams Drive, but does not yet have a sidewalk on its western side.~~

- Williams Drive, north of Arlington Boulevard, is planned to connect with Prosperity Avenue, either with a connection to Hamaker Court [shown on Figure 18] or directly across to Prosperity Avenue [not shown].
- ~~Strawberry Lane is planned for improvement and may be extended to Eskridge Road.~~
- ...

MODIFY: Fairfax County Comprehensive Plan, 2013 Edition, Area I, Merrifield Suburban Center as amended through 3-4-2014, Land Unit Recommendations, Land Unit A, page 50:

“LAND UNIT A

Land Unit A is approximately 15 acres and is currently planned and developed with the Dunn Loring-Merrifield Metro Station (see Figure 21). The Metro Station property is envisioned to redevelop with office or hotel uses having retail and service uses on the ground level or to redevelop with a mix of uses with residential use as a major component. The focal point of this development is envisioned to be a public plaza or green that is located at the northern terminus of the Merrilee Drive extension. The plaza and the street level retail are intended to help create a more urban and people-oriented place that provides convenient retail services and encourages pedestrian movement between the Metro station and the planned high intensity development to the south.

...

Option 1: As an option, up to eight acres of the Metro Station property may be appropriate to redevelop with office and/or hotel uses up to a 1.0 FAR (or approximately 350,000 square feet), with the remaining acreage to be used for metro parking and related uses. Development proposals under this option must provide for all applicable Area-Wide guidelines as well as for the following:

...

- ~~Development should be coordinated with the extension of Merrilee Drive to Prosperity Avenue.”~~

...

PROPOSED AREA II CHANGES

MODIFY: Fairfax County Comprehensive Plan, 2013 Edition, Area II, Area Plan Overview as amended through 3-24-2015, Introduction, General Planning Area Recommendations, Transportation, Supporting Facility Recommendations, page 13:

“Supporting Facility Recommendations

Regardless of the mode of public transportation chosen in a specific corridor, supporting facilities such as commuter park-and-ride lots must be identified and located. Such sites could serve as parking areas for HOV or express bus collection, or as rail stations, or perhaps for both functions as public transportation ridership increases over time. The Plan locates these sites in order that actions can be taken to preserve their availability, since the supply of potential sites is rapidly decreasing as the county continues to develop.

...

The countywide Transportation Plan map contains several different symbols representing different types of supporting facilities. These are briefly discussed below:

...

~~C = Commuter Rail Station~~ VRE = Virginia Railway Express. ~~Commuter Rail Virginia Railway Express~~ Stations are identified along the Norfolk Southern and ~~RF & P~~ CSX rail lines where commuter rail service is ~~planned~~ provided. VRE station parking areas are generally surface lots accommodating between 200 and 800 vehicles.”

PROPOSED AREA III CHANGES

MODIFY: Fairfax County Comprehensive Plan, 2013 Edition, Area III, Area Plan Overview as amended through 3-24-2015, Introduction, General Planning Area Recommendations, Transportation, Supporting Facility Recommendations, page 13:

“Supporting Facility Recommendations

Regardless of the mode of public transportation chosen in a specific corridor, supporting facilities such as commuter park-and-ride lots must be identified and located. Such sites could serve as parking areas for HOV or express bus collection, or as rail stations, or perhaps for both functions as public transportation ridership increases over time. The Plan locates these sites in order that actions can be taken to preserve their availability, since the supply of potential sites is rapidly decreasing as the county continues to develop.

...

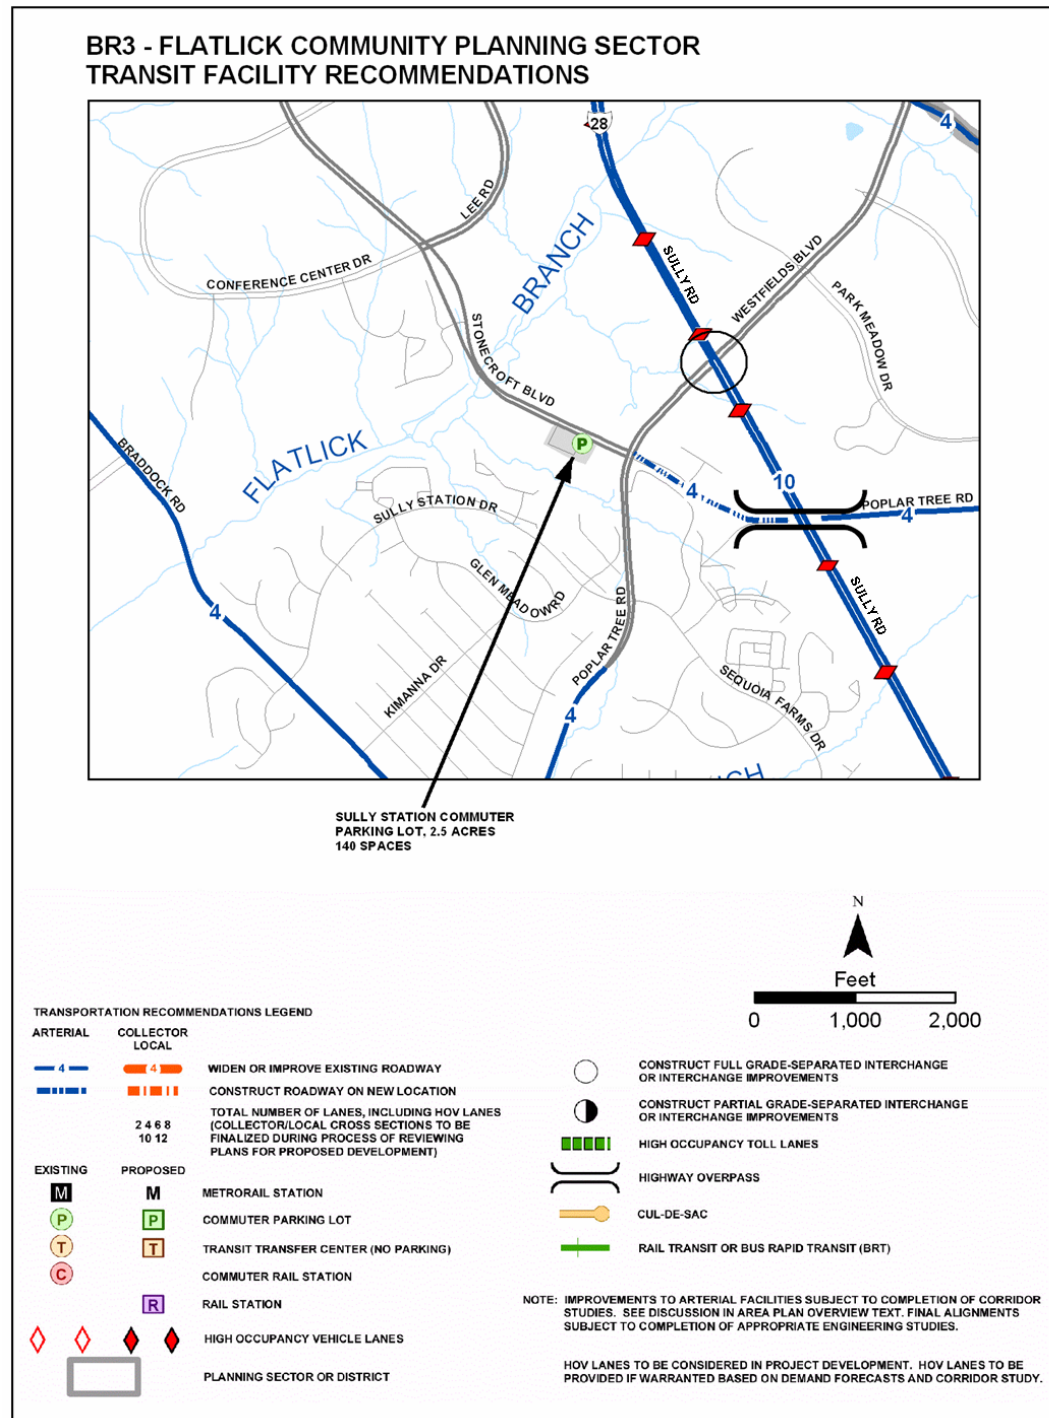

The countywide Transportation Plan map contains several different symbols representing different types of supporting facilities. These are briefly discussed below:

...

~~C = Commuter Rail Station~~ VRE = Virginia Railway Express. ~~Commuter Rail Virginia Railway Express~~ Stations are identified along the Norfolk Southern and ~~RF & P~~ CSX rail lines where commuter rail service is ~~planned~~ provided. VRE station parking areas are generally surface lots accommodating between 200 and 800 vehicles.”

MODIFY: Fairfax County Comprehensive Plan, 2013 Edition, Area III, Pohick Planning District as amended through 3-24-2015, P6-Middle Run Community Planning Sector, Recommendations, Public Facilities, recommendation #1, page 75:

“1. The Burke Centre Commuter Rail Station parking area is ~~planned for approximately 1500~~ has 1,510 parking spaces. This facility should have improved pedestrian and bicycle connectivity to the surrounding communities to the north, west, east and south. These trails should link to the existing and planned local and county trail networks, which will encourage pedestrian and bicycle access to the station and would reduce the need for additional parking.”

MODIFY: Fairfax County Comprehensive Plan, 2013 Edition, Area III, Upper Potomac Planning District as amended through 7-28-2015, Overview, District-Wide Recommendations, Public Facilities, recommendation #5, page 25:

“5. Construct additional public transit facilities including park-and-ride lots at the southeastern quadrant of the Dulles Airport Access Road and Monroe Street., ~~at Reston East and at Lawyers Road and Reston Parkway. Construct a transit center in Reston at the Reston Town Center. In addition, preserve the potential for rail destination stations at the following locations: Dulles Toll Road just west of the Reston Parkway and Dulles Toll Road at the Center for Innovative Technology (CIT). (UP5)~~”

MODIFY: Fairfax County Comprehensive Plan, 2013 Edition, Area III, Upper Potomac Planning District as amended through 7-28-2015, UP7-West Ox Community Planning Sector, Recommendations, Transportation, page 240:

“Transportation [underlined in original text]

Transportation recommendations for this sector are shown on Figure 81. In some instances, site-specific transportation recommendations are included in the land use recommendations section. The figures show access orientation, circulation plans, interchange impact areas and generalized locations of proposed transit facilities. The recommendations contained in the Area Plan text and maps, the Policy Plan and Transportation Plan map, policies and requirements in the Public Facilities Manual, the Zoning Ordinance, and other standards will be utilized in the evaluation of development proposals.

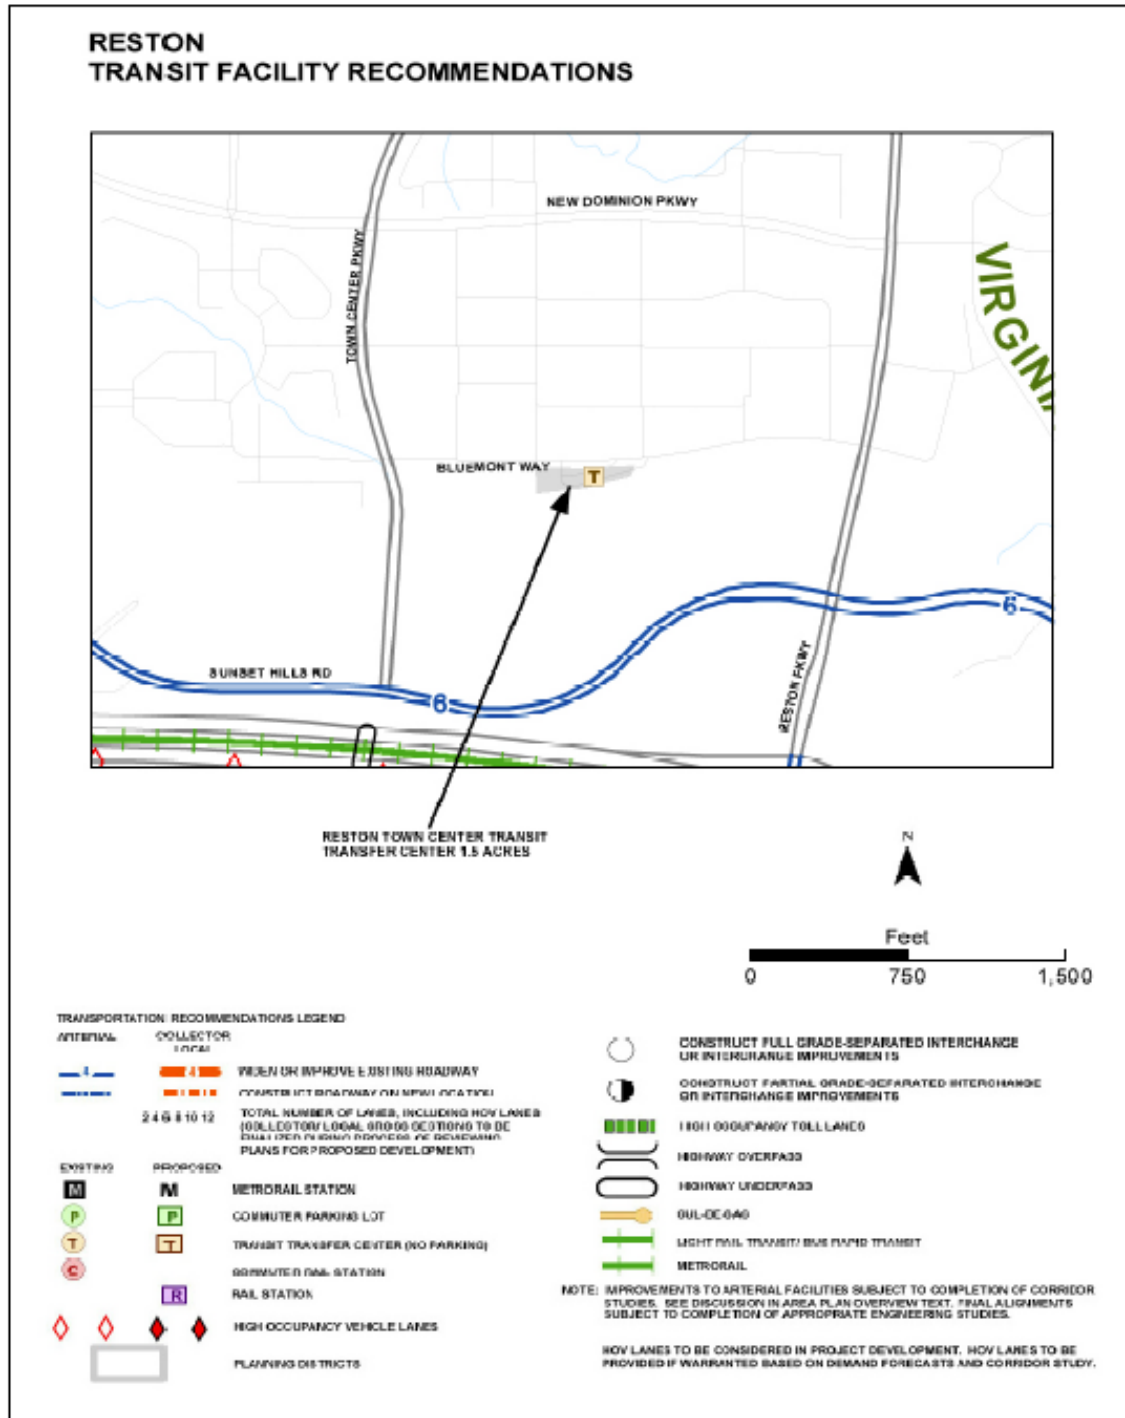

...

~~Construct an interchange at Sully Road and Frying Pan Road. Actual staging of intersection/interchange construction is to be determined based on traffic volumes and the extent to which commitments to complete the interchange exist.”~~

...

MODIFY: Fairfax County Comprehensive Plan, 2013 Edition, Area III, Dulles Suburban Center as amended through 7-28-2015, Land Unit D-2, Recommendations, Transportation, page 95:

“Transportation [underlined in original text]

To improve the area road network by alleviating traffic congestion and enhancing traffic safety along McLearen Road between Towerview Road and the ~~proposed~~ interchange of McLearen Road and Route 28, the planned four lane, undivided collector street, Park Center Road, should be extended eastward from its intersection with Towerview Road through lot 24-2((1))20, then curve southward through parcel 24-4((1))3 adjacent to the eastern boundary of lot 24-4((1))2 to intersect McLearen Road opposite its westernmost intersection with EDS Drive.”

PROPOSED AREA IV CHANGES

MODIFY: Fairfax County Comprehensive Plan, 2013 Edition, Area IV, Area Plan Overview as amended through 3-24-2015, Introduction, General Planning Area Recommendations, Transportation, Supporting Facility Recommendations, page 14:

“Supporting Facility Recommendations

Regardless of the mode of public transportation chosen in a specific corridor, supporting facilities such as commuter park-and-ride lots must be identified and located. Such sites could serve as parking areas for HOV or express bus collection, or as rail stations, or perhaps for both functions as public transportation ridership increases over time. The Plan locates these sites in order that actions can be taken to preserve their availability, since the supply of potential sites is rapidly decreasing as the county continues to develop.

...

The countywide Transportation Plan map contains several different symbols representing different types of supporting facilities. These are briefly discussed below:

...

~~C = Commuter Rail Station~~ ~~VRE = Virginia Railway Express~~. ~~Commuter Rail Virginia Railway Express~~ Stations are identified along the Norfolk Southern and ~~RF & P~~ CSX rail lines where commuter rail service is ~~planned~~ provided. VRE station parking areas are generally surface lots accommodating between 200 and 800 vehicles.”

MODIFY: Fairfax County Comprehensive Plan, 2013 Edition, Area IV, Franconia-Springfield Area and Fort Belvoir North Area as amended through 10-28-2014, Area-Wide Recommendations, Transportation, page 16:

“Transportation

...

Many public transportation services and facilities serve the Franconia-Springfield Area, including the Franconia-Springfield Metro station, the Virginia Railway Express (VRE) commuter rail station, over 5,000 commuter parking spaces, Greyhound interstate bus service, Metrobus regional service, and county bus services including the Fairfax County Connector and Prince William County services, brought together at the Joe Alexander Transportation Center located south of the Franconia-Springfield Parkway at Frontier Drive. In addition to regional and county transit services, the Transportation Association of Greater Springfield (TAGS) provides local circulator bus service weekdays between the Transportation Center and the Springfield regional shopping mall/future town center. ~~Planned~~ The high occupancy toll (HOT) lanes on I-95, I-395 and I-495 ~~will~~ provide further transit connectivity and service to the Franconia-Springfield Area, while also providing needed additional roadway capacity on these facilities.”

MODIFY: Fairfax County Comprehensive Plan, 2013 Edition, Area IV, Franconia-Springfield Area and Fort Belvoir North Area as amended through 10-28-2014, Fort Belvoir North Area, Transportation, page 92:

“TRANSPORTATION

The adopted County Transportation Plan identified the following roadway and public transportation improvements in the vicinity of the FBNA (See Figure 28):

...

- ~~Widen Fullerton Road to 4 lanes between Backlick Road and the Fairfax County Parkway;~~
- ~~Widen I-95 to 11 lanes, including HOT lanes, HOT designation, and the extension of the existing HOV lanes south to Prince William County;~~
- Dedicate a site of at least 5 acres for a Transit Facility within the eastern portion of the FBNA site.”

LAND USE

PLAN MAP: The Comprehensive Land Use Plan map would be updated to reflect the new symbology and completed facilities.

TRANSPORTATION

PLAN MAP: The Countywide Transportation Plan Map would be updated to reflect the new symbology and completed facilities.
