Dam Safety Information

A Fairfax County,
VA
Publication
September 2019

A dam is a man-made barrier that collects and confines water. The Department of Public Works and Environmental Services manages a dam safety program and is responsible for monitoring 20 state-regulated dams in Fairfax County.

The county implemented an electronic advance flood warning system to monitor water levels at these dams.

Dam break inundation zones are areas that may flood if a dam fails. Property that is located in a dam break inundation zone is at risk of flooding. County records indicate that your property is in or near a dam break inundation zone.

Fairfax County uses the following methods to warn residents about flooding and other emergencies:

- **Fairfax Alerts:** delivers emergency information to county residents before, during and after a crisis and provides notices about severe weather and traffic congestion. Messages are delivered to all devices registered and may include email, cell and home phones, pagers and other wireless devices. Register for emergency alerts from Fairfax County at www.fairfaxcounty.gov/alerts.
- **Emergency Information Blog:** www.fairfaxcounty.gov/emergency/blog is the official Fairfax County emergency preparedness, response and recovery website. Sign up to receive blog alerts and updates.

There are important safety measures that residents and business owners should take in preparation for a flood that include planning, preparing and mitigating. Make a plan before there is an emergency. Build an emergency kit for yourself and your family. Don't forget your pets. Learn more at www.fairfaxcounty.gov/emergency or www.ready.gov/virginia.

Prepare for Flooding:

- Know how to shut off electricity and gas to your home and business.
- Make a list of emergency telephone numbers and identify a safe place to go.
- Make an inventory of your home and business items especially basement contents.
- Put insurance policies, valuable papers and medicines in a safe but accessible place.
- Put cleaning supplies, a camera and waterproof boots in a handy place.
- Develop a family preparedness plan for emergencies, including flooding.
- Register for Fairfax Alerts and the emergency blog.

Thank you.

To help prepare your family, home and business for a disaster, the Office of Emergency Management provides information at www.fairfaxcounty.gov/oem/ or call 571-350-1000, TTY 711.

For more information about county-maintained dams and flooding call the staff of the Stormwater Planning Division at 703-324-5500, TTY 711, or email SWPDmail@fairfaxcounty.gov for assistance.
