Solid Waste Commercial Price List – FY 2020

The waste delivery contract rate for disposal of combustible waste increased to $64 per ton. The non-contract rate, or system fee, increased to $68 per ton. There is a $17 minimum charge for all loads of waste delivered to the disposal facilities.

The rate for brush increased to $45 per ton, and yard waste increased to $62 per ton.

Other tipping fees for regular solid waste at the I-95 Landfill Complex, I-95 Energy/Resource Recovery and I-66 Transfer Station Complex will be as follows for Fiscal Year 2020 (July 1, 2019 - June 30, 2020):

- Commercial Cash Program/Residents Complexes: $68.00 per ton
- Brush, all customers: $45.00 per ton
- Yard Waste (bagged & unbagged), all customers: $62.00 per ton
- Vacuumed Leaves: $42.00 per ton
- Minimum Charge (all materials): $17.00 per load

Tire disposal rates are as follows:

- Passenger: $130.00 per ton
- Truck Oversized: $210.00 per ton
- Rubber Tracks/Solid Tires: $260.00 per ton
- Tires on rims are charged an additional fee: $7.00 per rim
- Additional charge for dirty, muddy tires: $20.00 per ton
- Minimum Charge: $17.00 per load

If you have any questions, please contact our office at 703-324-5230.

Solid Waste Permit Renewals

Solid waste disposal companies and tire disposal companies must have completed permit renewals. Applications and instructions were emailed to current disposal companies in May. Please ensure your email address is updated.

New: If your company has an existing account, the application does not need to be completed. However, the bond and other related documents are required.

Waste Delivery Disposal Agreement (WD/DA)

New WD/DAs must be signed by collection and disposal companies who wish to receive the contract disposal rate. The “evergreen” agreements will display the key items in the WD/DA in an Exhibit to the document. Exhibit 1 will contain the rates for combustible waste disposal, penalty fee, guaranteed tonnage (as applicable), and other information that may change periodically. Companies should sign two (2) copies of Exhibit 1 and return them to the Government Center. Once the Director signs the agreement, a copy will be returned for your records.

Purple Can Club – Alternative Way to Recycle Glass

The Purple Can Club has really taken off! There are now special containers – painted purple, of course – at several locations in...
Residents have been using the purple cans, which have been dropped at several County facilities, as an alternative way to recycle glass. We can use your help in getting the word out – the Fairfax County Public Works website has lots of information about glass recycling – including this video that explains the process. Please let your customers know that there are options for glass recycling. We are adding new sites wherever possible – so keep checking the locations! While we are trying to provide options for glass recycling, Fairfax County is not removing glass from the list of recyclable materials that must be collected separately.

You also can bring us clean, source separated glass at a reduced tip fee. Please contact with Eric Forbes, Director of Engineering and Environmental Compliance to discuss the ways that we can work together to recycle glass in the region. He can be reached via email at Eric.Forbes@FairfaxCounty.gov or at 703-324-5230.

Safety Reminder

With the recent hot weather, please remind your employees to be safety conscious and drink lots of water while collecting and transporting waste; even a little dehydration can lead to confused thinking and increased vehicle accidents.

Other Safety Reminders

- Drivers are not to leave vehicles un-attended in the line and not block the walkway.
- Please remind your staff to treat our facilities in a respectful manner. The men’s restroom across from the I-66 Permit Office is not being treated properly.
- Helpers are to be let out of the vehicle before they arrive at the scales.

Notification Requirements for Collectors

Any collector who intends to alter its services or sell/transfer its accounts to another company must notify its customers and the Solid Waste Management Program within 30 days. Whether by transfer or any other reason, any alteration to service fees, surcharges, or collection schedule must be communicated in writing to the SWMP and all affected customers no less than 30 days prior to the change.

For more information regarding the county code as it relates to these issues, please check out the county code, Section 109.1-5-7, online at: www.fairfaxcounty.gov/publicworks/sites/publicworks/files/assets/documents/chpt109-swm.pdf.

Pay Your Disposal Invoice Online

Save time and pay disposal invoices online. Please have your invoice at hand when you are making a payment. You will need to input your Company Name EXACTLY as it appears on your invoice and your Account Number to make a payment. The amount shown online is your total account balance due. If there are any discrepancies, please contact the LIS Team at 703-324-5230 or email at DPWES-SWMPLIS@fairfaxcounty.gov.

To make an ACH payment using your personal or corporate checking account, go to: https://www.fairfaxcounty.gov/publicworks/recycling-trash.

Very Small Quantity Generators (VSQG – formerly CESQG)

Please remind your commercial customers that businesses that generate small quantities of hazardous waste (HW) may qualify for a special county-managed business hazardous waste disposal program (VSQG – formerly CESQG) that provides a legal and affordable solution for proper HW disposal. The benefit of the VSQG program is that it offers prices well below the normal cost of disposing with a licensed HW disposal contractor. Also, the program eliminates the burden of stringent Federal and State recordkeeping requirements.

Also, the VSQG disposal event web page has been redesigned, making it more accessible for government agencies or small Fairfax County-based businesses to get information, print off forms and guidance, and to provide direct channels for any questions or concerns. All questions or concerns surrounding the proper storage and disposal of hazardous waste can now be directed to the website link (https://www.fairfaxcounty.gov/publicworks/recycling-trash/very-small-quantity-generators).

Fairfax County offers six VSQG events each year, of which two have already occurred. For 2019, hazardous waste can be delivered from 9 a.m. to 2 p.m., rain or shine, at the I-66 Transfer Station Complex on September 18, and November 13, unless the complex is closed due to severe inclement weather or an emergency. For more information on the VSQG program, please contact Daniel Brooks at (703) 324-5068.
