

Fairfax County 2018 MS4 Program Plan and Annual Report

Appendix R10

List of Outfalls from Industrial and High Risk Runoff Facilities
Inspected During the Reporting Period

VSMP Permit Number VA0088587
9-28-2018

Fairfax County 2018 MS4 Program Plan and Annual Report
Appendix R10

Fairfax County has established guidelines by which Stormwater Planning Division Code Specialists conduct inspections of points of connection to the Fairfax County municipal separate storm sewer system (MS4) and outdoor activities associated with industrial and high risk runoff facilities located within Fairfax County’s MS4 service area. At a minimum, the County will inspect VPDES industrial stormwater permitted outfalls connected to its MS4 once every five years consistent with the MS4 permit requirement, giving priority to those areas with the most facilities. For more details, see “Standard Operating Procedures for Industrial and High Risk Runoff (IHRR) Program MS4 Point of Connection and Facility Inspections” (Appendix P5 of the Program Plan).

From July 1, 2017 to June 30, 2018, the County evaluated 202 facilities on its list of potential IHRR dischargers. The evaluations are listed below. Of them, the County inspected the points of connection to the MS4 from 73 facilities in the MS4; these facilities are distinguished below with bold facility ID numbers. Three other facilities were inspected, but later determined to be outside the County’s MS4 service area; they are distinguished with bold italicized facility ID numbers. The remaining 126 facilities were found to be closed, moved outside the County, or not having industrial or high risk activities; those facilities will be removed from the inspection program as the County continues to refine its discharger list.
